Working with Text and Shape Layers

Logo Creation

You have been tasked to retouch an image cosmetically.

Open a New Document in Photoshop > use a range of Shapes and Text tools

Remember logos should work Black & White and colour comes second

Want to get ahead?

Shortcuts:

- Transform Options – Ctrl & T

Notes:

- Right click will offer all of the transform options for a speedy selection.
- Puppet Warp, Perspective Warp and Content Aware Scale are all found under the edit menu.
