GRAPHIC DESIGN

Creative Thinking: Is Everyone Creative?

Challenge

**Have your pen/pencil &
scrap paper ready...**

Did you know?

Creative ideas are more likely to appear when you are not focusing on the task at hand.

**At 3 am in the morning
& in the shower!**

Educator

“Creativity is paradoxical.

**To create, a person must have knowledge but forget the
knowledge, must see unexpected connections in things
but not have a mental disorder...”**

**“...must work hard but spend time doing nothing as
information incubates, must create many ideas yet
most of them are useless...”**

“...must look at the same thing as everyone else, yet see something different, must desire success but embrace failure, must be persistent but not stubborn, and must listen to experts but know how to disregard them.”

Michael Michalko

Challenge

**Have your pen/pencil &
scrap paper ready...**

Draw an alien...

Creativity

What does the concept of
creativity mean to you?

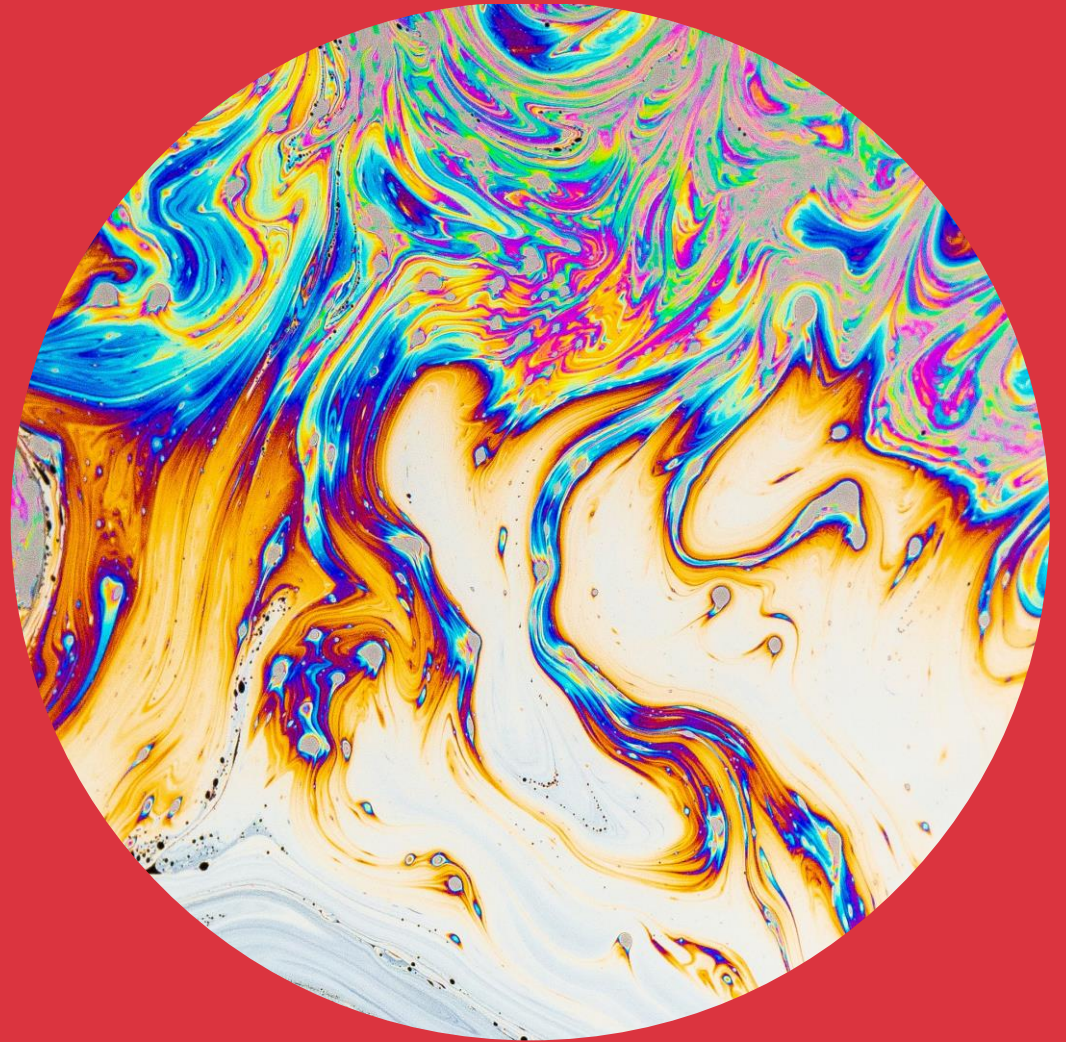

What does it mean to
think outside of the box?

What is creativity?

“The ability to produce or use *original* or *unusual* ideas.”

All creative ideas & inventions started with solving a *problem*.

**Creativity is a process
that can be learnt.**

**Don't tell yourself you're
not a creative person.**

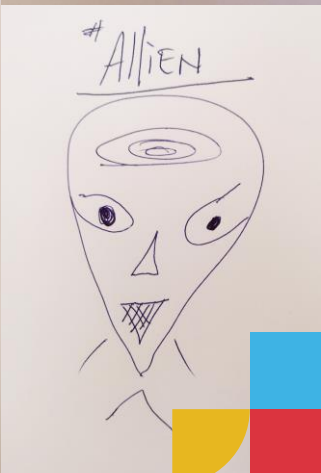

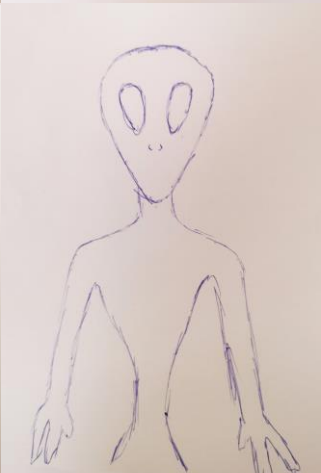

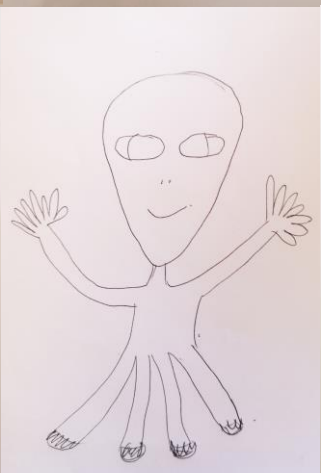

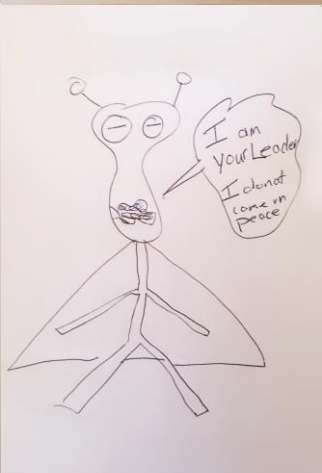

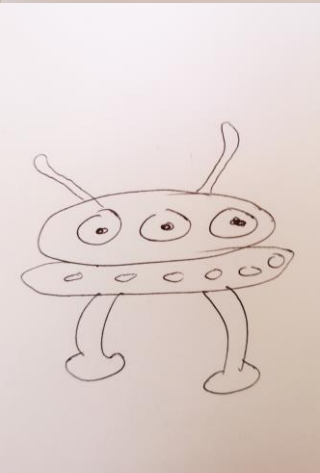

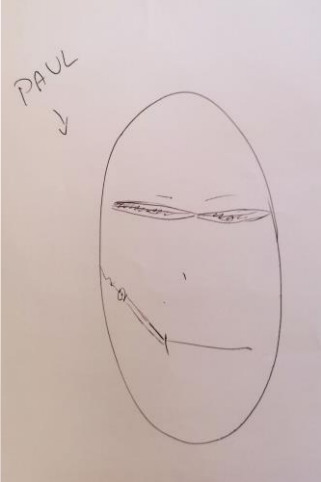

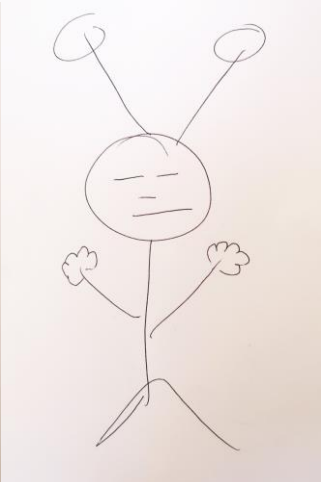

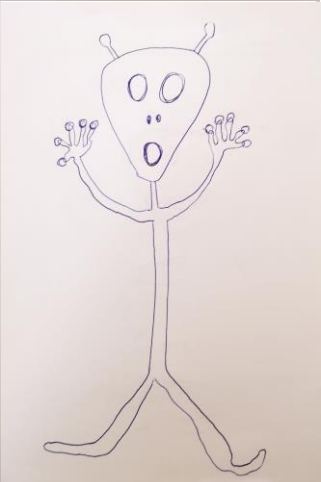

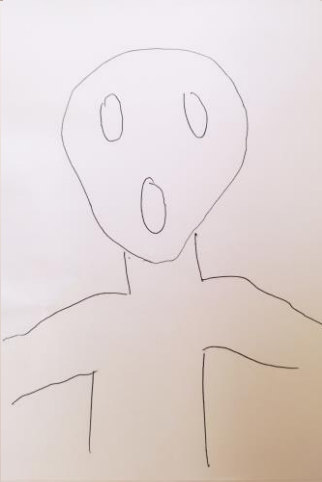

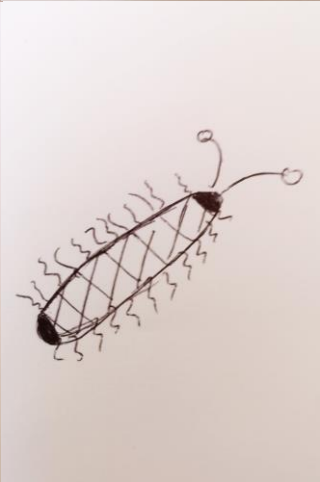

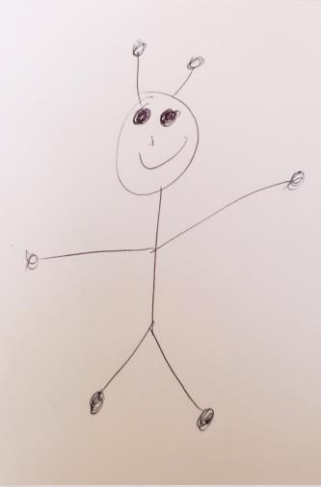

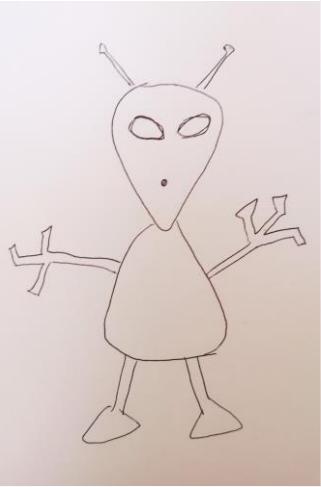

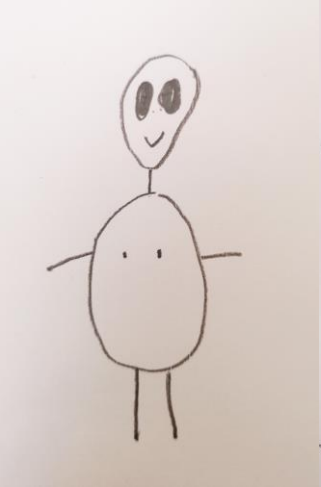

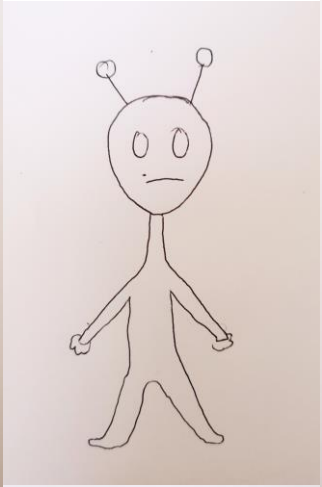

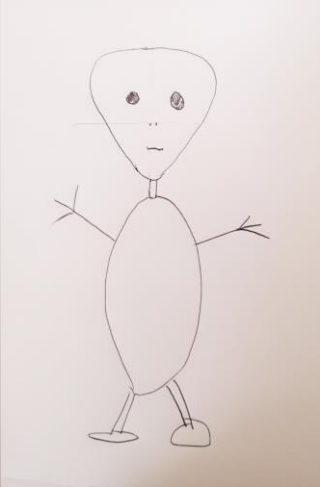

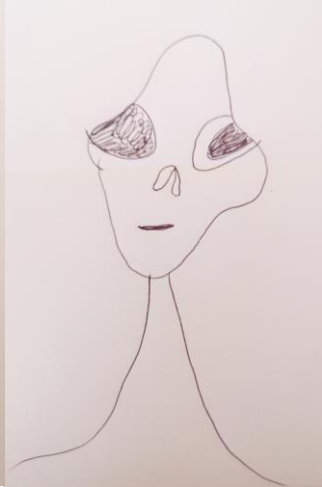

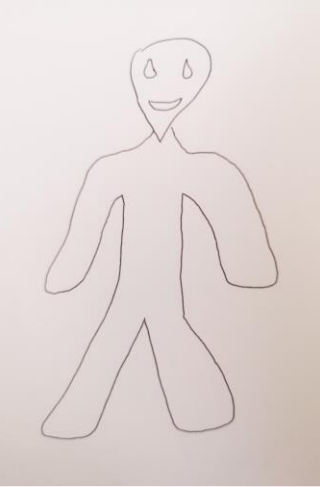

Challenge

Draw an alien...

Considering that most of us have never seen an alien, what does your alien look like?

Structured Imagination

The background of the image is an abstract composition of several overlapping, diagonal bands of color. From top-left to bottom-right, the colors transition through a spectrum: a dark teal/blue at the top left, followed by a lighter blue, then a greenish-blue, a yellowish-green, a bright yellow, an orange, and finally a deep red at the bottom right. The bands are separated by thin, slightly irregular white lines, giving the impression of layered paper or a textured surface. The overall effect is a vibrant, multi-colored geometric pattern.

Structured Imagination

The tendency to rely on your
existing knowledge to be creative.

How do we stimulate creativity?

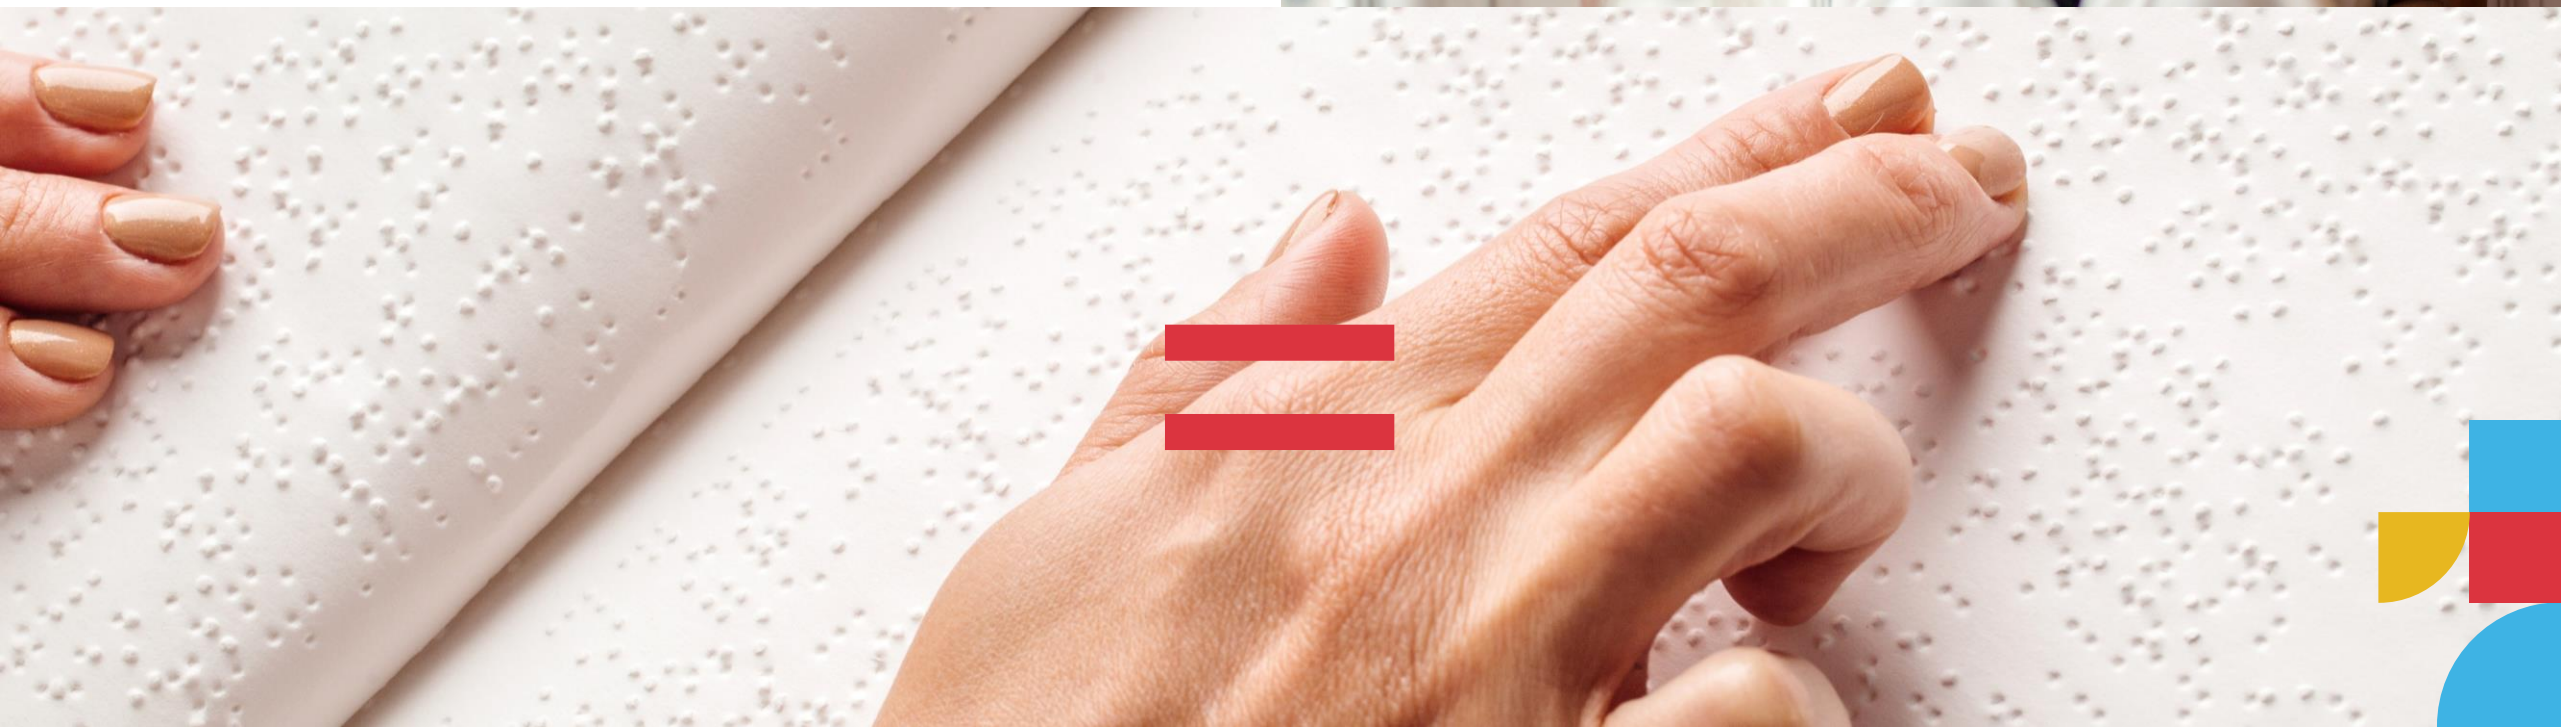

Conceptual Blending

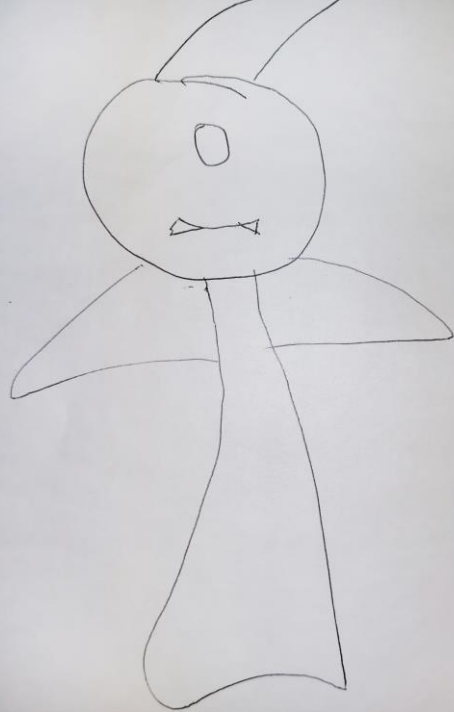

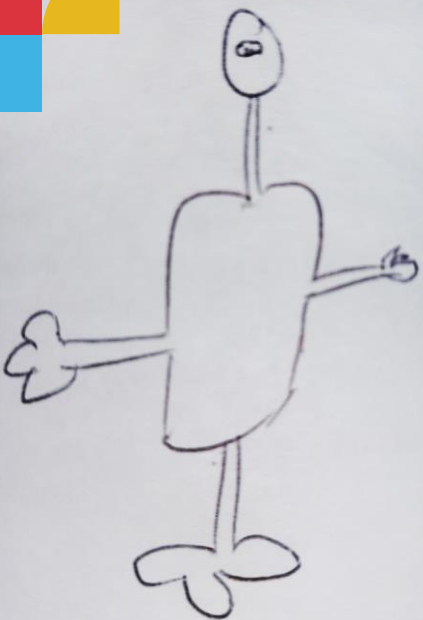

The background of the slide is an abstract composition of overlapping geometric shapes. A large blue shape occupies the upper left. A large orange shape is on the right. A large green shape is in the lower left. A red shape is in the bottom right corner. The shapes overlap, creating a sense of depth and blending.

Conceptual Blending

Combine existing unrelated
concepts to form novel ideas.

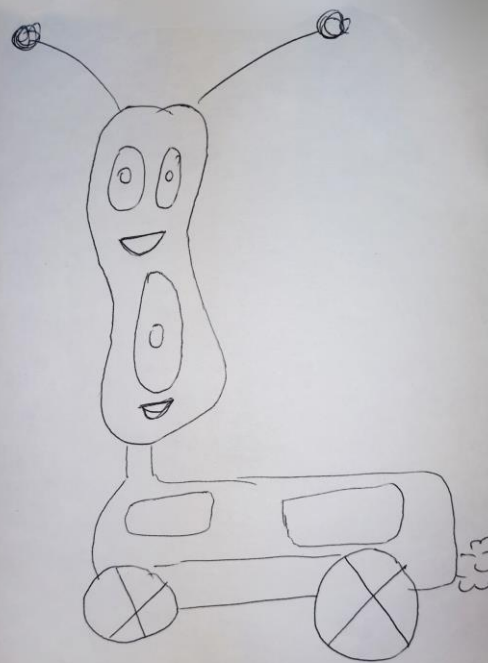

Pinecone + Reading = Braille

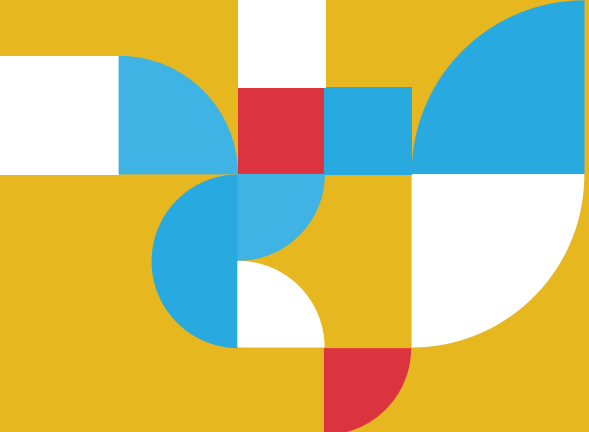

Make up
Brush
Lady

She slides
around

Who said we aren't
slies?

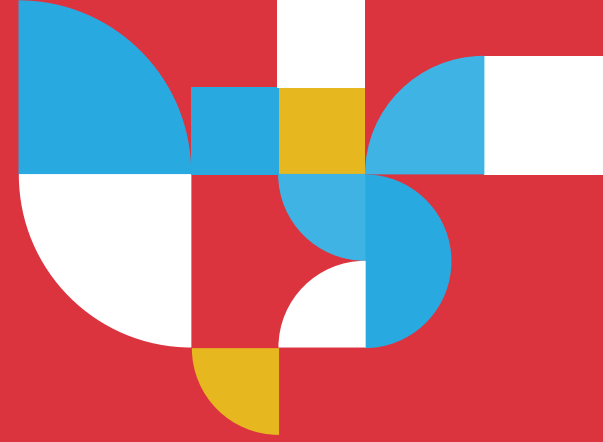

To come up with an
original idea, you don't
have to be *first*, you just
have to be *different* &
better.

Adam Grant

Slow-motion multitasking relates to conceptual blending

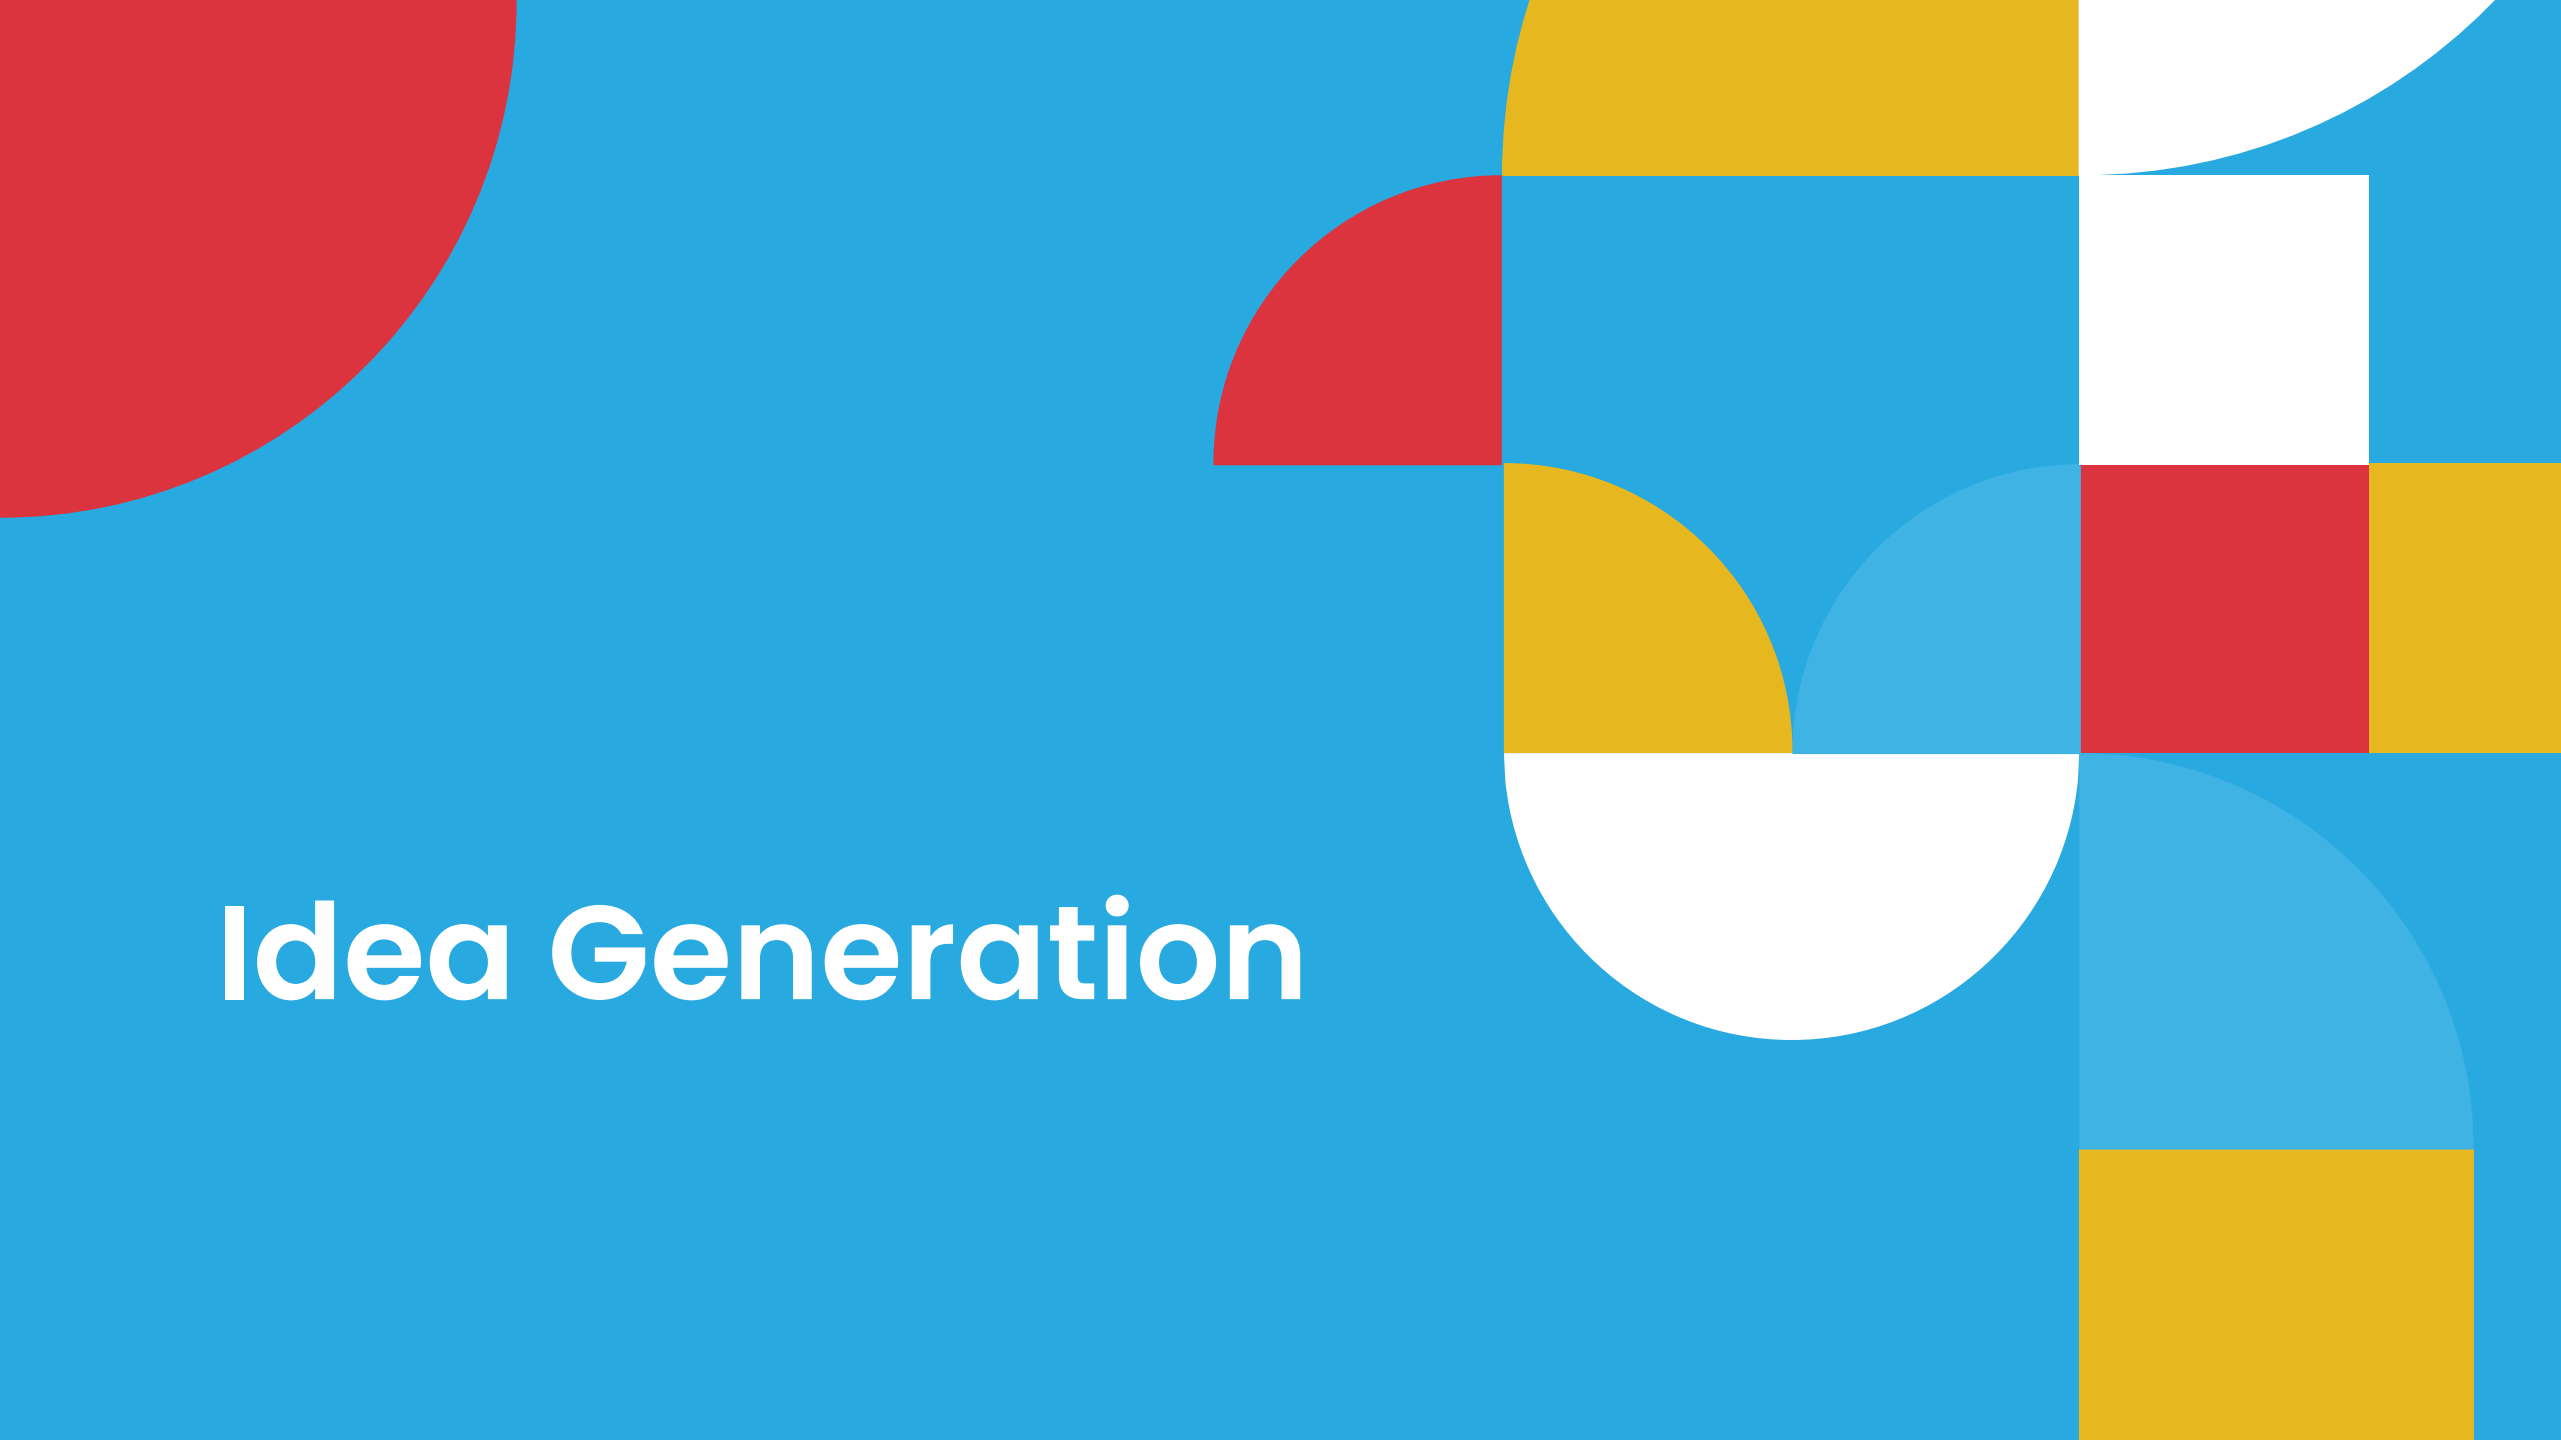

Leonardo da Vinci, Albert Einstein, Isaac Newton, Beethoven, & Picasso applied slow-motion multitasking.

Understanding the incubation effect

- Divert your attention away from the given
- Distract yourself by doing something else
- Don't focus too much on the problem

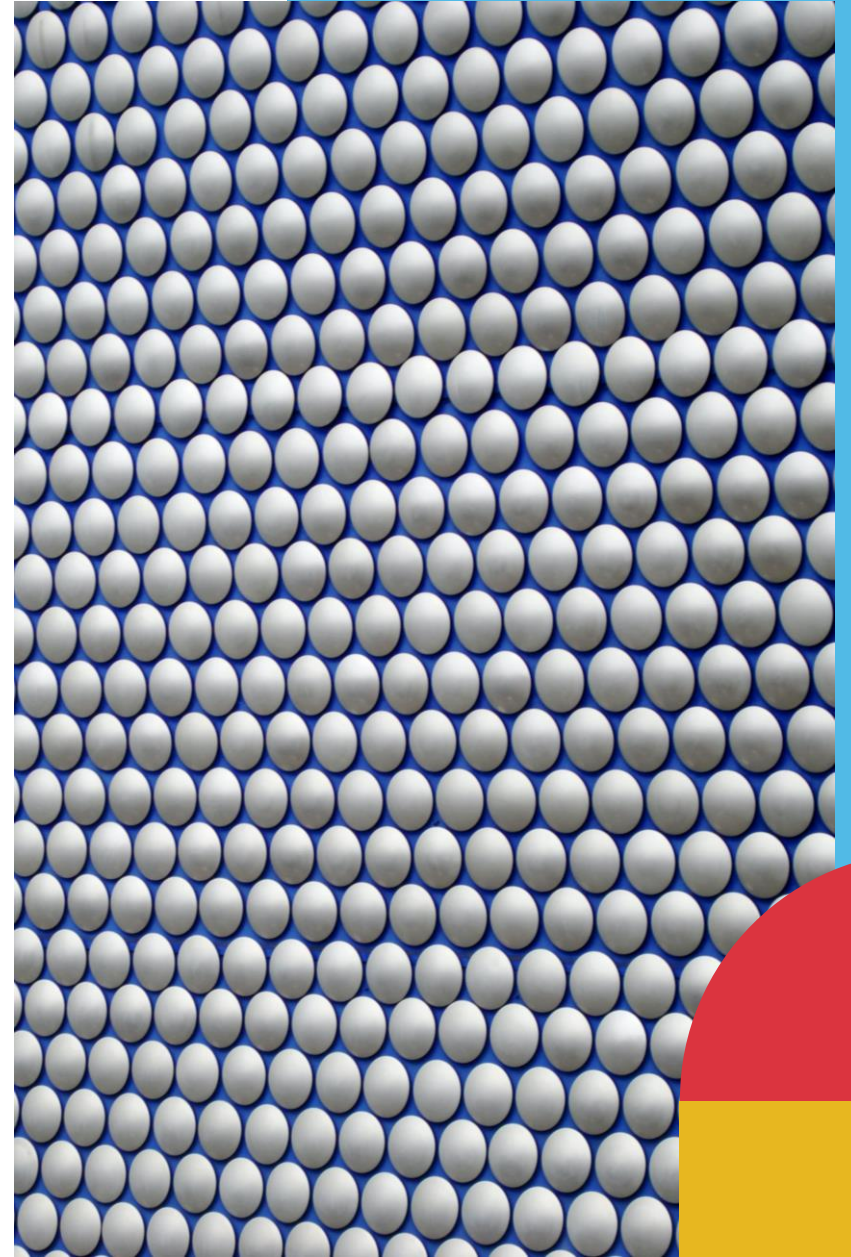

The background is a solid blue color. On the right side, there is a complex geometric pattern composed of various shapes: a large red semi-circle in the top left corner, a yellow semi-circle in the top right, a white semi-circle in the bottom right, and several smaller squares and rectangles in blue, red, and yellow. The text "Idea Generation" is written in a white, sans-serif font on the left side of the image.

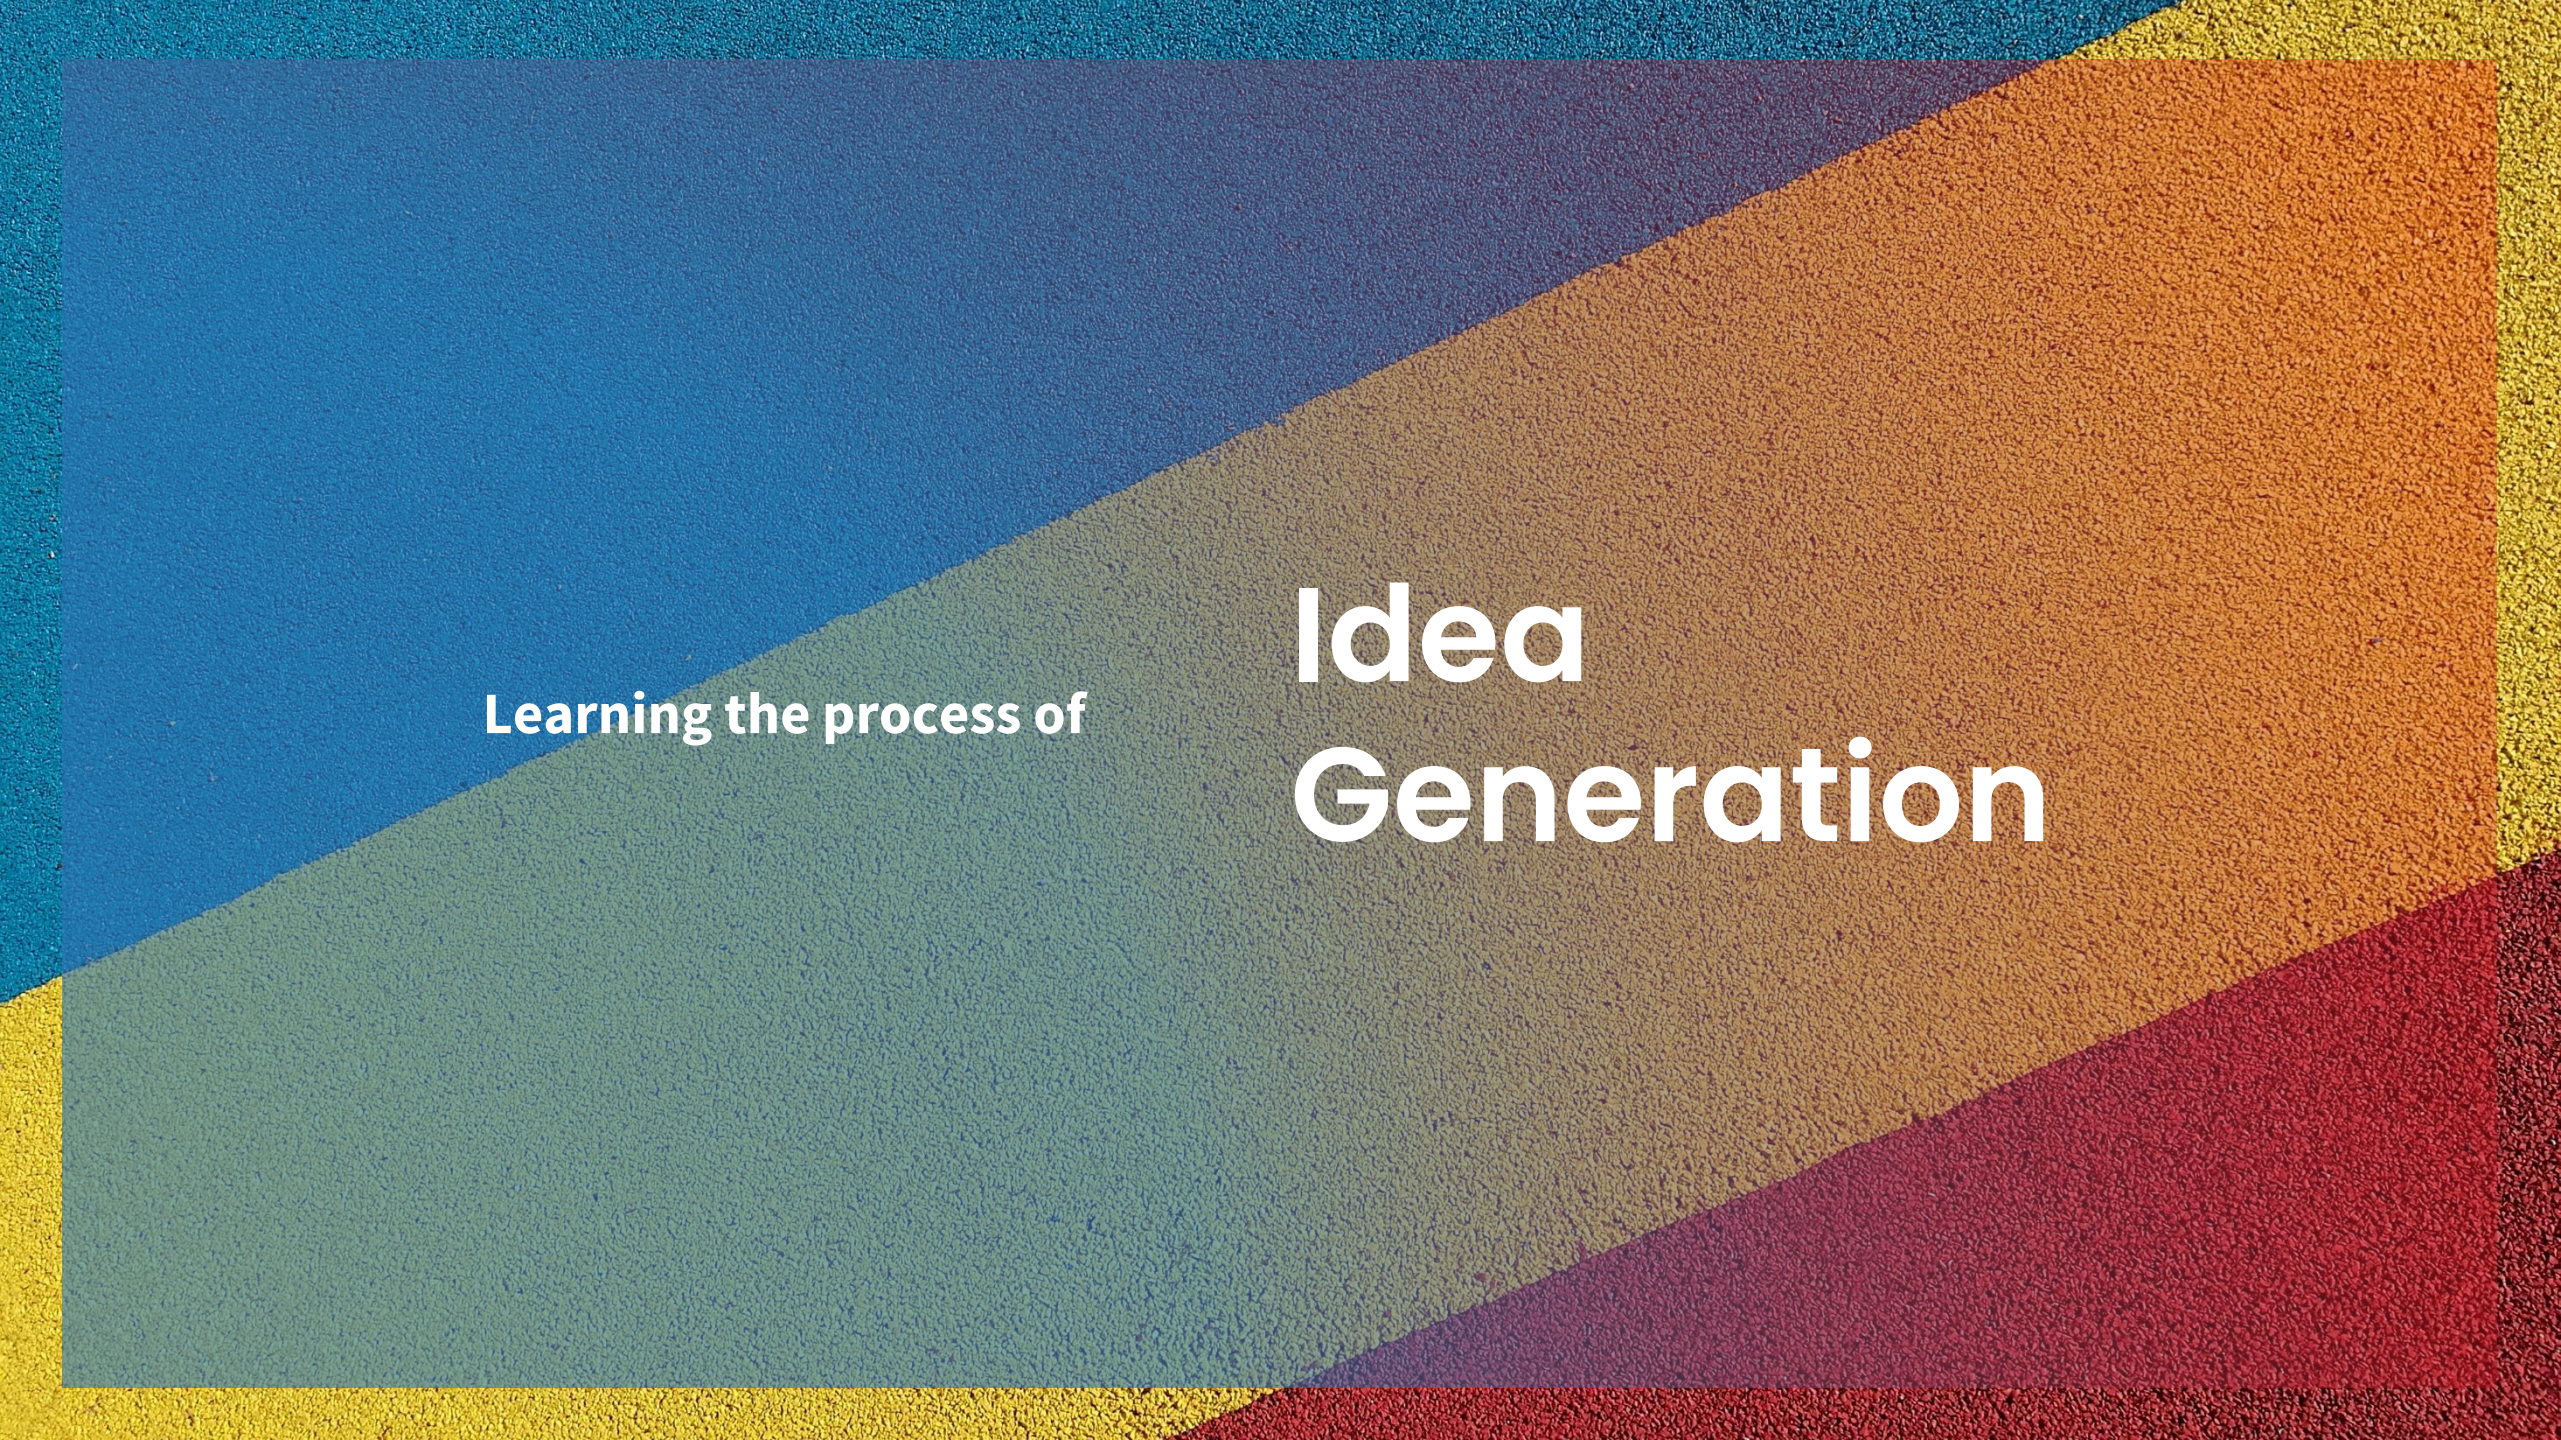

Idea Generation

Idea generation in graphic design

- Cultivate by practicing creative thinking techniques
- The aim: A problem that needs to be solved
- Effective visual communication starts with ideation

Idea Generation

**You won't feel like a genius
because it is a methodical process**

Learning the process of

Idea Generation

You won't feel like a genius
because it is a methodical process

**Take to heart that you will always be
influenced by other concepts**

Learning the process of

Idea Generation

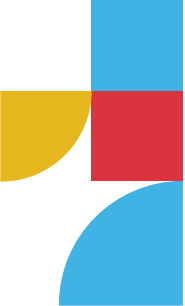

You won't feel like a genius
because it is a methodical process

Take to heart that you will always be
influenced by other concepts

Where do we get our ideas from?

A yellow pencil is positioned vertically on the right side of a blue background. A yellow triangle is drawn on the left side, with its rightmost vertex pointing towards the pencil tip. The triangle's base is on the left edge, and its height is defined by the pencil's position. The background is a solid blue color, with a yellow vertical bar on the far left and a yellow vertical bar on the far right. A large red semi-circle is visible in the top right corner.

Where do ideas come from?

- Pinterest
 - Literature
 - Brainstorming
 - Protobot.org
 - External input
 - Research
 - Social Media
- 
- A decorative graphic in the bottom right corner consisting of several overlapping geometric shapes: a blue square, a red square, a yellow square, and a blue semi-circle.

Steer clear of **Clichés**

Steer clear of **Clichés**

Why you should avoid them

- Cliché: An unoriginal overused idea
- Seems appealing because they 're familiar
- Nothing wrong with them, they're just not special
- Clients like clichés , so educate them
- Easy to consume with no nutritional value

Steer clear of **Clichés**

How to avoid them

- State your message via a visual riddle
- Keep in mind that it takes time
- Draw/write down associated ideas
- Let clichés happen to get it out of your system
- Use a sketchpad or notebook initially

The background is a solid blue color. On the right side, there is a complex geometric pattern composed of various shapes: a large red semi-circle in the top left, a yellow semi-circle in the top right, a white semi-circle in the bottom right, and several smaller squares and rectangles in blue, red, and yellow. The text 'Personal Identity' is written in a white, sans-serif font on the left side of the image.

Personal Identity

Create your personal identity

To see what is in front of one's
nose needs a constant struggle.

George Orwell

The background features abstract geometric shapes in red, yellow, and blue. On the left, a large red semi-circle is partially visible. On the right, there is a complex arrangement of overlapping semi-circles and squares in yellow and blue, creating a dynamic, modern look.

Coming up next...

What is a corporate identity?

Creating a personal identity

Creating mock-ups & assets

The background features several large, overlapping geometric shapes. In the top left, a large red semi-circle is partially visible. To its right, a yellow semi-circle and a blue semi-circle overlap. Below these, a red semi-circle and a yellow semi-circle overlap. Further right, a blue semi-circle and a yellow semi-circle overlap. In the bottom right, a large blue semi-circle and a yellow semi-circle overlap. The overall design is modern and colorful.

CONGRATULATIONS

For completing your lesson!
