

Typography Observation Exercise

Sample Image

From a beginner perspective, I feel the poster is mostly easy to read. Words like "THINK" and "WORLD" stand out clearly because they are bigger and bolder. The script fonts are slightly harder to read, but they add a stylish look.

In terms of aesthetics, the design looks very creative and attractive. The use of colours like yellow for "WORLD" and blue for "DESIGN" makes the design more eye-catching. The mix of font styles makes it visually interesting instead of boring.

In this poster, I noticed a mix of different font styles:

- Script fonts are used in lines like "You stopped to" and "be without", which look handwritten.
- Serif fonts are used in "THINK" and "WORLD", which look bold and strong.
- A sans-serif font is used in "DESIGN", which looks clean and modern.

One important thing I observed is the hierarchy. The designer has made certain words bigger so that our attention goes to them first. For example, "THINK" and "WORLD" are the most noticeable.

The poster is centre-aligned, which makes it look neat and balanced. The combination of different fonts creates contrast and improves the overall design. Small elements like lines and hand icons also guide the viewer's attention.
