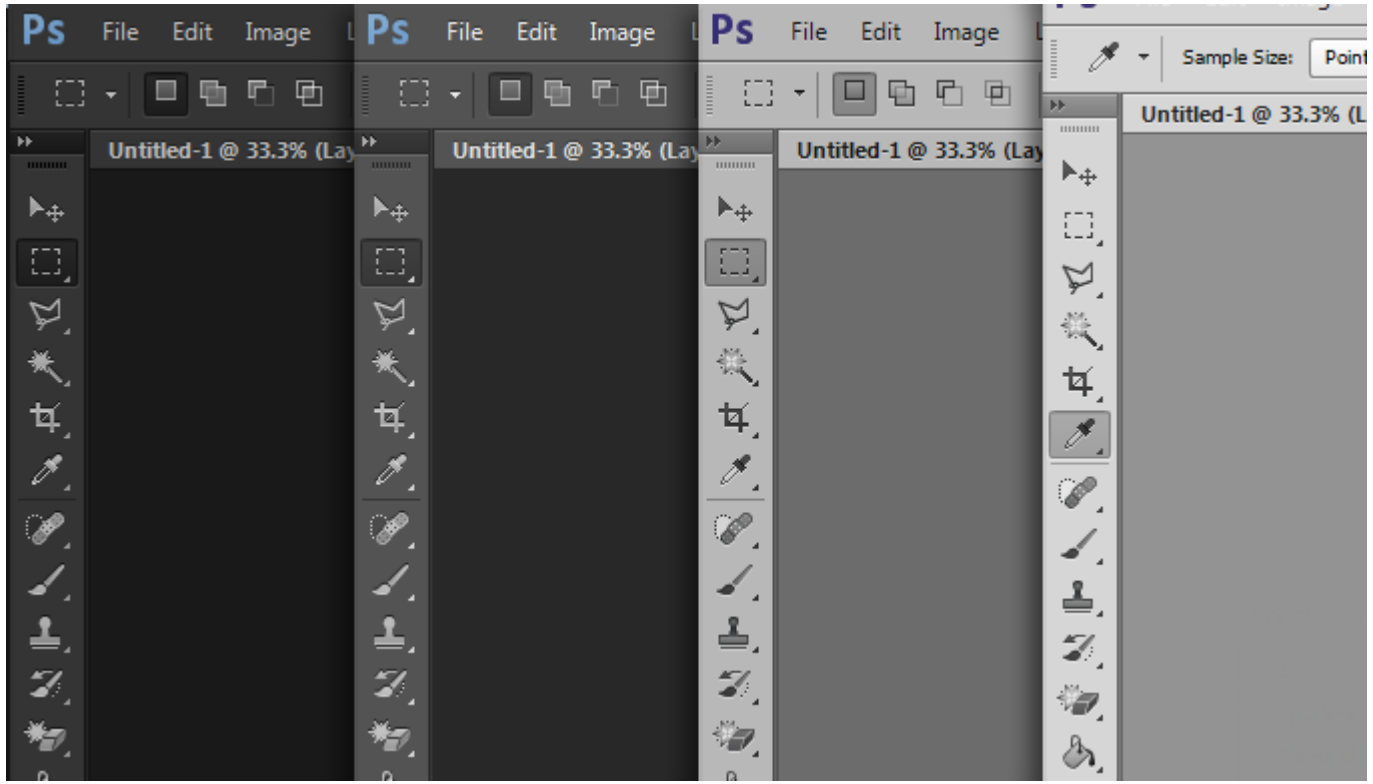
DIPLOMA IN PHOTOSHOP

LESSON 7

Why

Does Photoshop look the way it does?

Did you know that you can change the interface from black, dark grey, light grey and white. But why these colours?



Colour

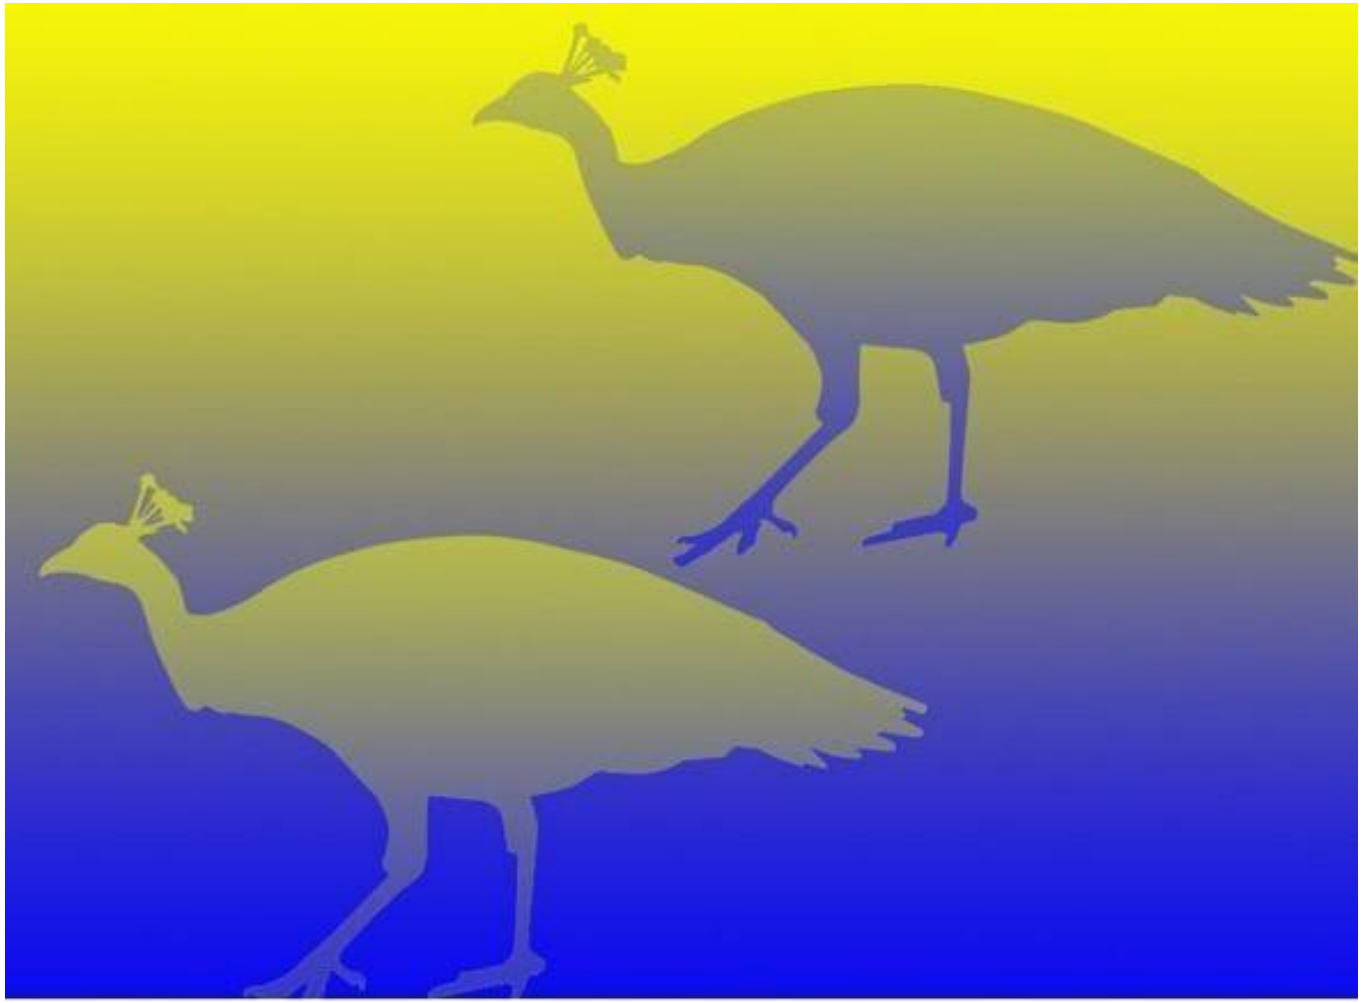
Perception

What colour is the dress?

Colour

Perception

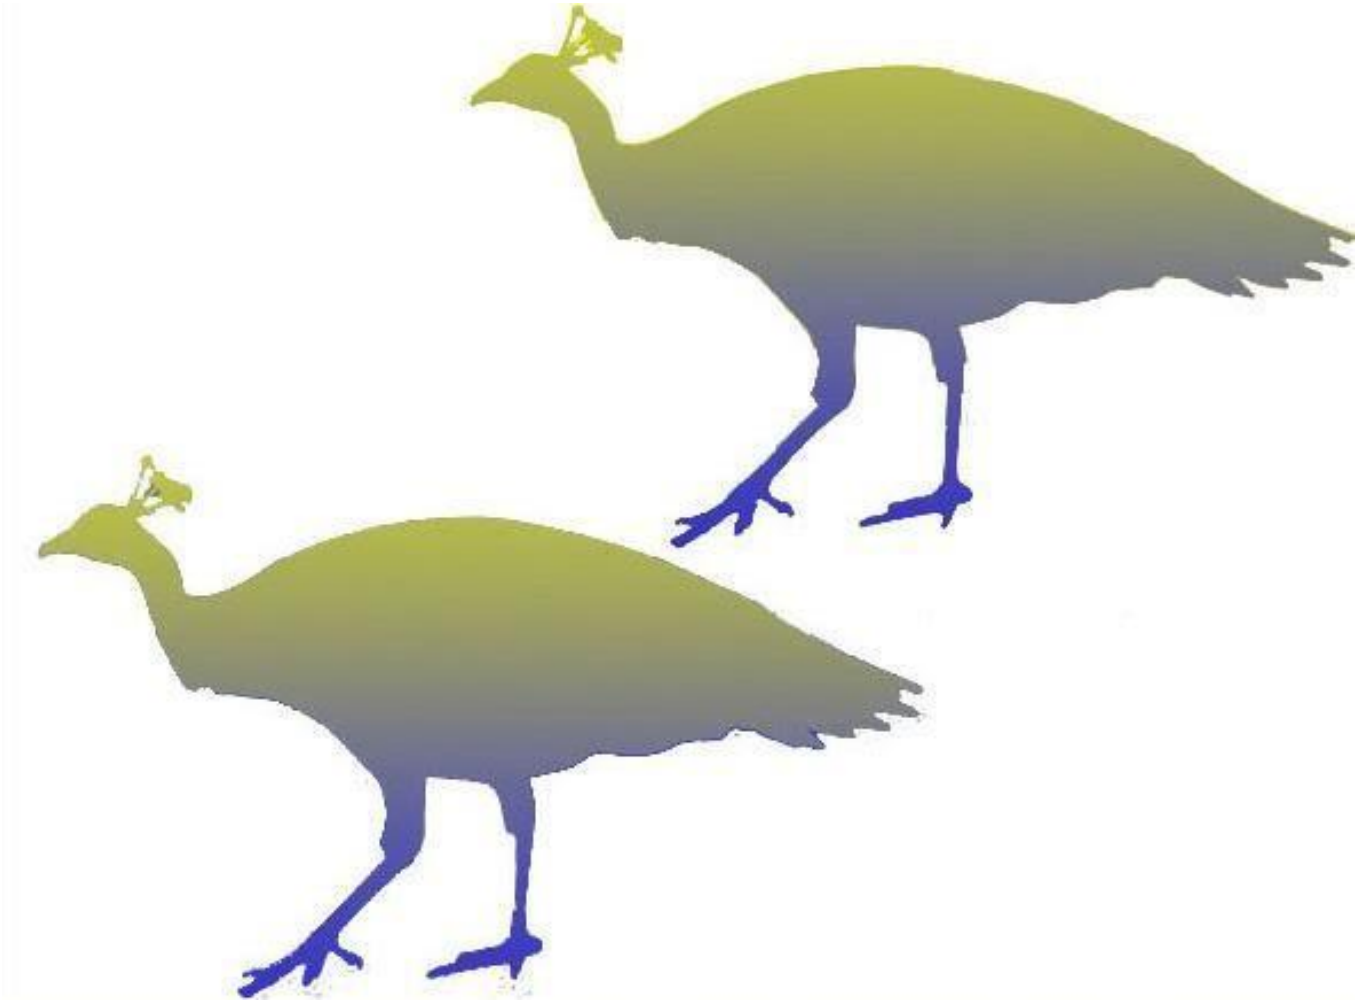
Are the birds the same colour?



Colour

Perception

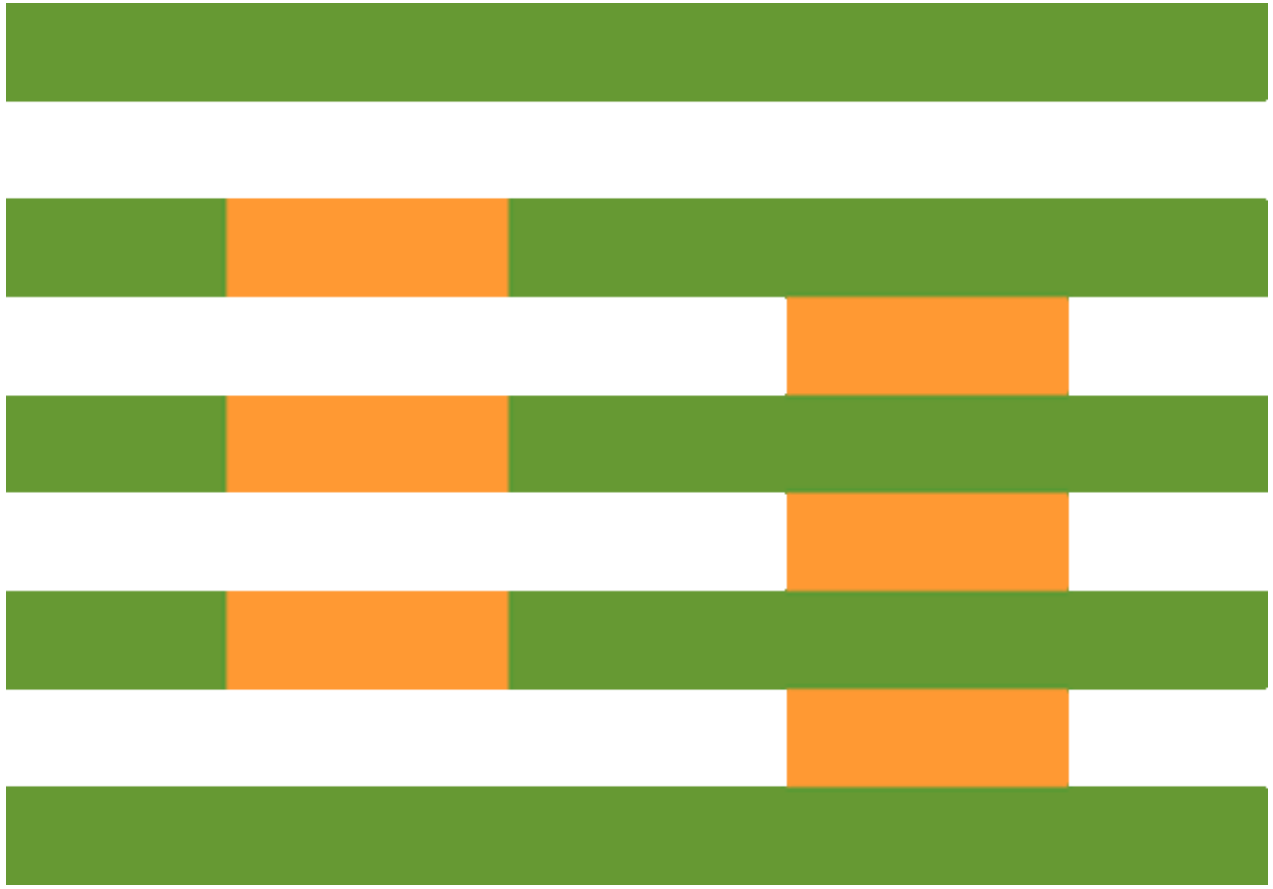
Are the birds the same colour?



Colour

Perception

Are the orange bars on the right
Darker than the ones on the left?



Colour

Perception

Are the orange bars on the right
Darker than the ones on the left?

Lesson 7

Colour Editing

Correct colours and stunning black and whites

OTHER TERMINOLOGY

Hue: is the pure colour, a base colour as it appears on the spectrum. Colour is a general term, hue refers to a dominant colour family.

Tints: are created by adding white to a colour

Shades: are created by adding black to a colour

Tones: are created by adding grey to a colour. In photography identifying tones is key to better exposures.
