

Image Compositing Project

Image Compositing Process Explanation

1. Selected a background image and a subject image for the composition.(campfire and bird)
2. Removed the background of the subject using the Select Subject and Mask tools.
3. Placed the subject into the background and adjusted size and position.
4. Matched colors and lighting using adjustment layers like Brightness, Contrast, and Color Balance.
5. Applied blending techniques such as shadows, blur, and blending modes to make the composition realistic.
6. Added final enhancements and exported the image.
