PHOTOSHOP

SUMMARY NOTES

Idea Generation

PHOTOSHOP OFFERS A LOT OF DIFFERENT OPPORTUNITIES FOR THE CAREER FOCUSED INDIVIDUAL TO THE KEEN HOBBYIST. IT IS USED IN ALL MOST EVERY JOB, SOME OF YOU MAY NOT HAVE EVEN REALISED, AND IT ALSO OFFERS A LOT OF PERSONAL BENEFITS. LESSON 8 WILL SET YOU ON THE RIGHT PATH AND WILL HELP YOU UNDERSTAND WHAT YOUR NEXT STEP WITH PHOTOSHOP CAN BE.

8.01**Idea Generation**

8.02**Ideas**

LESSON 8

IDEA GENERATION

“Healing tools are used for a number of reasons but have the power to help with cosmetic retouching, photo-restoration and removing unwanted objects”

Where do good ideas come from?

It's a question that we as designers are continuously asking ourselves, yet in the overall common perception of graphic design and Photoshoppers it can seem to be discounted, which can be curious!

In my experience, I'm reminded that, in most people's minds, the job of being a designer is mainly a matter of learning a set of computer applications, programs which, when properly operated, presumably do the work of generating ideas on their own.

Some people even go a step further suggesting some version of the Genius Theory: the idea that certain individuals are simply blessed with this special force called 'creativity' where they can magically summon remarkable visual solutions to problems where the rest of us see only a blank screen or piece of paper

Solutions do not arrive as a sudden flash of inspiration from out of the blue; rather, a good idea emerged methodically out of a sensible analysis of readily-available ideas and impressions. Good ideas are not created by magic, nor are they generated by computers — the process of developing them is a skill that can be learned, taught and practiced, and, like a muscle, gets stronger the more it is used.

IDEAS

Photographers

Photo Touch ups:

- Use healing tool for any blemishes and other out of place objects.
- Use liquefy tool if you wish to alter face shape and body shape, be careful of distorting the background.
- Use adjustments to lighten or darken the image. Combine with selections tools to highlight specific areas.

Optional: remove and add backgrounds with selection tools, refine edges with select and mask.

Photobooks/Table books/Coffee books:

After making the best pictures it is possible to combine your images into a photobook.

- Use similar steps above.
- Create page layouts for images.
- Add text where necessary and any other additions.
- Seek advice from professional printers for hard copy printing.

Important: Work on 300 resolution images, Work on colour settings CMYK. Work Non-destructively and only on copies of images.

Note: this is best designed in Photoshop and imported to InDesign for print.

Black & White Portrait

To make a coloured image Black & White you can simply use the destructive or non-destructive adjustment. You can also desaturate your image using colour adjustments like Vibrance or the shortcut of Shift + CTRL + U.

Mixed Portrait:

- Uses the Hue/Saturation adjustment to select the primary colour in the image.
- Desaturate the colour.
- Repeat if necessary on other colours
- Add a Vibrance Adjustment and up the Vibrance slider

Photo Restoration:

Photo Restoration is complete by taking damaged photos and fixing them.

- This is done mainly by using the healing tools in Photoshop.
- Using selections to add highlights.
- Using adjustments to fix colour and brightness issues.

Optional: crop and create a new border. Colourize the image with digital painting and adjustments.

Creative Portraits:

Creative portraits are created using a large range of Imaginary, photographer skills and Photoshop tools. Imagination is key but Photoshop is the tool to help express your ideas.

Note: to change seasons it is possible to use the Hue/Saturation adjustment to effect only certain colours. You can make greens/autumn colours seem snowy by increasing the lightness slider.

Graphic & Web

Graphic design is a huge part of advertising and design related projects. It is covered in a lot of different jobs and can be found everywhere you look. Graphic design can be found in Branding, Logos, advertising, album covers, posters, prop design, creative portraits, web design, marketing, social media, digital marketing, photo studios, television broadcasting and many more jobs.

Note: A popular design technique is double exposure.

Web design is a huge part of our world and its ever-growing ease of access to goods. It is covered in a lot of different jobs from web design to content creation. Web design can be found in: Branding, Logos, advertising, banners, posters, content creation, creative portraits, marketing, social media, digital marketing, template creation and many more jobs.

Hobbyist

The joys of the hobbyist that they can fit in to every category freely and be as creative as they wish without limitations. Some creative ideas for the hobbyist is T-shirt design, creative posters/portraits, business cards, greeting cards, phone cover design, fabric design, and many more.

Note: Have a look at sites like Upwork, Redbubble and Design crowd for more inspiration and ideas.

THANK YOU
