GRAPHIC DESIGN

Magazine cover in Photoshop

Did you know?

The word magazine originates from Arabic “makhazin” and means storehouse.

Storehouse = storing information in one place

Lesson Objectives

- Introduce basic photography
- Explore lighting and angle
- Understand captivating moments
- Demonstrate how to create a magazine cover

Lesson 5 Challenge Feedback

- Conceptualise & create a greeting card

Basic Photography

Basic Photography

Most important factors:

- Lighting
- Angle
- Captivating moment

Very few images are excellent quality (maybe 1 in 100)

Lighting

- Don’t use your smart phone’s flash
- Indoors: use window light
- Outdoors: wait for the golden hour (if possible)
- Cloudy: any time during day but watch for lack of detail in your model’s eyes

Angle

- View your subject from other angles other than the standard human height position
- Eliminate a distracting background
- Zoom in on your subject
- Optically zoom rather than use your camera’s zoom function (unless it has optical zoom)

Captivating Moments

- Look for emotion in your photograph
- Create a captivating moment by considering your surroundings
- Add this moment by considering different angles
