- Twitter best practices

Fun Fact

Did you know that the average Twitter user follows five businesses. Source: brandwatch.com

Posting to Twitter

Text post

Home page > add copy at top of page where it says ‘ what’s happening? ’ > add relevant hashtags > click Tweet
When you start typing a word with a # in front of it (no spaces), Twitter will provide you with a drop down list of hashtags to choose from. You can also use your own hashtags. Don’t forget to do your hashtag research!

Need a reminder on how to do this?
Rewatch lesson recording from 01:49 to 02:14.

Image post

Home page > click on image icon > upload image from computer > add copy and hashtags > edit image > tag people (if relevant) > click Tweet Twitter has limited editing functionality, unlike the other platforms that we have looked at in this module that allow you to add filters, stickers and text. On Twitter you are only able to adjust the image size, zoom into the image - or back out of it again - and reposition it.

Need a reminder on how to do this?
Rewatch lesson recording from 02:24 to 03:38.

GIF post

Home page > click on GIF icon > choose from GIF categories > choose appropriate GIF > add copy and hashtags > click Tweet

Fun Fact

Tweets with animated GIFs get 167% more click-throughs than tweets with static images
Source: sproutsocial.com

Using GIFs in Tweet

- Choose appropriate GIFs according to the topic of the tweet
- Ensure that GIFs are on-brand, consider your brand style, character and voice
- Create customised GIFs for product highlights, educations GIFS or entertainment
- Use text GIFs

Rewatch lesson recording from 03:38 to 04:30.

Twitter Poll

Home page > click on poll icon > add question > add hashtags > add two or more choices > set end date > click tweet
Using Twitter polls

- Create recurring polls: daily, weekly, monthly depending on your industry and the amount of content you have and are able to use for polls.
- Length of poll: you want your poll to be thumbstopping, ensure that your pole is easy to understand and quick to vote on.
- Set end date: some polls are more time sensitive than others depending on the topic of the poll. When setting your poll end date consider how time-sensitive the topic is, how much data you want to collect and what day and time your poll goes live.
- Add hashtags: you can use #poll at the beginning of your pole to catch attention or you can add hashtags at the end as you normally would, but you could event include them in the question itself. Don't go overboard with the hashtags though, it starts to look messy and unprofessional.
- Run promotional polls: you can use polls to indirectly promote your products, such as asking followers to vote between two products.
- Opinion polls: you can ask how followers feel about a certain product, branding option, content, industry or news topic
- Event polls: you can post polls during an event for the attendee's and to generate some awareness.

Rewatch lesson recording from 05:41 to 06:08.

Using Emojis in Tweets

In any type of Tweet that you post you can use emojis by clicking on the smiley face under the post creation section.

When using emojis in your tweets;

- Ensure that they are on-brand according to your brand persona, tone and voice as well as being relevant to the content of the tweet
- Emojis help you to humanise your brand
- You can also use them to highlight important information within your Tweet
- Use emojis to catch the attention of the scrolling user.

Twitter Media Studio

The media studio is for live video – you can broadcast, schedule broadcasts ahead of time to promote your content and drive viewership before going live, go private – schedule and stream your content privately to clip highlights in real-time with LiveCut – with LiveCut you can create clips from the most relevant parts of your live broadcasts and generate buzz around your content by Tweeting directly from the Media Studio. Home page > left side menu item > click more > select media studio from menu

Library

When you go into your Twitter media studio it will take you straight to your library where you can view all your content. You can edit content – add your twitter copy – don't forget to add your relevant hashtags and tag any relevant partners or people – you can mark the content as promoted only – or you can schedule your post from this point or tweet it immediately. You can also upload media from this point – when you click on upload media it will open up your computer folders to choose an image – you will then be able to see your upload and edit it.

There is also the option to filter your content by tweeted, not tweeted, videos, images, figs and Snappy TV Legacy Media - Media (videos and GIFs) previously hosted and served from SnappyTV will appear in this media list- a video technology that allows publishers to quickly clip live and linear broadcasts and share them – now LiveCut.

Producer

Here you can see all of your broadcasts (broadcasts are the method for going live on Twitter) – your live, scheduled and ended broadcasts – you can search for specific broadcasts by date. In order to start broadcasting you can click on create broadcast on the top right corner. In order to go live you need a Periscope account and you need to use an encoder or broadcasting software.

Periscope setup

1. Periscope app
2. Tap Create New Account
3. From the login screen tap Twitter
4. Log in to your Twitter account
5. Your Twitter profile photo and bio will appear on your Periscope account
6. Enter your name
7. Choose a Periscope username (a list of usernames will be suggested based on your
1. Twitter username)
8. Your bio information transfers over from Twitter
2. Start here: https://www.pscp.tv/account/producer

Supported encoders

- BS
- Wirecast
- Teradek
- Restream.io
- Elemental
- Switchboard Live
- LiveStream
- Tricaster
- LiveU
- vMix
- Telestream LightSpeed

Media studio insights

Under the media studio you are also able to access both audience insights and conversations – under audience you are able to see when your followers are most active by day of week and time – you can filter the data by between certain dates – in the top right there is a schedule your tweets button which will take you back to your media studio library.
Under the insights conversations tab you are able to get an idea of your brand perception – you can see top tweets, hashtags and mentions about your brand and content – you can break the data down into minutes, hours, or days and set the time period that you want to analyse – in the graph underneath that you can see the number of tweets and when the peak hour – if you scroll down you will be able to see the top tweets about your brand and the latest tweets about your brand – as well as who is talking about you broken down by most influential and most often.

Scheduled Tweets

Allows you to view any scheduled tweets. You can view the date and time that the tweet is scheduled for, what the tweet is and what media type it uses.

Analytics

The analytics menu items take you back to your account analytics. Refer back to Module 1, Lesson 6 for Twitter analytics.
Creating content for Twitter

The elements of a tweet include a headline, links and hashtags.

Creating content for Twitter

Content tips for Twitter

- Craft your tweets for your followers
- Don't over-saturate your followers
- Engage more than broadcast
- Take advantage of trending topics
- Retweet with comment
- Twitter lists for curated content

Choosing the right content

- Will this content appeal to my target audience?
- Is it timely or timeless?
- What keywords and hashtags should be included?
- Does the content represent different perspectives and voices?
- Does the content include multimedia?
- Will the curated content that I am sharing interest my followers?

Trending topics on Twitter

Twitter has a number of features that you can use to find trends, on the right hand side of your home page you can see what is trending – if you click on the settings icon – you can set these trends to show by location and for you.

Explore tab

You can also use Twitter's explore tab to look for more trending information and tweets. You can also add trends to follow by clicking on more – going up to topics – on the topics page you will suggestions for you to follow and you can search for topics by clicking more topics – you can filter the categories further by clicking on the plus icon – click follow to add the relevant topic - and once you are finished you can click done – your topics will then appear in your topics tab – this helps to personalise the content (including tweets, events and ads) that is served on your Twitter feed making it easier to find content to curate as well as helping you to stay up to date with the latest trends in your industry and any news and helps twitter to suggest related topics to follow – remember that the topics that you follow are public so anyone who can view your full profile will be able to see what topics you are following. Rewatch lesson recording from 24:01 to 26:50.

Twitter lists

Use twitter lists to find curated content more easily or to keep an eye on your competitors.

Left menu item > click lists > create list icon top right > add list name > add list description > make private or public > click next > add members > click done

Owned lists: lists that you have created, they can either be set to public; good for content curation lists, or to private; good for competitor watch.

Subscribed lists: other uses lists that you have subscribed to.

Members: lists that you have been made a member of - your content features on that list.

Need a reminder on how to do this?
Rewatch lesson recording from 26:51 to 28:52.

Bookmark content

You can also use bookmarks to save tweets – and share them at a later stage – to bookmark a tweet you tap on the share icon – select the add tweet to bookmarks option – you can then access your bookmarked tweets when you click on the bookmarks tab.

Need a reminder on how to do this?
Rewatch lesson recording from 28:59 to 29:28.

Twitter moments

Left menu > click more > click moments > to create a moment – click on the top right hand side icon > add title > add a description > add a cover image > add relevant tweets by clicking on right hand side tick icon > finish later to save draft or click publish top right corner

Need a reminder on how to do this?
Rewatch lesson recording from 29:33 to 31:05.

How brands use moments

- Industry or news trends: you could compile a whole lot of tweets around a relevant industry topic or news story that is trending
- Inspirational storytelling: you can create a series of tweets around a customer success story/multiple success stories, tweeted testimonials
- Round – ups: this could be around monthly company news, event roundup
- Team tweets: compile all the tweets from your employees
- Product showcases: maybe you release a new range of products – you could put together all the individual tweets from that range and post a moment
- Repurpose content: you could share old content as a throwback to a special moment in your company, or you bring up old tweets if they relate to a trending topic, you could even go as far as to create a year in review post with moments at the end of each year

Top Tip!

Get personalised assistance from Twitter that provides you with suggested actions to take based on your page insights.
