Basic Selection Tools

Selection Tools

Marquee Tool	M
Lasso Tool	L
Quick Selection	W
Magic Wand	W
Pen Tool	P

Lasso

Used to select in a free-form manner. Consists of Lasso, Polygonal Lasso and Magnetic Lasso

Marquee

Used to select using shapes. Consists of Rectangular, Elliptical and Row/Column

Magic Wand/Quick Selection

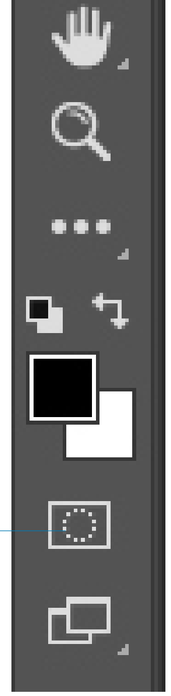
Both tools are under same location on essential workspace. Magic wand selects based on coloured pixels. Quick selection uses Edge detection for selections.

Pen Tool

Used to create Paths and convert to selections.

Basic Selection Tools

Quick Mask



Quick Mask

Toggles on and of Quick Mask. Best used with brush tool. Q as a shortcut will also toggle on and off Quick Mask. You can also use the Select Menu to edit with Quick Mask

Brush Tool

Select the brush tool to use with the Quick Mask. Brush options such as hardness and size will affect the quick mask selection.

To Be Noted

The Quick Mask will make a selection. You should always check the selection as it may need to be Inverted. To invert a selection you can used the shortcut CTRL SHIFT I or CMD SHIFT I or you can go to the Select menu and choose Invert .

Quick Mask Q

Basic Selection Tools

Select Menu

Select All	Ctrl A
