

Basic Image Adjustment Techniques(Assignment-9)

Basic Image Adjustment – Process Explanation

1. Opened the image in Adobe Photoshop and duplicated the layer for safety.
2. Adjusted brightness and contrast to improve overall lighting.
3. Used Levels to enhance contrast and balance shadows and highlights.
4. Applied Color Balance to correct color tones and remove unwanted color cast.
5. Adjusted Vibrance slightly to improve color intensity without over-saturation.
6. Compared before and after results to ensure natural enhancement.
