

Diploma in Photoshop

Lesson 22 Powerful Enhancement Photoshop Automation

AGENDA

- ☒ Photomerge
- ☒ Photomerge
Commands
- ☐ High Dynamic Range
- ☐ True HDR
- ☐ Tone Mapping
- ☐ Photoshop “Faux” HDR
- ☐ Little Planets

Photoshop Automation

High Dynamic Range

HDR Terms

HDR

Created by taking multiple shots of a subject at different exposures and then combining them. The process of merging multiple exposures to achieve good dynamic range.

❖ Tone Mapping

Developing and editing the HDR images to achieve good detail and contrast in all areas of the photo.

Photoshop “Faux” HDR

Involves using Photoshop effects and adjusting the shadows, highlights and other settings to create a HDR “Look”. The process of editing a single image to give the impression of HDR.

.

Photoshop “Faux” HDR

Option 1

1. Duplicate the original image 3 times.
2. Rename Layers 1,2,3 based on 3 being top layer.
3. Desaturate Layer 2 .
4. Change layer 2 blend mode to Overlay.
5. Invert layer 2.
6. Add Gaussian blur of 40 Pixels (alter depending on image)
7. Change layer 3 blend mode to Linear Light

Option 2

1. Duplicate the original image 3 times.
2. Rename Layers 1,2,3 based on 3 being top layer.
3. Desaturate Layer 2 .
4. Change layer 2 blend mode to Overlay.
5. Add High Pass Filter of 40 Pixels (alter depending on image)
6. Change layer 3 blend mode to Vivid Light

Little Planets

Steps

1. Duplicate background image
2. On duplicated image find middle point and use Marquee tool to select one half.
3. Delete unwanted selection. Select inverse CTRL+ SHIFT + I
4. Transform CTRL + T and Flip Horizontally
5. Crop if needed
6. Merge Layers
7. Unlock Background
8. Image > Image Size
9. Turn off constrain properties
10. Replace small value with bigger value to make the image a perfect square.
11. Transform CTRL + T and Flip Vertically
12. Filter > Distort > Polar Coordinates
13. Rectangular to Polar
14. Hit Ok

Hybrid Fruit

#ShawPS

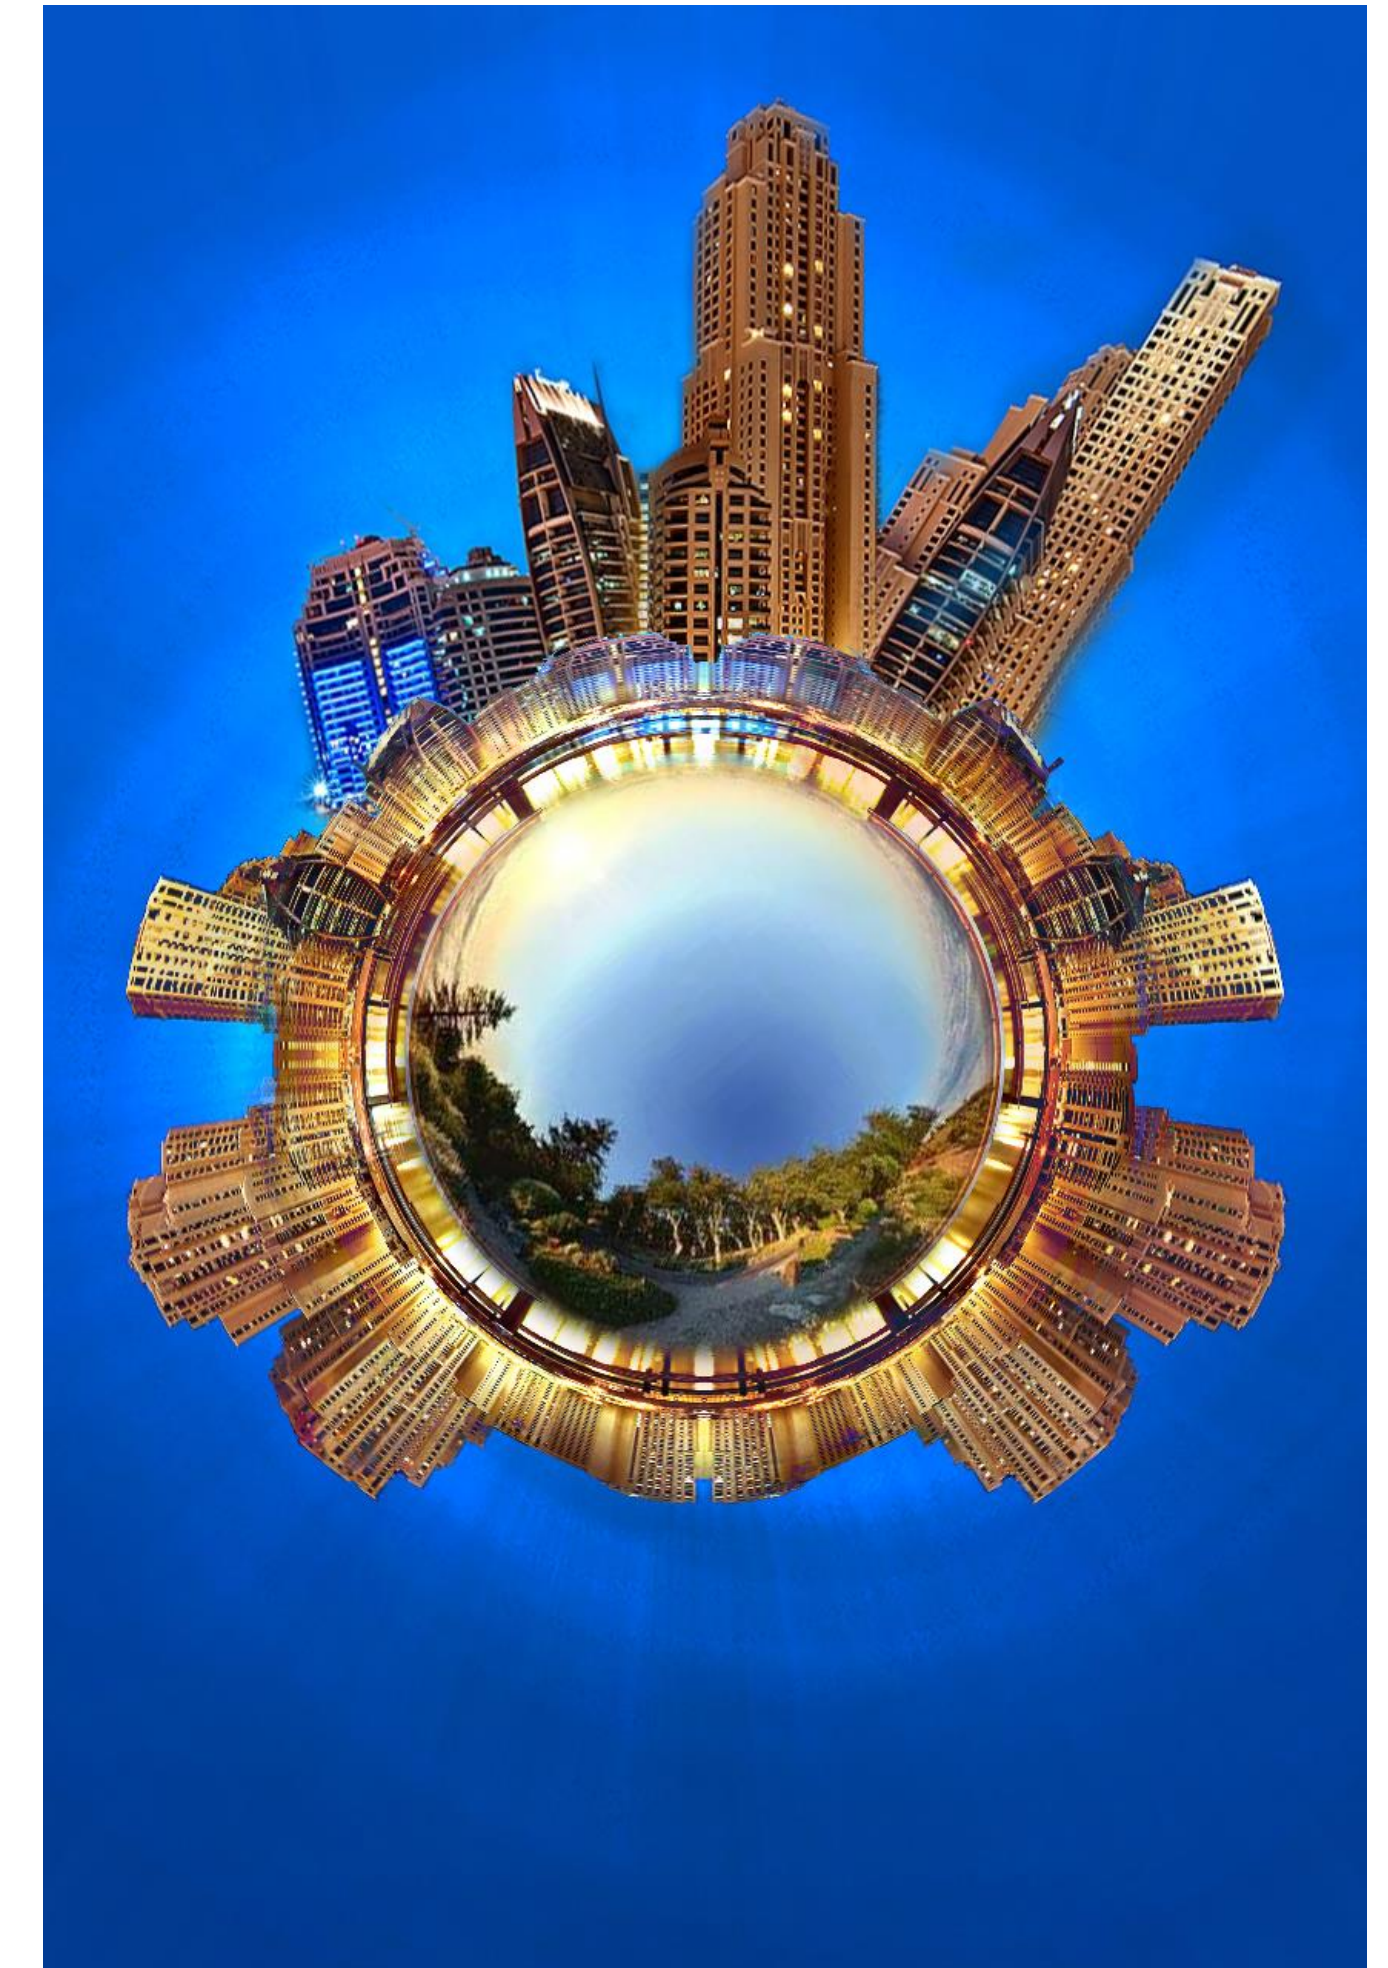

You have been tasked to retouch an image cosmetically. When complete post on Facebook with #ShawPS

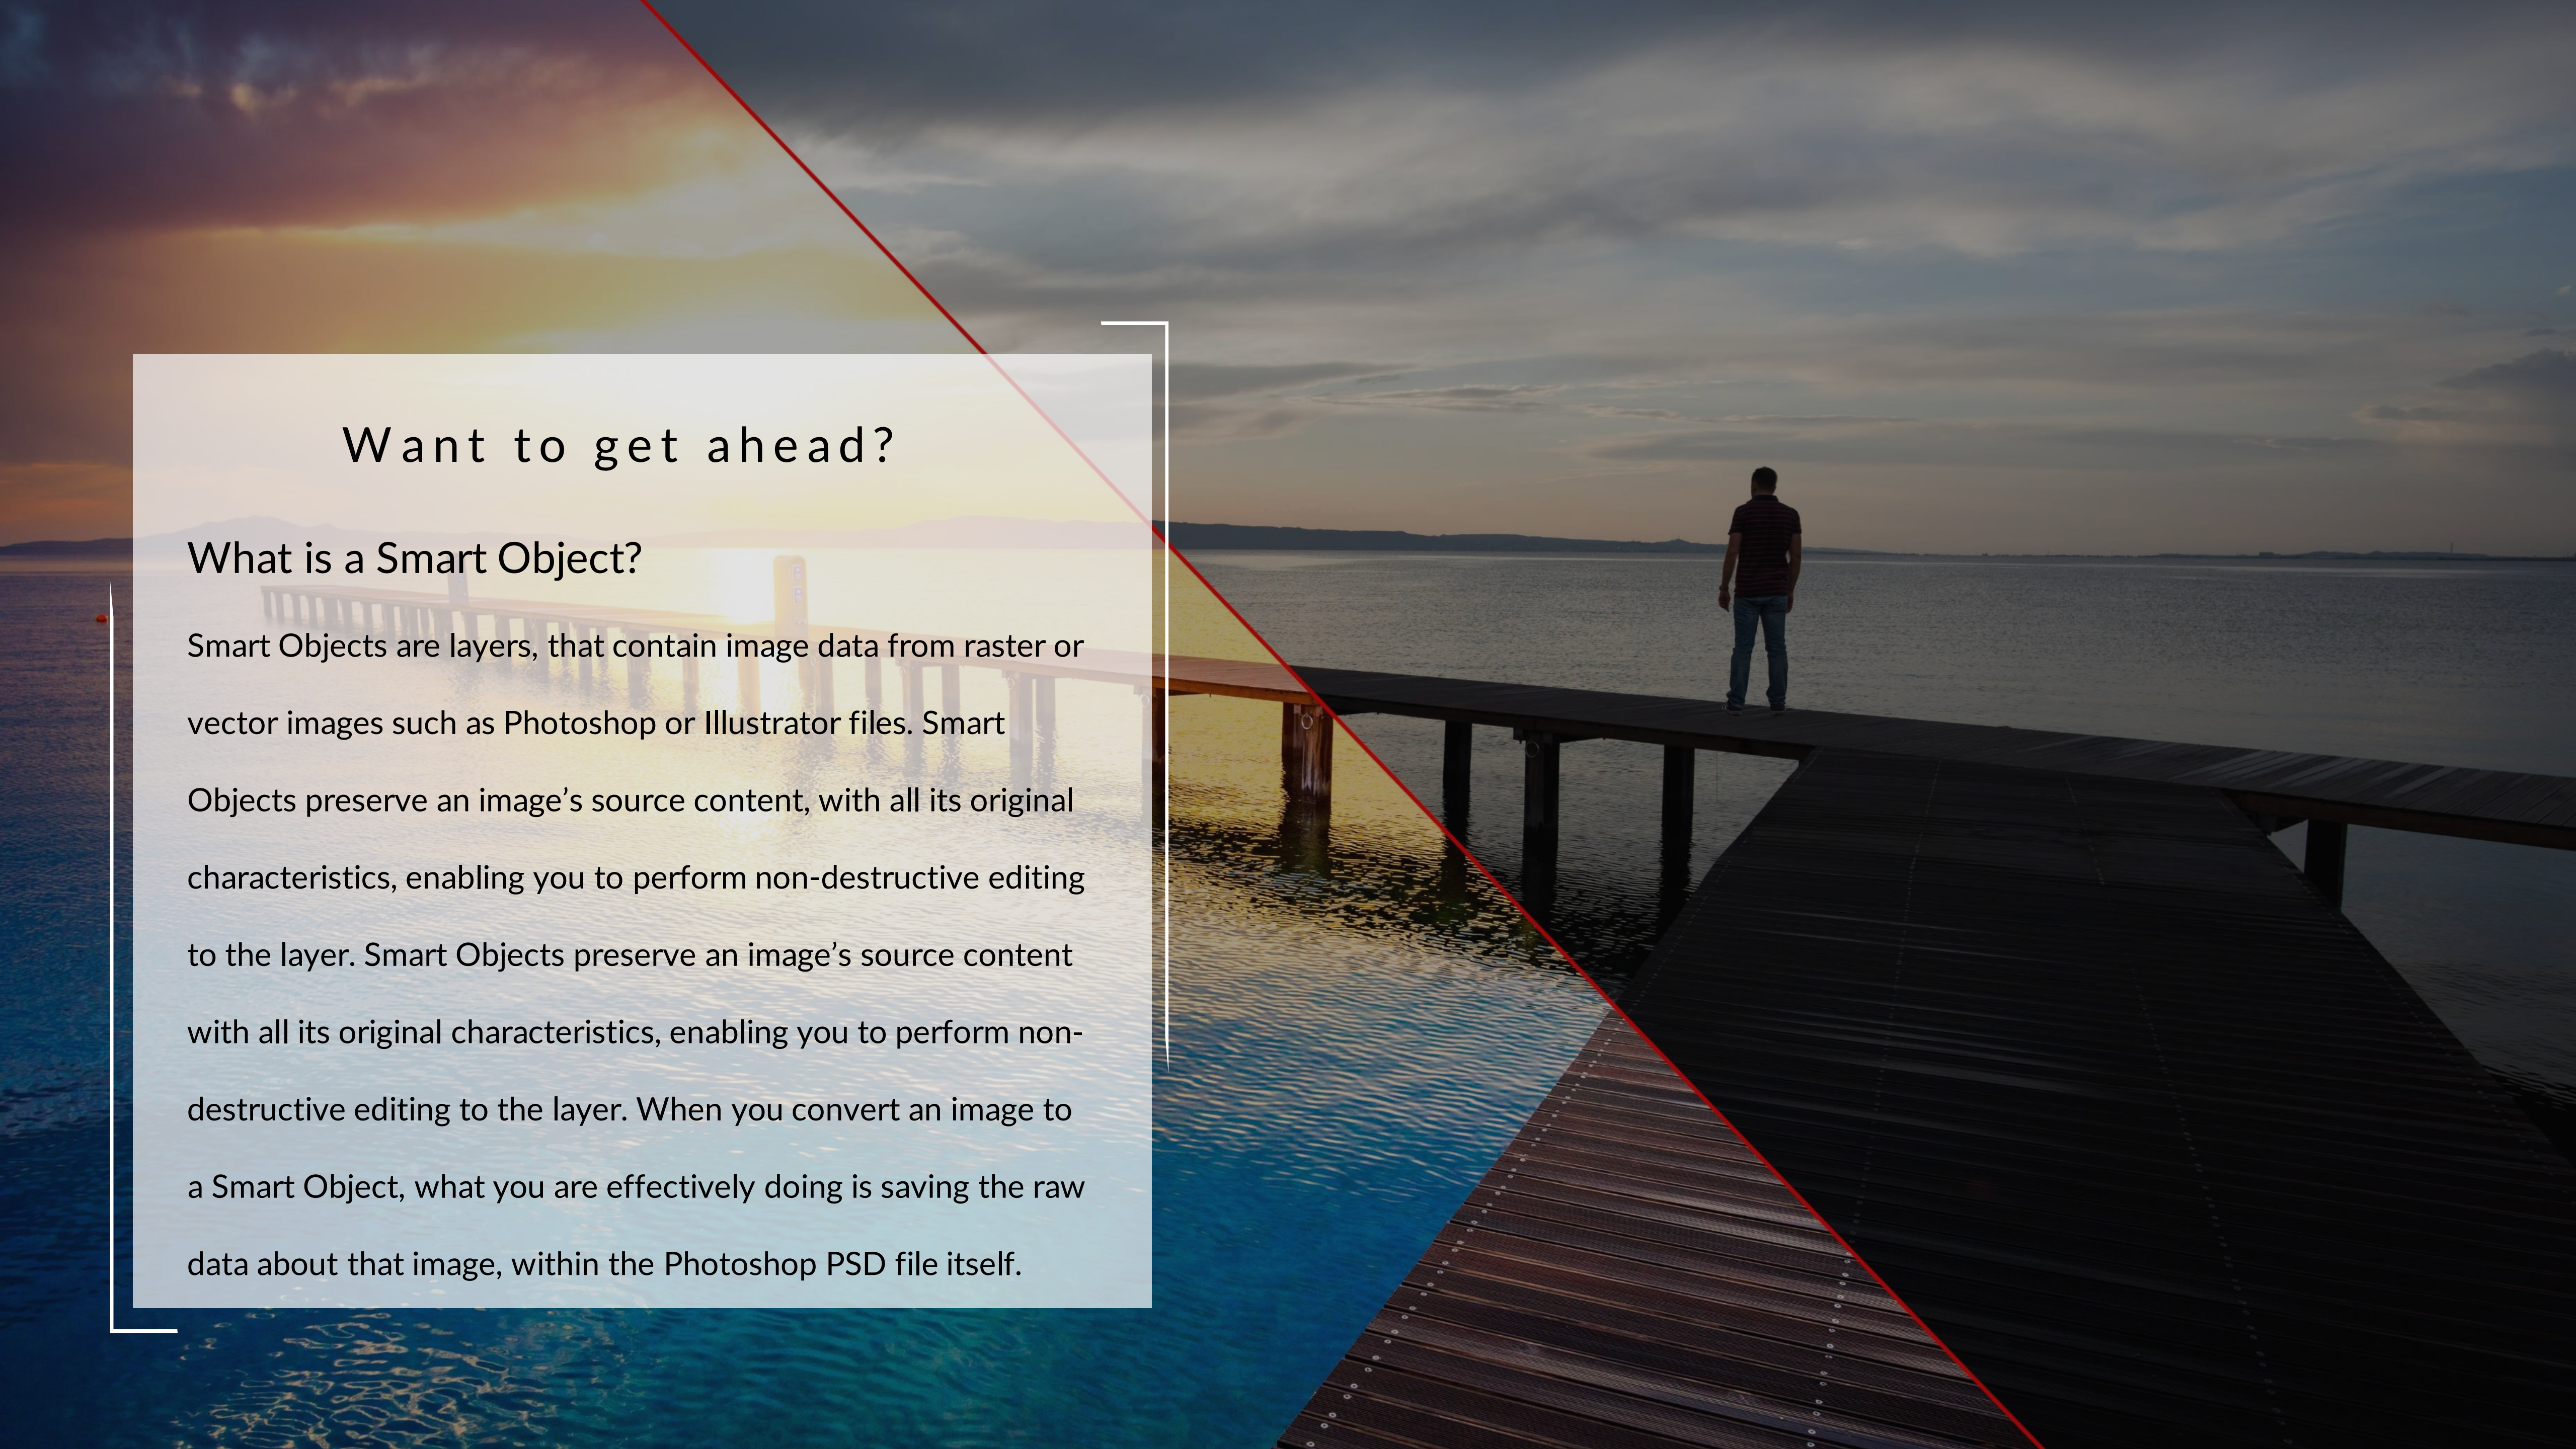

Open a image in Photoshop > follow steps found on Little Planet slide

Use healing tools to fix any oddities.

To see all of the work from your fellow students just search #ShawPS

A person stands on a wooden pier extending into the ocean at sunset. The sky is filled with soft, colorful clouds in shades of orange, yellow, and blue. The water reflects the light from the sky. The pier is made of dark wooden planks and has a railing. The person is wearing a dark shirt and jeans, looking out towards the horizon. A red diagonal line runs across the image from the top left to the bottom right.

What is a Smart Object?

Smart Objects are layers, that contain image data from raster or vector images such as Photoshop or Illustrator files. Smart Objects preserve an image's source content, with all its original characteristics, enabling you to perform non-destructive editing to the layer. Smart Objects preserve an image's source content with all its original characteristics, enabling you to perform non-destructive editing to the layer. When you convert an image to a Smart Object, what you are effectively doing is saving the raw data about that image, within the Photoshop PSD file itself.
