IS PHOTOSHOP CHEATING?

Lesson 2

Adjustments

Start making changes

Enhancing With Adjustments

Control

Our goal for the end of this lesson is to allow you to understand and control how you enhance your images. We will cover Destructive Adjustments, guiding your understanding of the Pixel. We have two categories of Adjustments we will look at, Tonal and Colour.

THE PIXEL

The Pixel

Enhancing Images with Adjustments

The Pixel

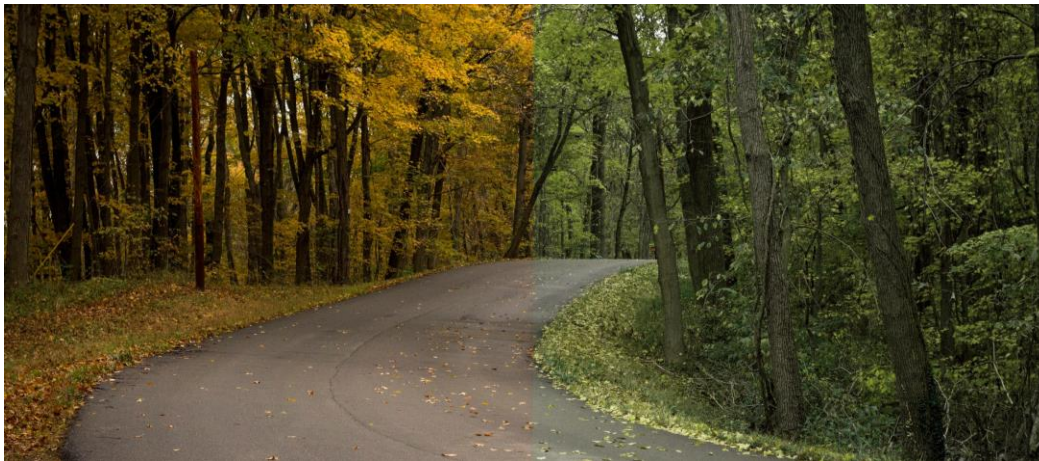

What are Adjustments?

Adjustments are used to ENHANCE your images.

Adjustments effect Tonal (Black & White) and Colour on your image.

Adjustments can be applied destructively & non-destructively.

Each Adjustment comes with its own sliders and options like the Toolbar.

Full Control

We can alter everything from the shadow of an images to be darker or lighter to complete colour control, changing our enhancing to be more vibrant or even duller.

Which of the following photos are 'photoshopped'?

A

B

C

D

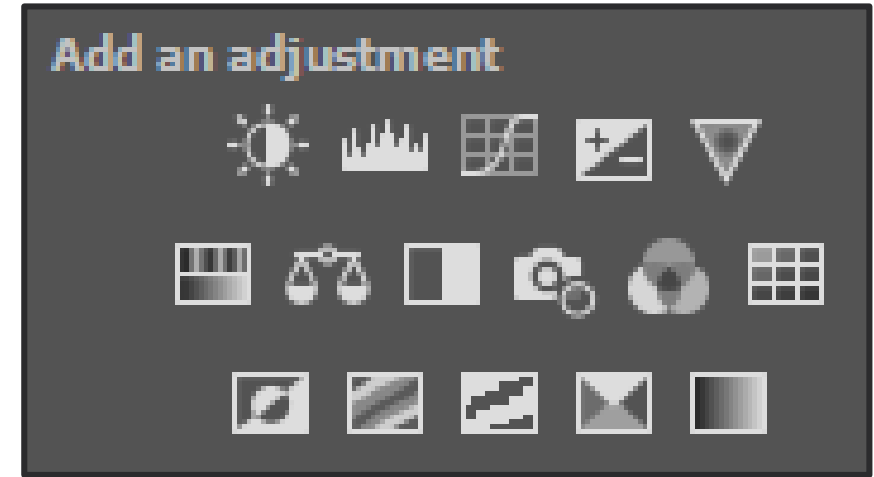

TONAL ADJUSTMENTS

A person with long, curly brown hair, seen from behind, standing in a forest with autumn foliage. Their arms are outstretched to the sides. The text "TONAL ADJUSTMENTS" is overlaid in large white letters.

Adjustments

- Brightness & Contrast
- Levels
- Curves
- Exposure
- Vibrance
- Hue/Saturation
- Colour Balance
- Black & White
- Photo Mixer
- Channel Mixer
- Colour Lookup
- Invert
- Posterize
- Threshold

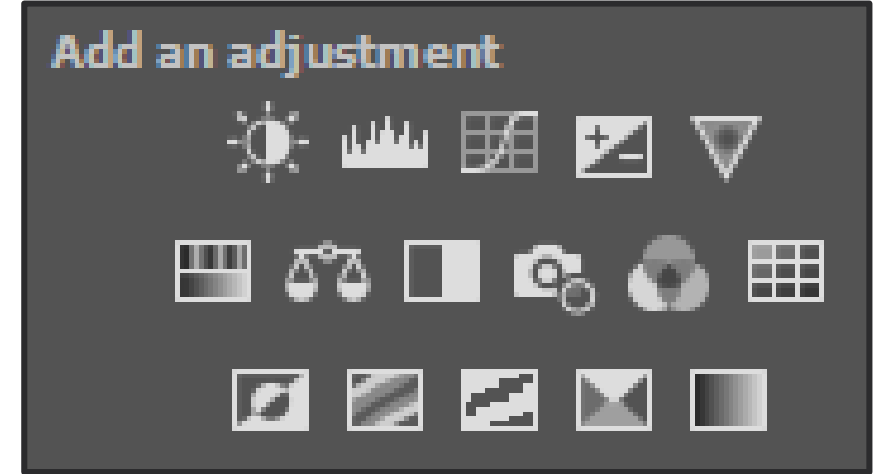

- Selective Colour
- Gradient

Adjustments

Tonal Adjustments

Tonal Adjustments can be applied to any image, Black & White and Colour

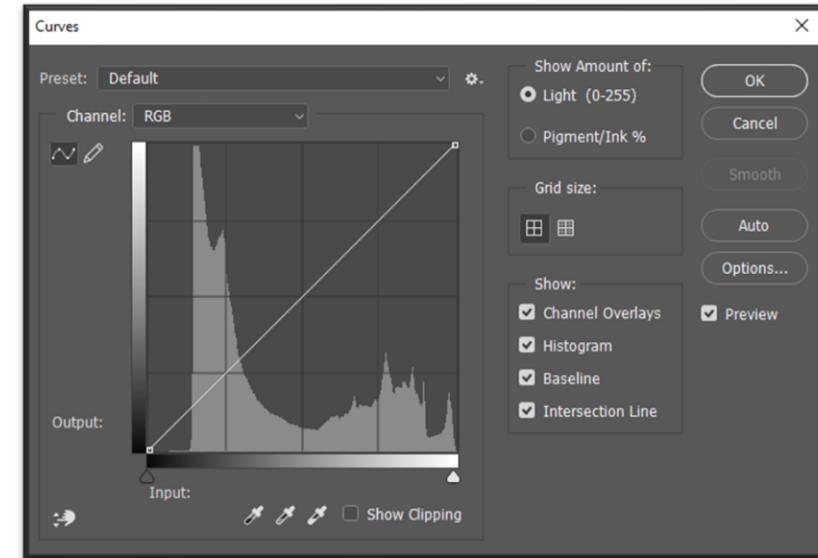

Brightness & Contrast

Levels

Curves

Brightness & Contrast

Brightness

This refers to the overall lightness or darkness. We will change entire image pixels

Contrast

This refers to the difference in brightness between objects in the image

Legacy

This option refers to images edited in older versions of photoshop. Can still be used if you prefer

OK/Cancel

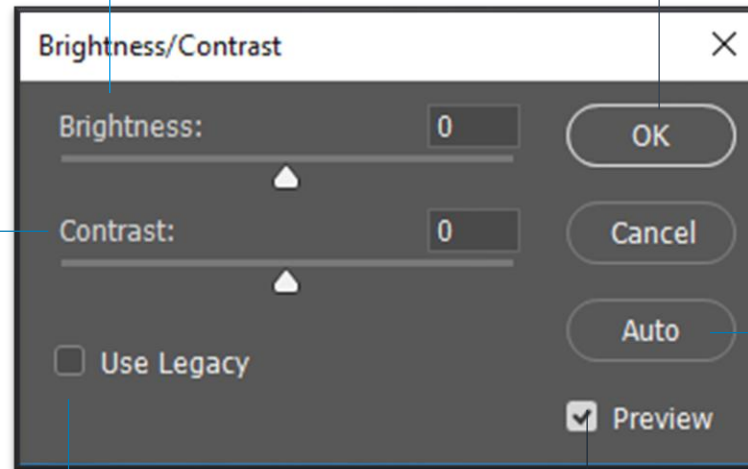

Accept or Cancel adjustments made

Auto

Allow Photoshop to make Adjustments for you

Preview

Allow the image to be edited in real-time so we can preview our enhancements

Levels

Preset

Default tonal adjustments built in. You can also create custom sets

OK/Cancel

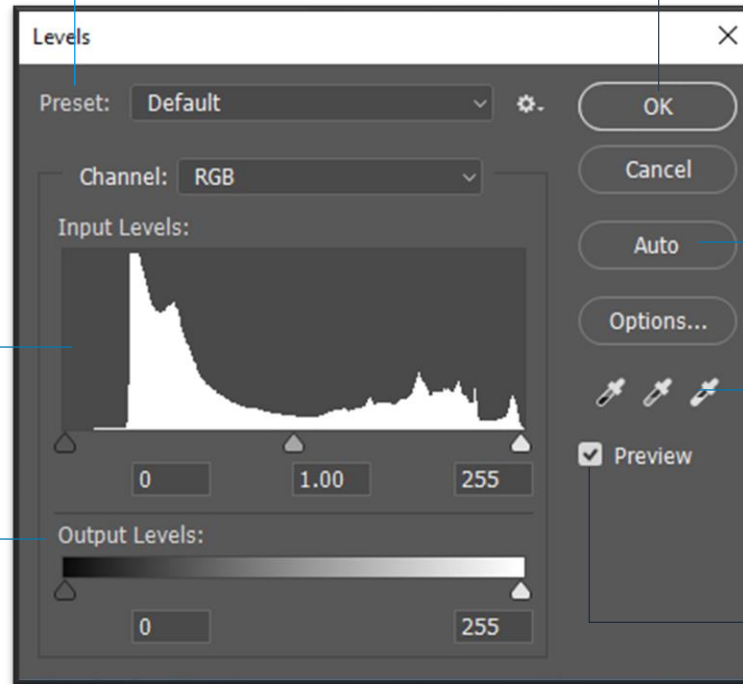

Accept or Cancel adjustments made

Histogram

The histogram shows detail in the shadows, mid-tones and highlights. We edit our image based on this data

Output

This option can set a minimum Black and maximum White in an image

Auto

Allow Photoshop to make Adjustments for you

Droppers

Eye Dropper tools to set a Black, Gray and White point.

Preview

Allow the image to be edited in real-time so we can preview our enhancements

Curves

Preset

Default tonal adjustments built in. You can also create custom sets

OK/Cancel

Accept or Cancel adjustments made

Histogram

The histogram shows detail in the shadows, mid-tones and highlights. We edit our image based on this data

Hand Icon

This will allow you to choose a specific part of the image to set a value

Droppers

Eye Dropper tools to set a Black, Gray and White point.

A hand is shown holding several large, inflated balloons in various colors: yellow, green, purple, and red. The balloons are arranged in a cluster, with the hand visible at the bottom center. The background is a solid blue color. The text "COLOUR ADJUSTMENTS" is overlaid in white, bold, sans-serif capital letters.

COLOUR ADJUSTMENTS

DID

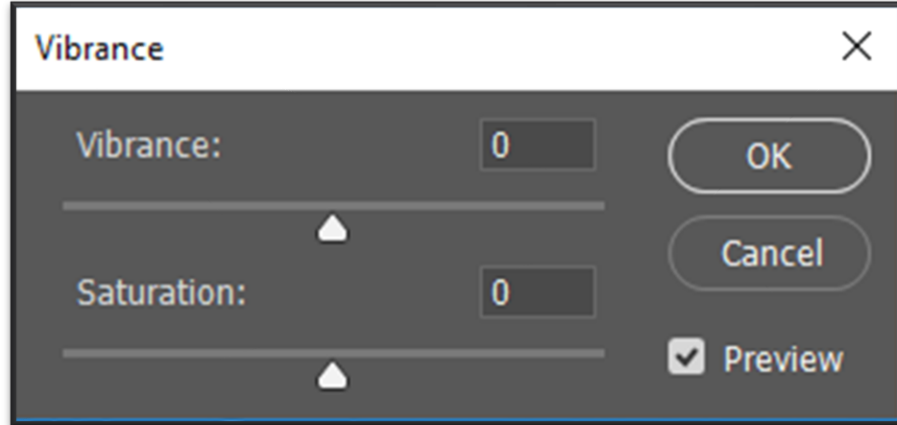

YOU KNOW?

It is possible to **colourise** Black and White photos but the process is very time consuming and getting colours correct is very difficult. **Jordan Lloyd**, whom colourised this photo of Frida Kahlo, is an expert at this.

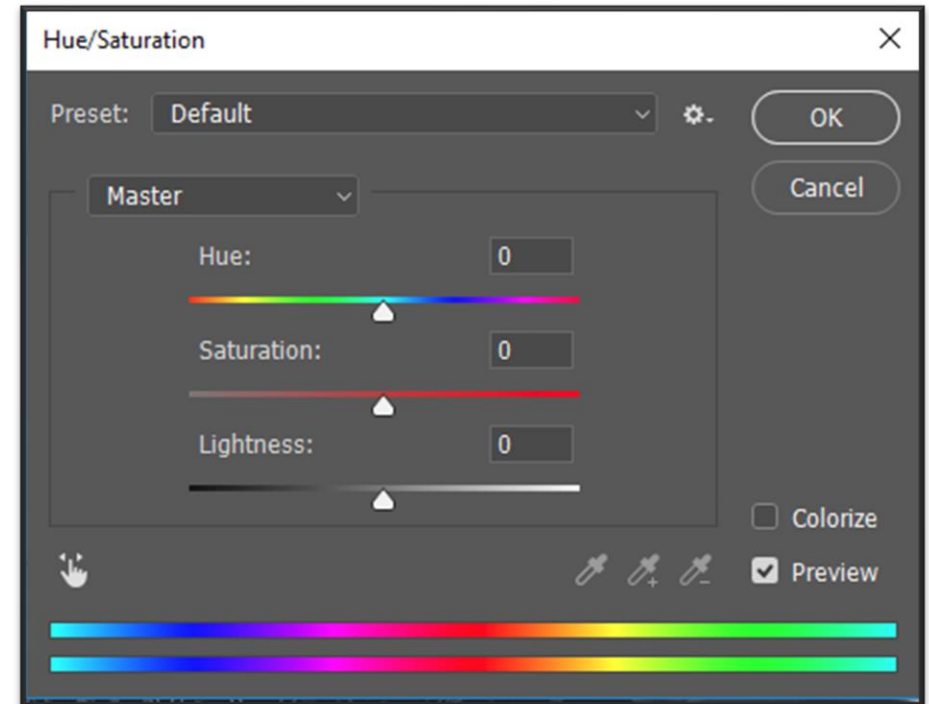

Colour Adjustments

Vibrance

Hue/Saturation

Vibrance

Vibrance

Increase or Decrease the hue/colour vibrance intensity

OK/Cancel

Accept or Cancel adjustments made

Saturation

Allow you to intensify the hue/colours of your image. Will also allow you to dull images or make Black & White

Preview

Allow the image to be edited in real-time so we can preview our enhancements

Adjustments

Hue/Saturation

Preset
Default colour adjustments built in. You can also create custom sets

Master/Colour Selector

Custom colour selector for edits

Saturation

Allow you to intensify the hue/colours of your image. Will also allow you to dull images or make Black & White

Hand

Custom colour selector for edits

Colour Wheel

Indicator to show colour replacement in edits

OK/Cancel

Accept or Cancel adjustments made

Hue

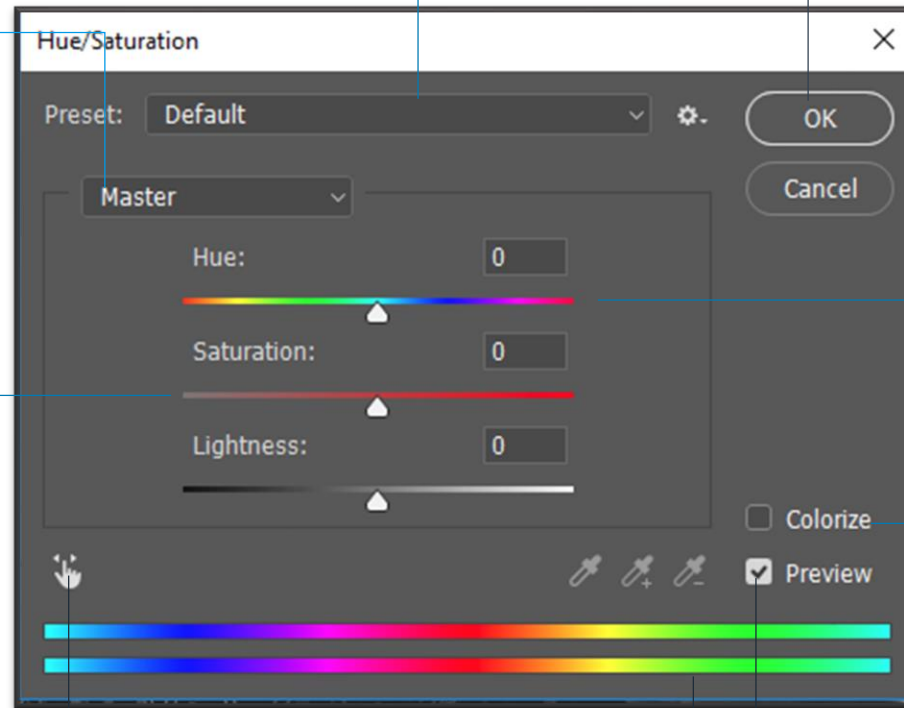

Colour Option for edits. Slider will allow you to replace colours based on colour wheel

Colorize

Applies a flat colour over the image.

Preview

Allow the image to be edited in real-time so we can preview our enhancements
