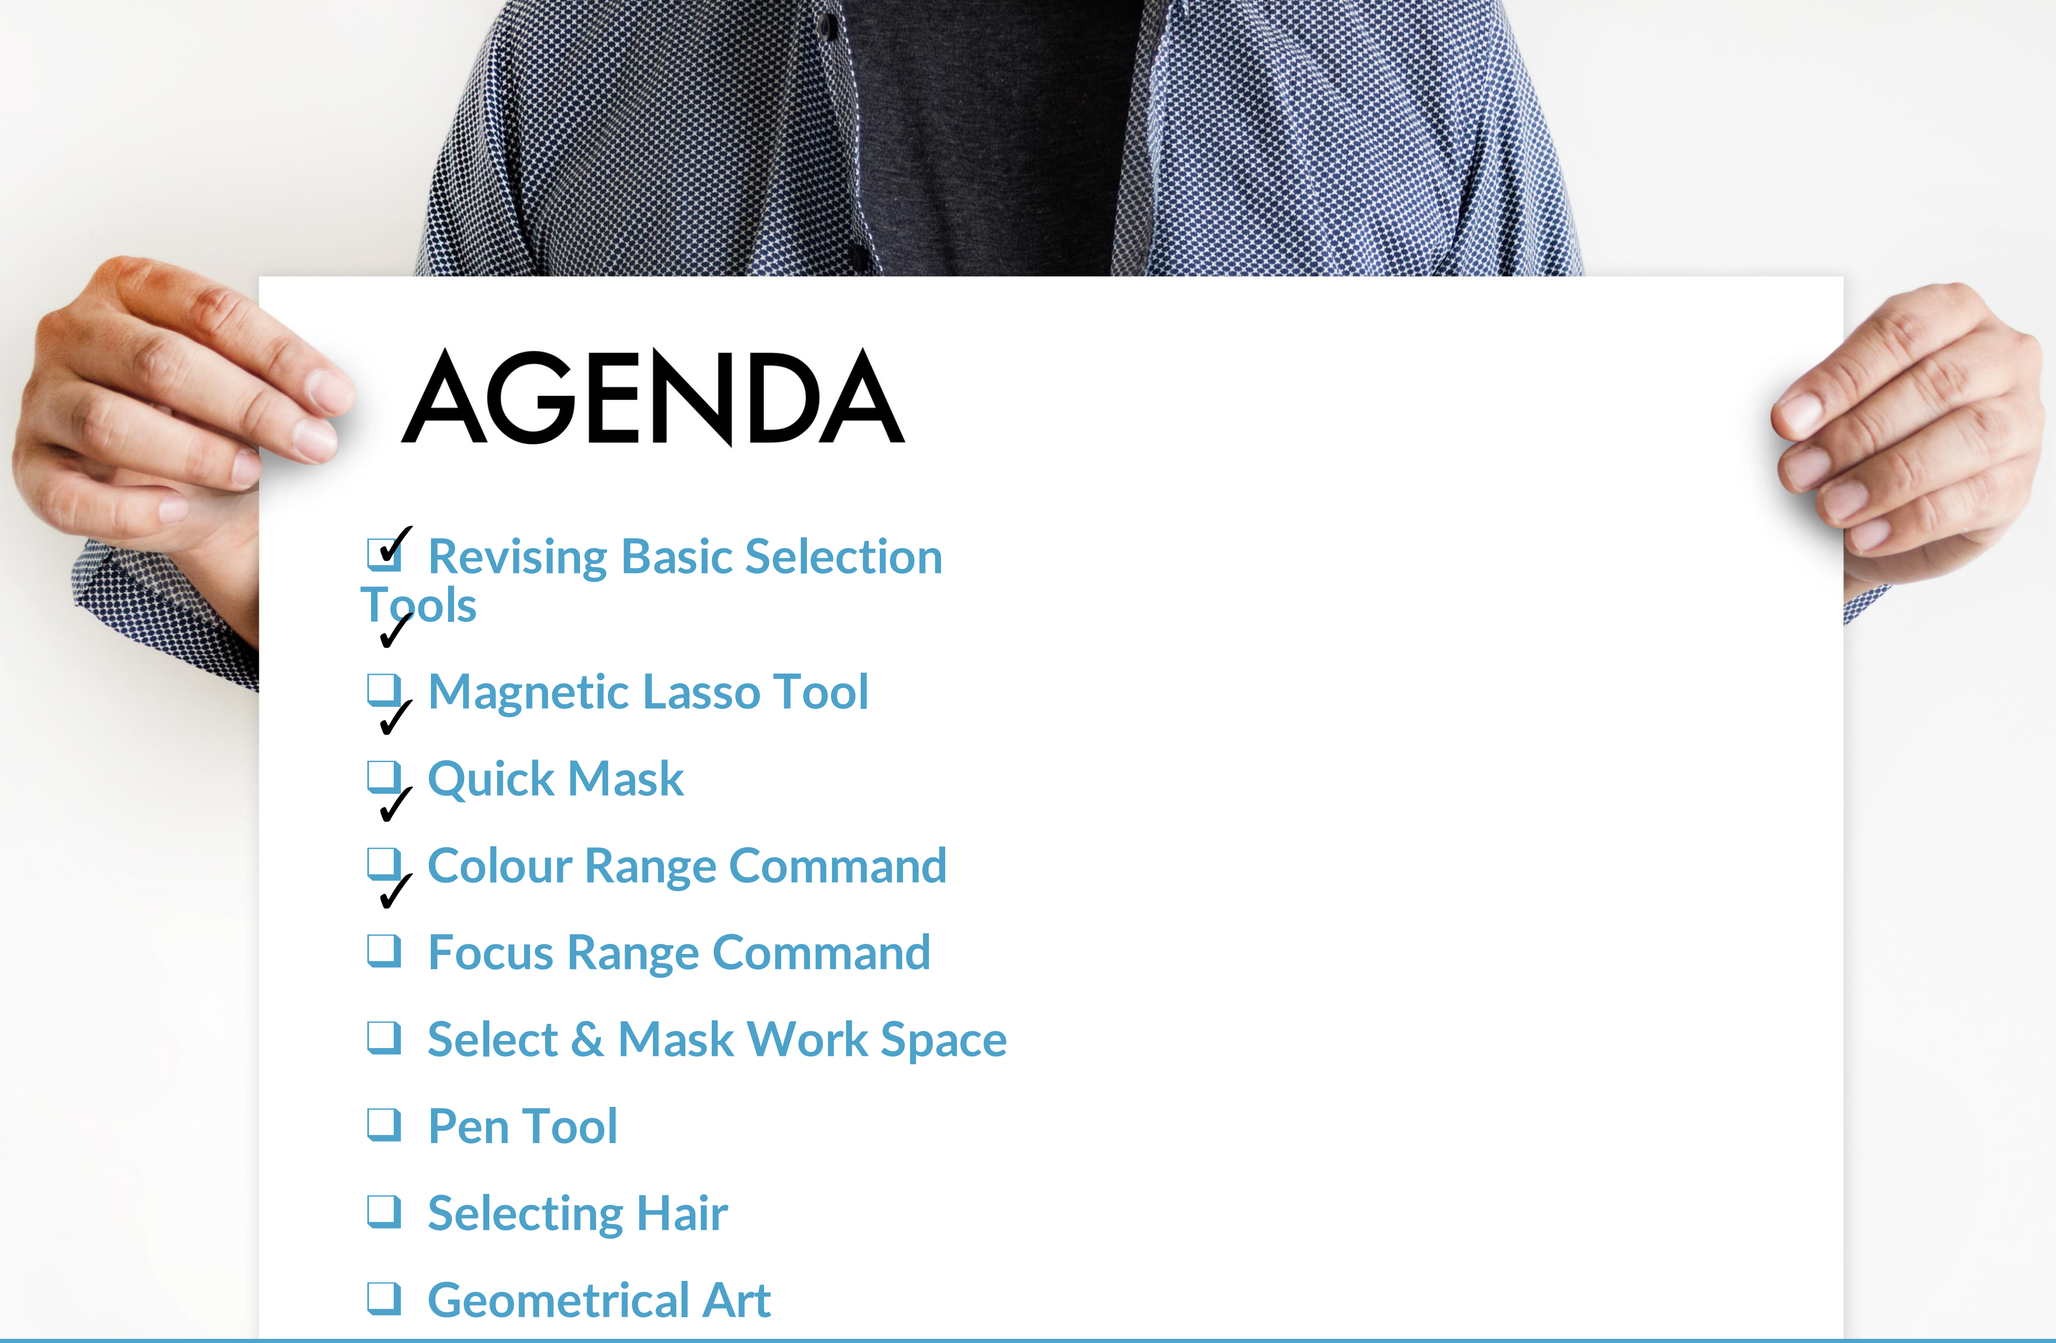
Diploma in Photoshop

Lesson 10
Advanced Editing

Advanced Selection Tools



AGENDA

- ✓ Revising Basic Selection Tools
- ✓ Magnetic Lasso Tool
- ✓ Quick Mask
- ✓ Colour Range Command
- Focus Range Command
- Select & Mask Work Space
- Pen Tool
- Selecting Hair
- Geometrical Art

Basic Selection Tools

Selection Tools

Marquee Tool	M
Lasso Tool	L
Quick Selection	W
Magic Wand	W
Pen Tool	P

Lasso

Used to select in a free-form manner. Consists of Lasso, Polygonal Lasso and Magnetic Lasso

Marquee

Used to select using shapes. Consists of Rectangular, Elliptical and Row/Column

Magic Wand/Quick Selection

Both tools are under same location on essential workspace. Magic wand selects based on coloured pixels. Quick selection uses Edge detection for selections.

Pen Tool

Used to create Paths and convert to selections.

Basic Selection Tools

Pen Tool

Marquee Tool	M
Lasso Tool	L
Quick Selection	W
Magic Wand	W
Pen Tool	P

Pen Tool

Used to create Paths which convert to selections. Can also make shapes

Add Anchor Point

Add new point onto a closed path

Convert Anchor Point

Converts points to curves rather than straight lines

Free Form Pen

Draws line with a flow rather than point to point

Remove Anchor Point

Remove points on a closed path

Curvature Pen Tool (2018)

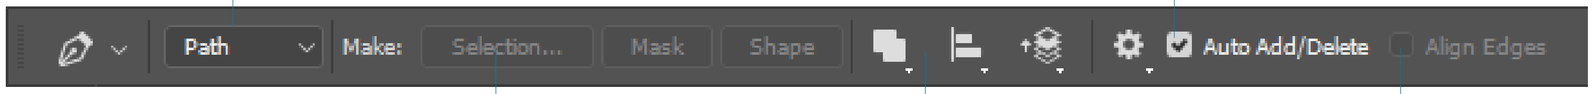
Remove points on a closed path

Path/Shape

Define how the pen is used

Auto

Automatically add or remove anchor point



Make

Turn your path into either a selection, Mask or shape

Alignment

Alignment & Placement options

Align Edges

Align edges of path

Basic Selection Tools

Select & Mask

Quick Selection

Quick Selection tool

Selection Brush

Refine Brush

Paint selection brush

Other Tools

Lasso

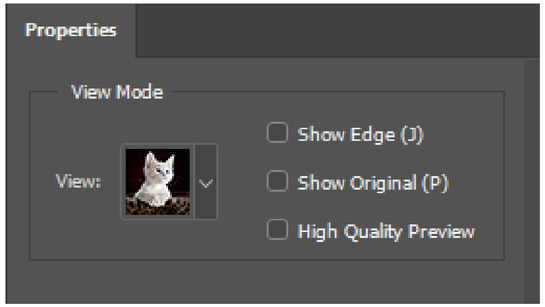
Pan

Zoom

Select & Mask

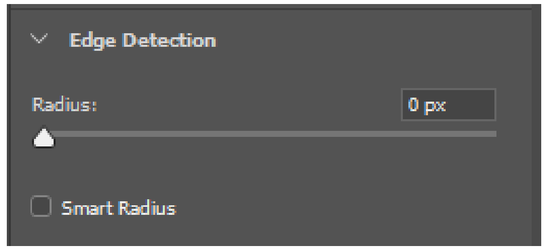
View Mode

Choose from a range of Views



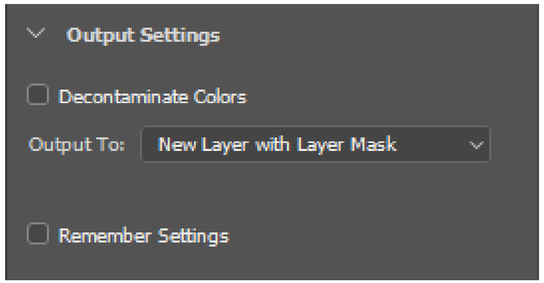
Edge Detection

Define the edge of your selection



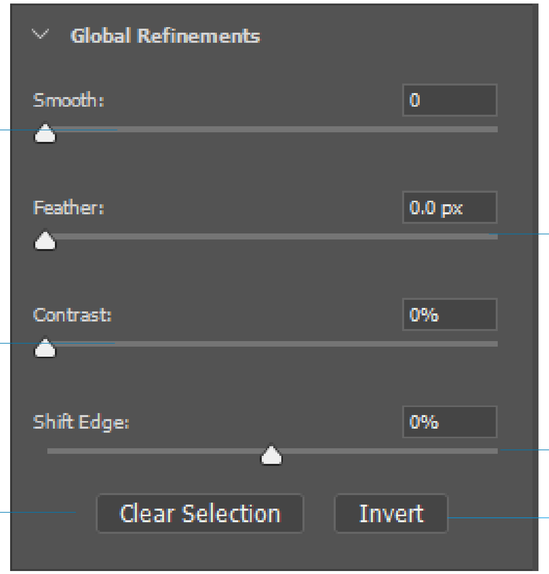
Output

Out put as selection, mask or layer



Global Refinements

Refine the selection



Smooth

Smooth jagged edges in selection

Contrast

Define edge colour with contrast

Clear

Clear selection

Feather

Soften the selection

Shift Edge

Expand selections outwards or contract selection inwards

Invert

Invert Selection

Lesson Challenge

Geometrical Art

You have been tasked to create a dynamic Geometrical image.

Open any image you want in Photoshop > Create a Path with Shape tool or Pen tool. > Create a selection from the Path > move, rotate or transform selection to create geometrical Art.

Want to get ahead?

Shortcuts:

- Brush Tool – B
- Change Brush Size – [or]
- Change Brush Hardness – Shift & [or]
- Switch Colour Picker– X
- Cycle Blend Modes– Shift & + or -

Notes:

- Blend modes need practice to get use to so try experiment with what you like.
