DIPLOMA IN PHOTOSHOP

LESSON 4

PHOTOSHOP FAILS

Ok. This is NOT a joke. We paid a photographer, who claimed to be a professional, $2-250 for a family photo shoot. Please see these FOR REAL photos she delivered to us....She said the shadows were really bad on the beautiful, clear, sunny day and that her professor never taught her to retouch photos. Feel free to share 😂😂😂 I literally have not laughed this hard in YEARS!!!!! You can't make this stuff up.....again, this is NOT a joke - final product 🤣

Lesson 4

Selections

Cut, move and create

The Power of Selection Tools

Shortcuts to know!

Marquee Tool	M
Lasso Tool	L
Quick Selection	W
Magic Wand	W
Pen Tool	P

Selection

Select All

Windows: Ctrl A

Mac: CMD A

De-select

Windows: Ctrl D

Mac: CMD D

Re-select

Windows: Shift Ctrl D

Mac: Shift CMD D

Inverse Selection

Windows: Shift Ctrl I

Mac: Shift CMD I

Move Tool

Shortcut = V

Hold Shift to constrain the selection when transforming. Hold Alt/Option to start from a middle point

Select All Layers

Windows: Alt Ctrl A

Mac: Option CMD A

Select and Mask

Windows: Alt Ctrl R

Mac: Option CMD R

Layers

Windows: F7 or Window> Layers

Mac: F7 or Window> Layers

Duplicate

Windows: Ctrl J

Mac: CMD J

The Power of Selection Tools

Selection Tools

Marquee Tool	M
Lasso Tool	L
Quick Selection	W
Magic Wand	W
Pen Tool	P

Selection

Lasso

Used to select in a free-form manner. Consists of Lasso, Polygonal Lasso and Magnetic Lasso

Marquee

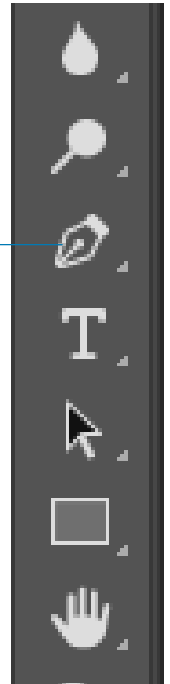
Used to select using shapes. Consists of Rectangular, Elliptical and Row/Column

Magic Wand/Quick Selection

Both tools are under same location on essential workspace. Magic wand selects based on coloured pixels. Quick selection uses Edge detection for selections.

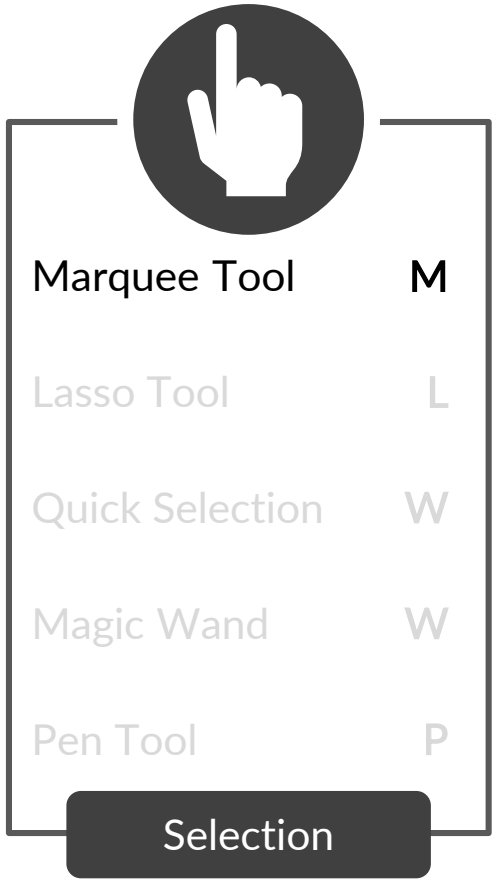
Pen Tool

Used to create Paths and convert to selections. This tool is covered in the Advanced Editing Module in more detail.



Selection Tools

Marquee

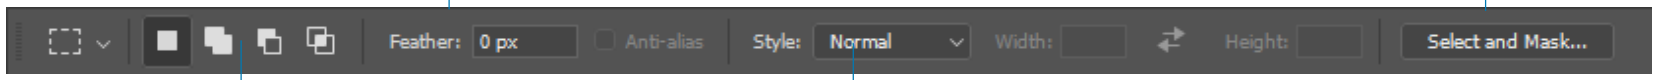


Feather

This option will allow you to soften the edges of your selection

Select & Mask

Select & Mask, previously known as Refine Edge, allows use to add more values and to refine our selections



Style

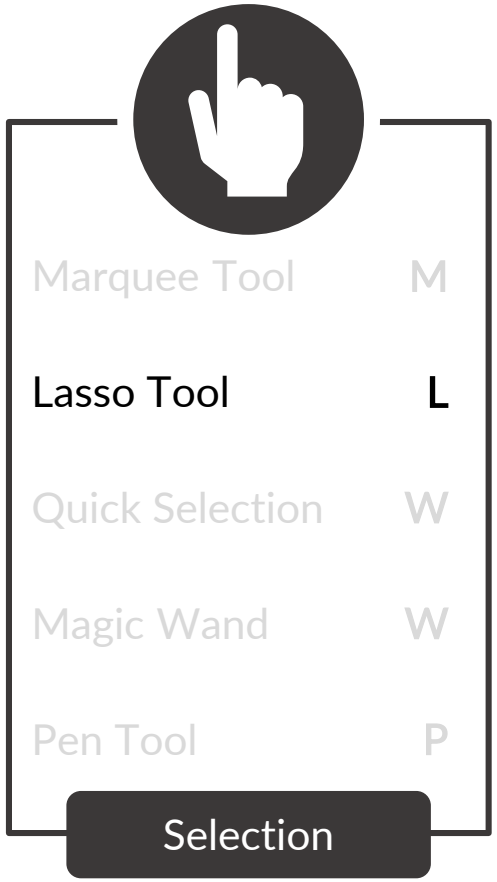
Used to constrain the size of your marquess selection.

Selection Options

With these options we can add to our selections, subtract parts from our selections or intersect our selections.

Selection Tools

Lasso



Feather

This option will allow you to soften the edges of your selection

Select & Mask

Select & Mask, previously known as Refine Edge, allows use to add more values and to refine our selections
