GRAPHIC
DESIGN

Lesson Objectives

- Introduce colour space
- Prepare print-ready files
- Explore Adobe InDesign interface
- Demonstrate how to create a business card

Lesson 6 Challenge Feedback

- Create your own Photoshop movie poster using any of the following themes:
- Sci-fi, horror, fantasy or action

What is the difference between 72ppi & 300ppi

A PPI stands for position per image and links to the resolution of an image

B 300ppi is used for printing artwork and 72ppi is for digital purposes

C 72ppi is used for printing artwork and 300ppi is for digital purposes

D 72ppi is low resolution and 300ppi is high resolution

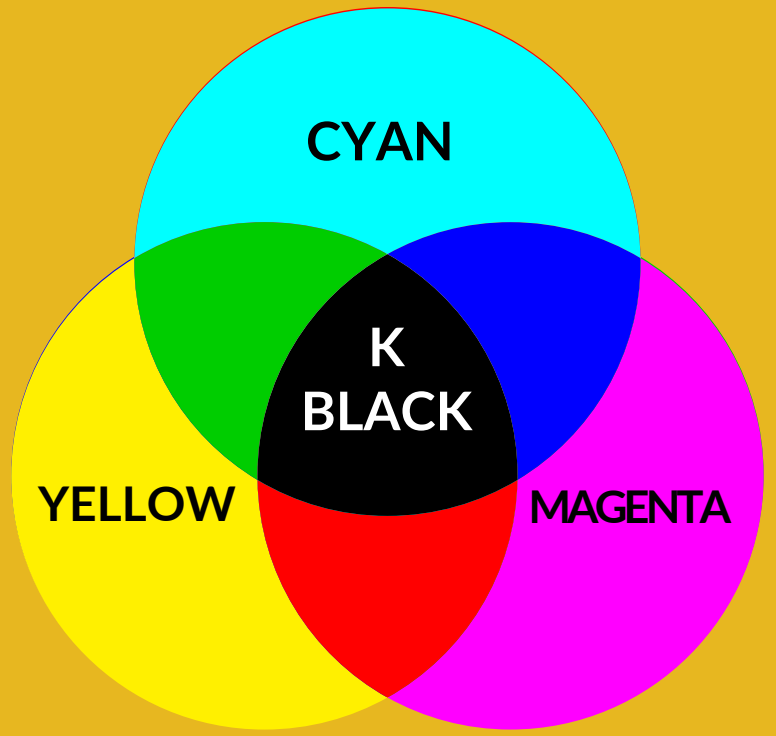
Colour Space

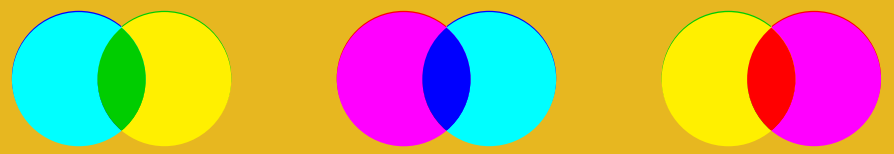
Colour Space

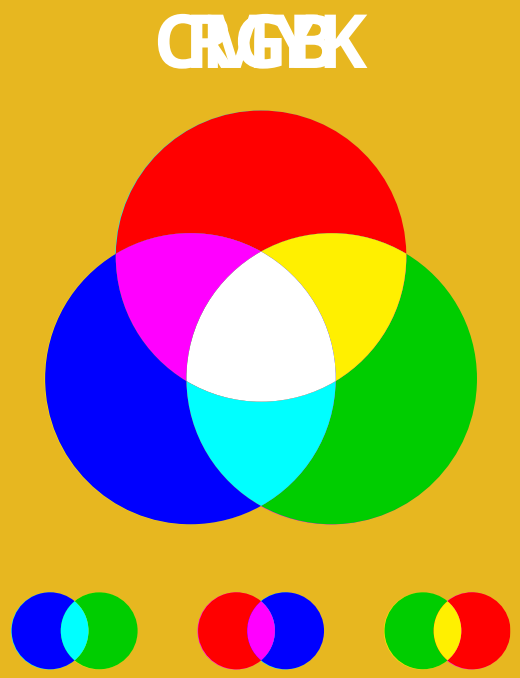
Colour space refers to the colour mode an artwork is produced in

72ppi = digital = RGB
Red, green, blue

300ppi = print = CMYK
Cyan, magenta, yellow, black







Colour Space

What if you print your file in RGB colour space?

How do you change your colour space?

Prepare Print-ready Files

Print-ready

Bleed: design exceeds the printed area to avoid non-printed areas

Bleed is 3mm or 1/16”

Cutline: indicates the printed area

Cropmarks: Black lines indicating where the page will be trimmed

Margins: The safe area for designs that should not be cut off

InDesign demo

- Saving your file as print-ready in Illustrator
- Bleed
- Crop marks
- Create outlines

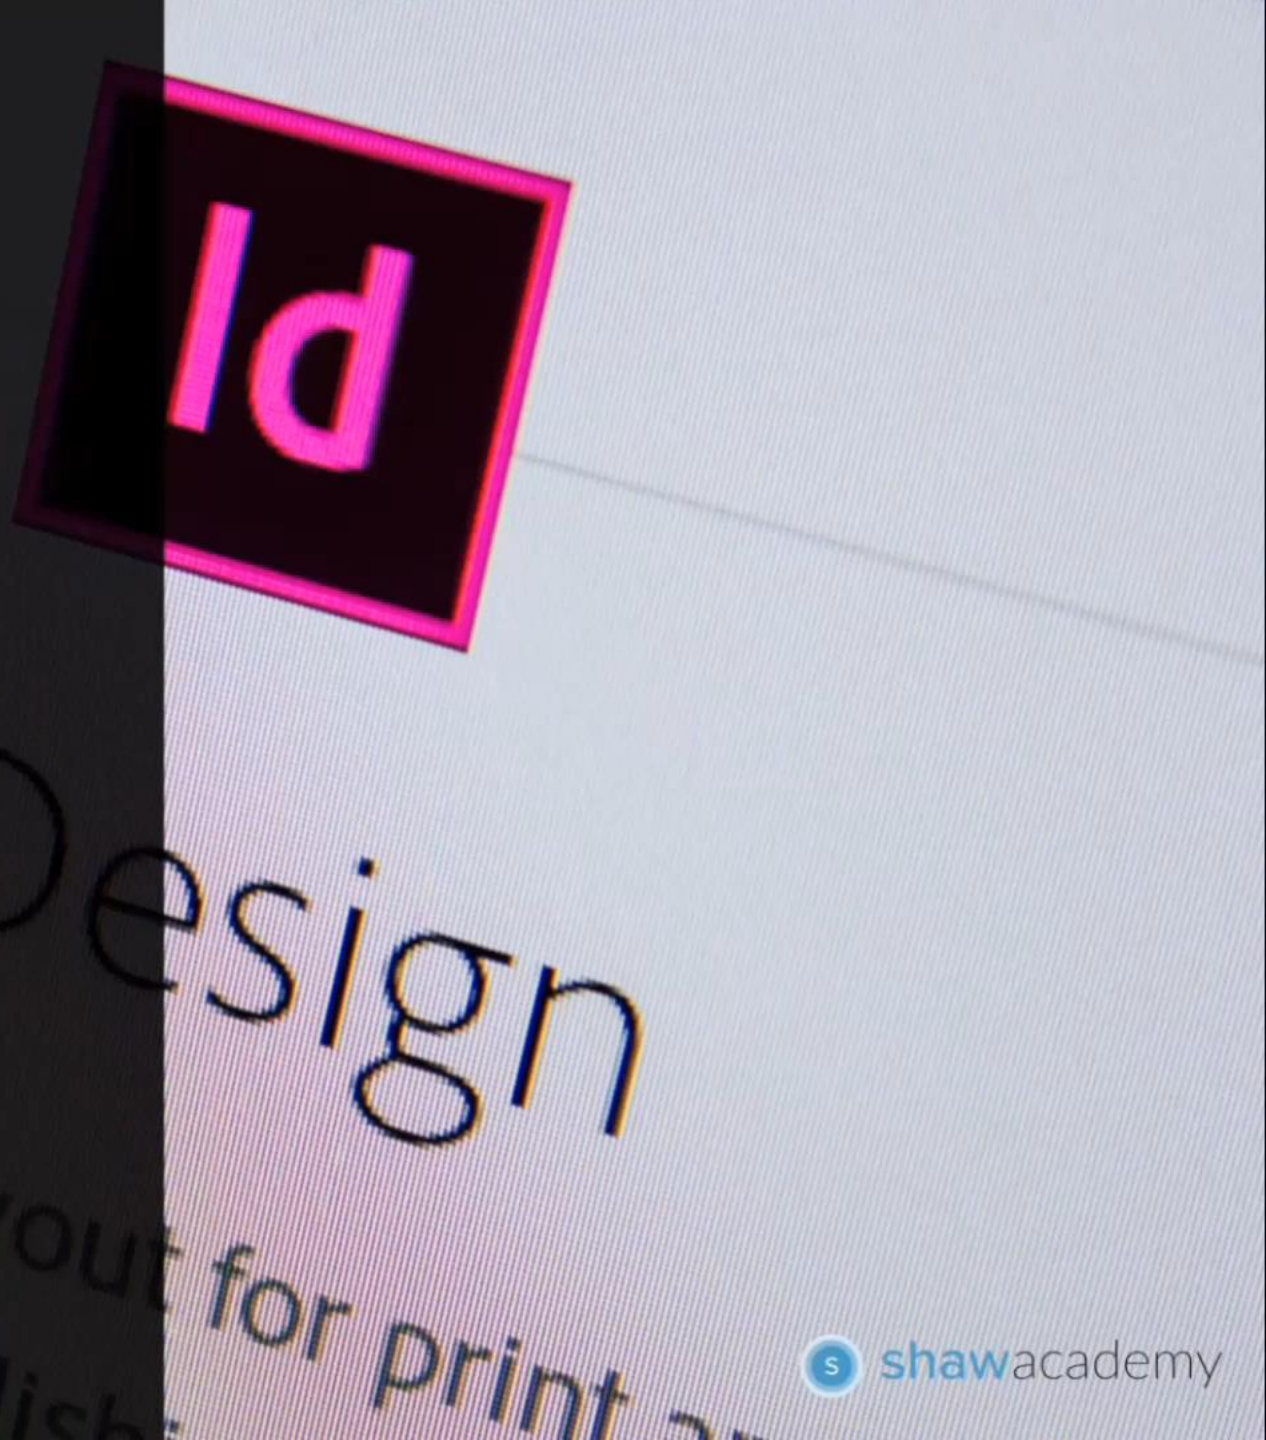
Where and how to download images legally

Brochure design

Creating and using columns



shawacademy

Did you know?

Design is addictive

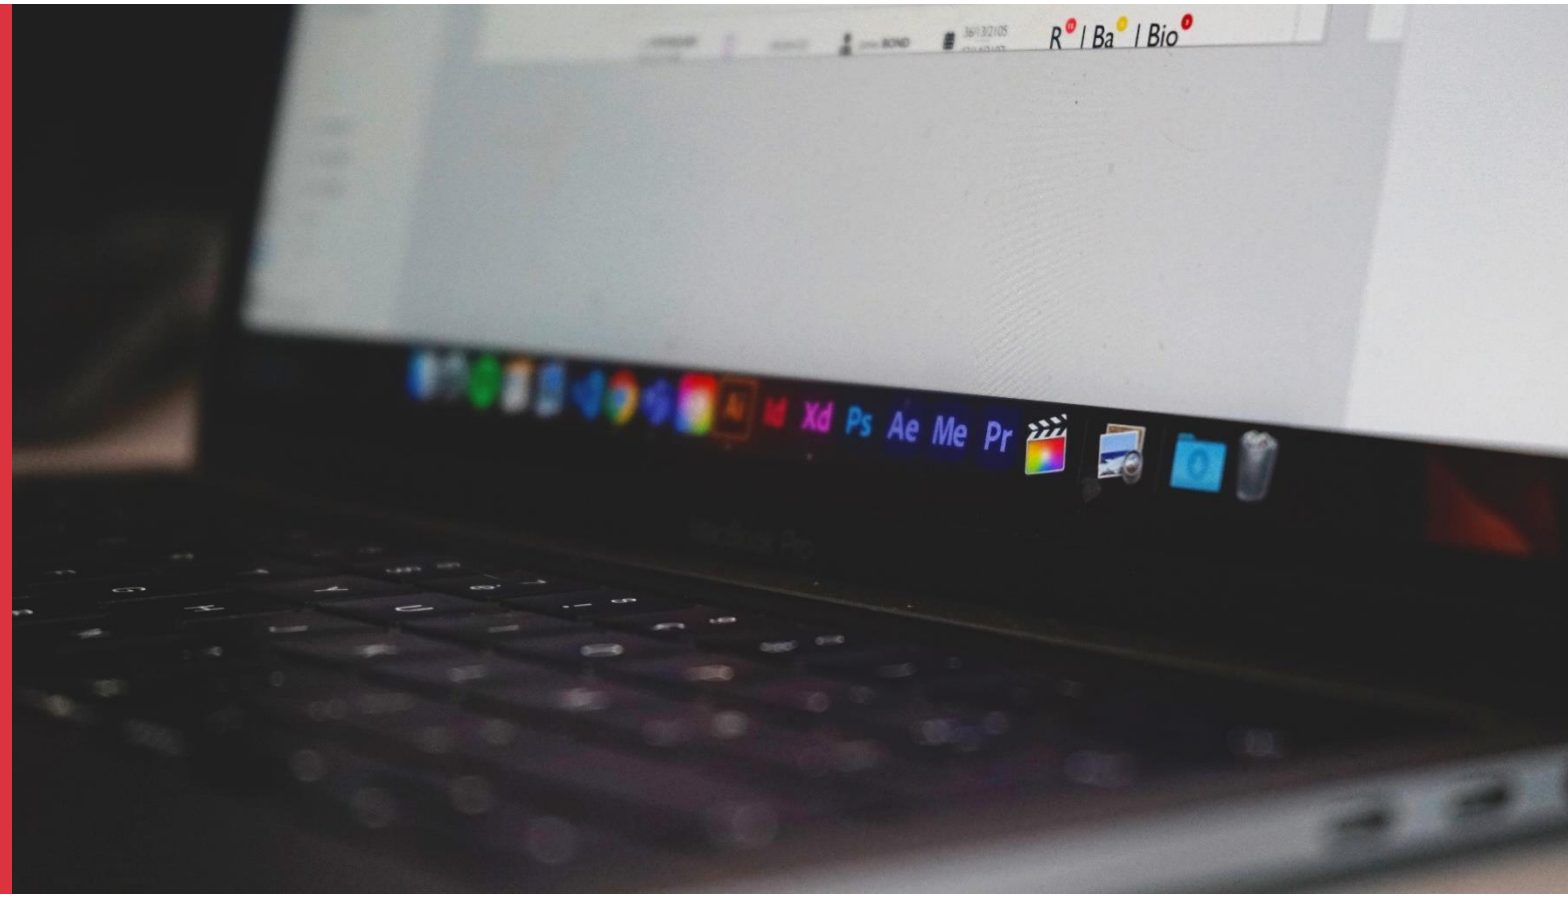
Designers will keep designing even in their free time

Design improves your creativity

Demo:
Adobe InDesign

InDesign demo

- Interface
- InDesign basics – create a business card for Fred’s coffeeshop
- 3,5” x 2”
- Or 90mm x 50mm
- Add bleed



Challenge

- Learn the process of getting your artwork print-ready in Photoshop, Illustrator and InDesign

CONGRATULATIONS

FOR COMPLETING YOUR LESSON!
