DIPLOMA IN PHOTOSHOP

LESSON 3

FAMOUS
Fakes

The Cottingley Fairies: a series of 5 photos taken by Elsie Wright and Frances Griffiths in 1917 and 1920. In the early 1980s Elsie and Frances admitted that the photographs were faked, using cardboard cut-outs of fairies copied from a popular children's book of the time, but Frances maintained that the fifth and final photograph was genuine.

Is this a real photo?

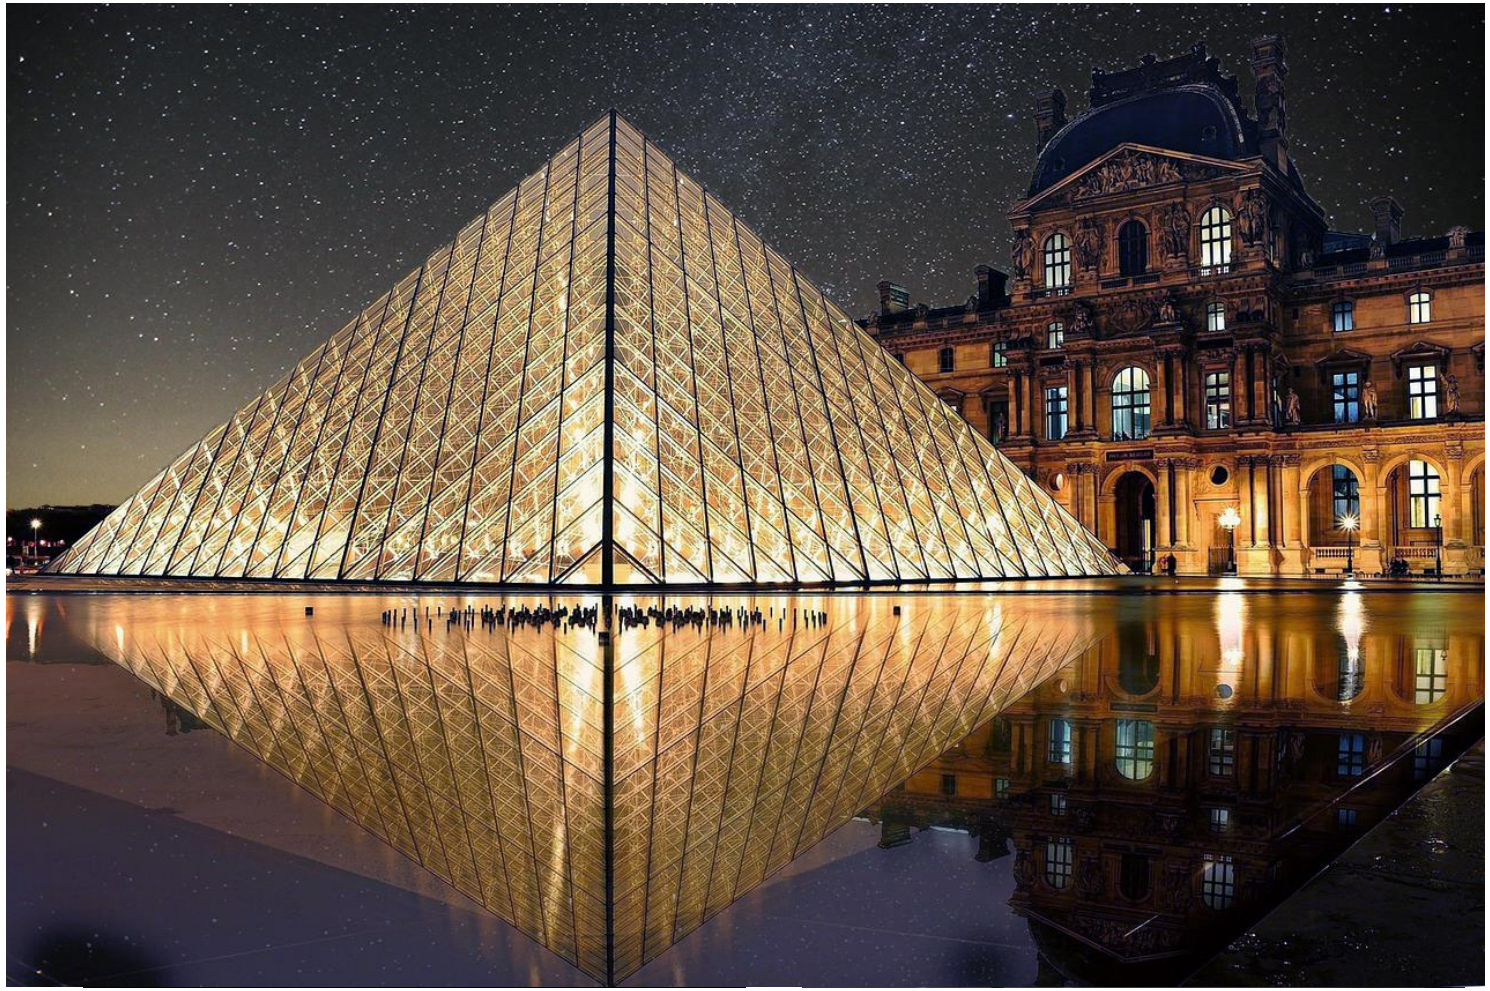
LAYERS

The Importance of Layers



What are Layers?

- Layers are at the very core of image editing in Photoshop
- Layers are images stacked on top of each other
- Introduced in 1994 and have revolutionised photography
- Photoshop can hold over 8000 layers
- We will demonstrate layers many times as they are vital to all of our enhancing, editing, creations and healing
- We will be using them in every lesson from this lesson onwards

Layers

Layers Panel

Layers Tab

This refers to the overall lightness or darkness. We will change entire image pixels

Filter

This will allow use to quickly find layers in bigger projects

Adjustment Layer

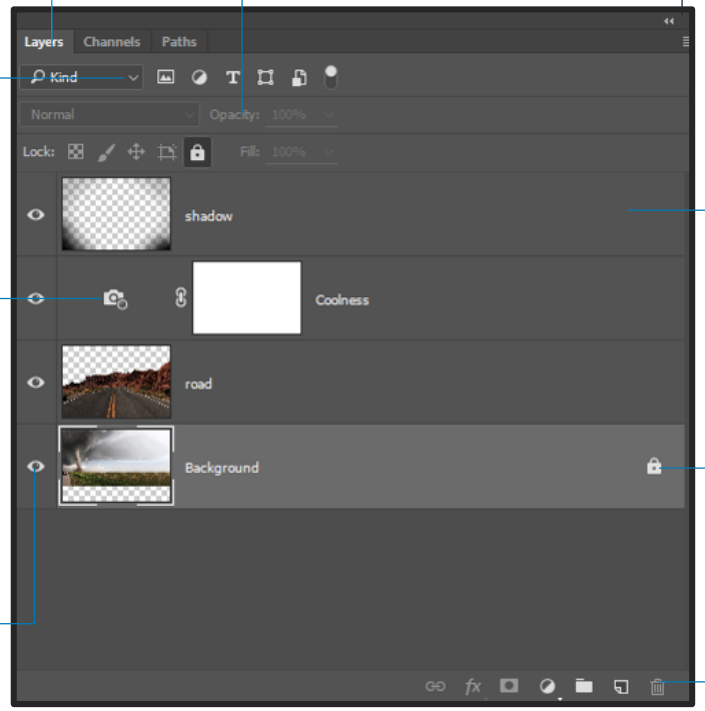
An adjustment layer is a non-destructive Adjustment.

Toggle

This toggle will allow you to turn of the visibility off or on

Opacity

This will all you to lower the visibility level of the layer selected



Remove/Compact

This will allow you to remove or hide the layers panel. If you remove the layers panel, you can open it back up using the Window menu

New Layer

Another layer, this can be blank or can be filled as another image

Background

Most images, when open in Photoshop, will default with a locked background layer.

Layer Options

Here you can delete a layer, create a new layer, create a folder, create an adjustment layer, add a mask, add layer effects or link multiple layers

How Layers work

Stacked Layers

Image View

LAYER TYPES

Layers

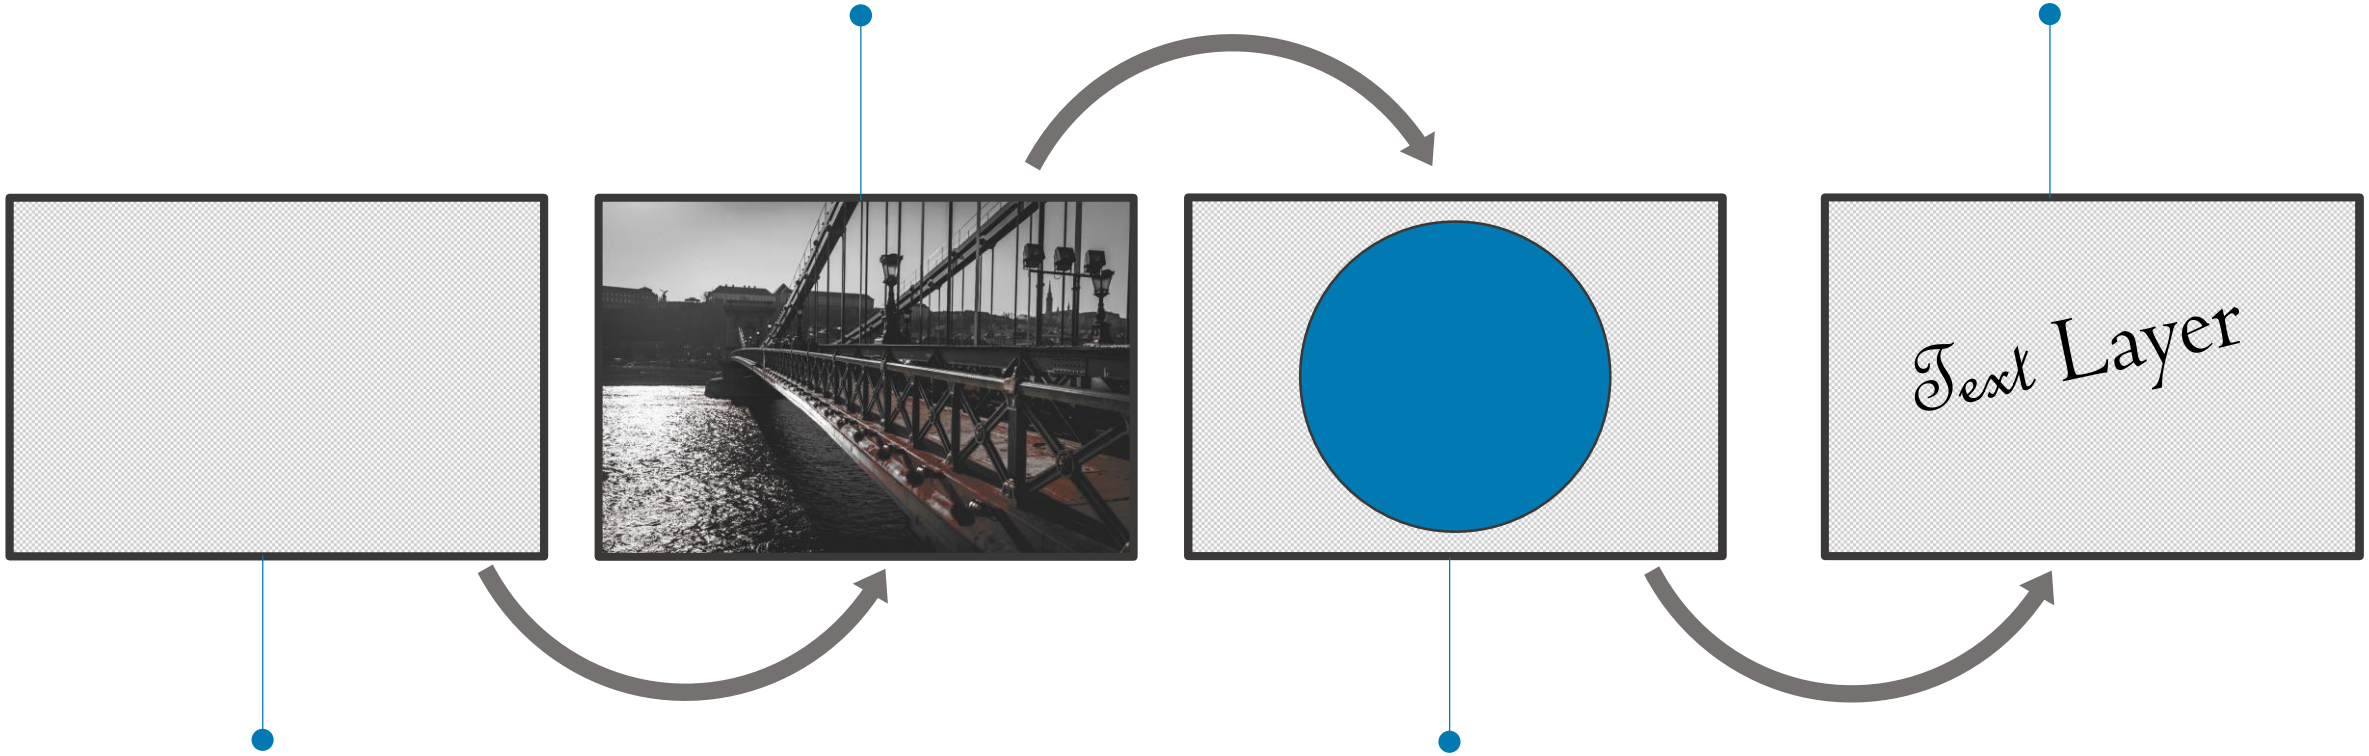
Layers Types

Adjustment Layer

Allows you to apply non-destructive adjustments.

Text Layer

Allows you to add text to your images.



Pixel Layer

Displays all pixel-based data, colours and images.

This is your image.

Shape Layer

Adds graphical shapes to your images

MASKING

WHAT IS THE PURPOSE OF A MASK?

Masking

What is masking?

- Masking can be explained as hiding certain pixels to let the image below be seen.
- Masks are applied to a layer and can be used on every type of layer.

- Layer masks use values of grey to assign levels of transparency to specific portions of a layer or group of layers.

- Masking generally works as white to show and black to hide.

Lesson Challenge

Take to images and combine them using layers. Reveal one part of the image using a mask.
