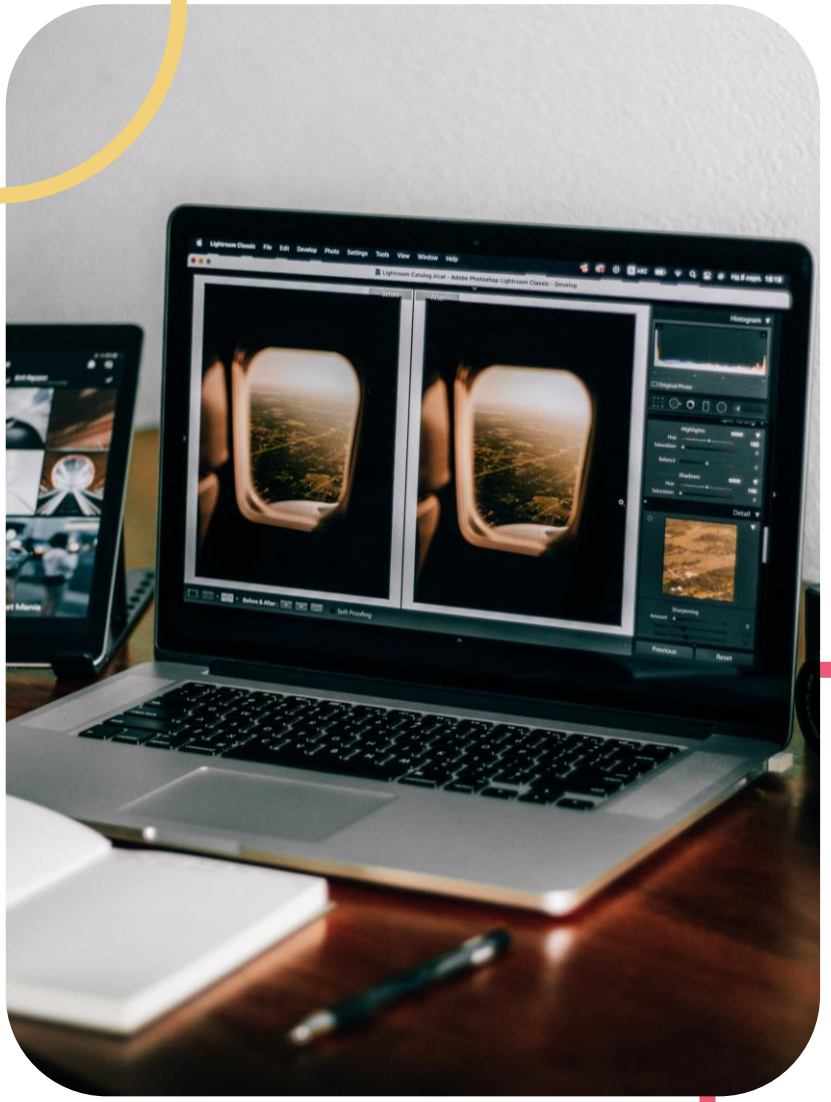
Diploma in

Lightroom

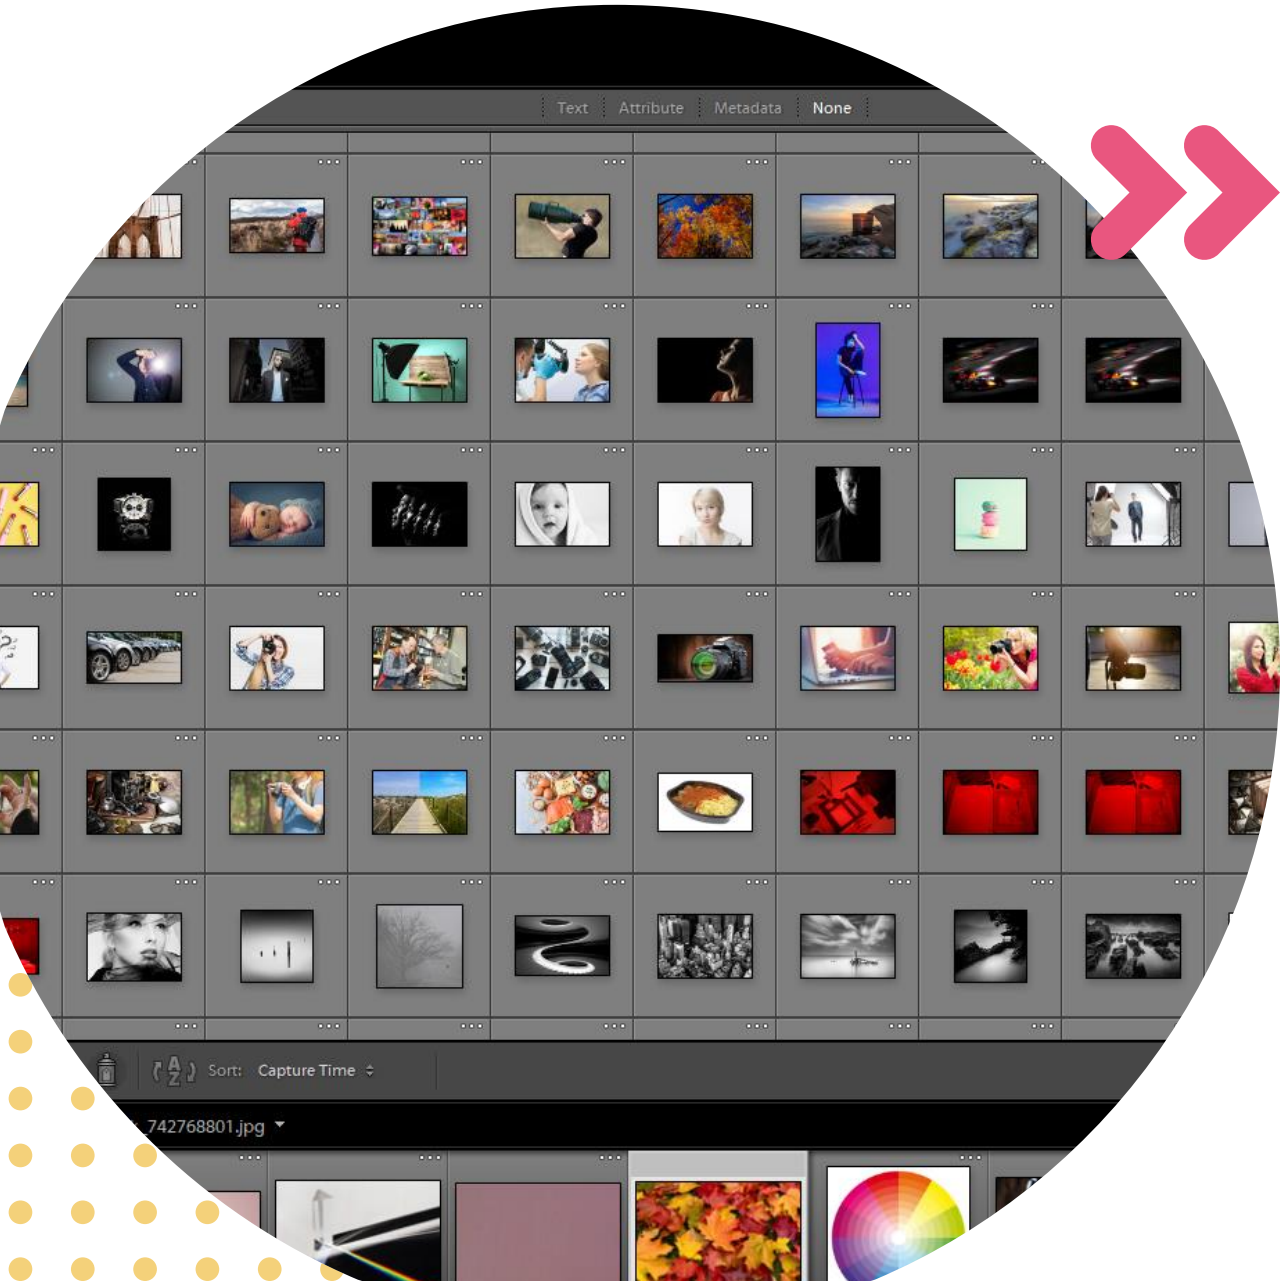
Getting organised



Objectives

- What version of Lightroom are you using
- Lightroom overview
- Importing photos
- The library

What is Lightroom?



Lightroom

- Lightroom is designed specifically for photographers
- A DAM program primarily
- Used to organise photos and video
- Used to edit RAW, jpg and other photo file types
- Extensive photo editing options available
- More limited options in App version
- Used to create photobooks
- Fully compatible with PS and many plugins available
- Can sync up with mobile devices
- Works via Catalogue system – a safe way of working on your files

What version should you use?

Lightroom

- Cloud based version
- Streamlined
- Less options
- Great for phones and tablets

Lightroom Classic

- Desktop version
- Much more options
- Faster
- Storage from multiple sources
