Pinterest posting features

Creating pins

Home page > click on the create pin button – you also have the option to create a pin from the plus icon in the top right hand corner > add pin title > add description > include a destination link > upload image or save from site > publish immediately or publish later, alternatively click publish top right

Editing options

Crop the image
The editing options allow you to crop your image aspect ratio – the recommended ratio is 2:3 – you can also adjust your image by rotating it and flipping it horizontally or vertically – or you can change the image – the first icon lets you add images to create a grid – the second icon swaps out an image and the dustbin deletes the image. If you make changes and do not like them then you can hit the - reset button at the bottom and it will set everything back to the original version.

Add your logo
You also have the option to add your logo – adjust the size of the logo showing – set the position and there is a colour fill which creates a solid colour block behind the logo.

Add text overlay
Add a text overlay- you can adjust the text style – adjust the size – the alignment and margins as well as add a solid background and change the position of the text

Create a carousel

Click on the create carousel button at the bottom of the image > add images > click on use the same text and url for each image to use the same text and url or untick it if you want to use different text and URLs for each > use toggles at the bottom to scroll through images and copy > or reorganise images if necessary > choose a board or create a new board > click publish top right

Need a reminder on how to do this?
Rewatch lesson recording from 01:57 to 09:18.

Top Tip!

When naming your Pinterest board try to use keywords to describe your topic - think about what users might search for in order to find your product or service.

Video pins

1. Login to your business account and click + or Create Pin from the homepage
2. Click + and upload a video to Pin
3. Slide the selector left or right to the image in your video that you would like as your cover
4. photo
5. Give the Pin a title, description, and add it to a board using the drop down menu under
6. 'Choose a board'
7. 5. Enter a website to link the video or image to
8. 6. Click Publish

Rich pins

There are three rich pin types:

1. Product pins: provide additional information about your product such as price, availability, product description and a product landing page. Product pins will be covered in Module 4 when we learn about social selling.
2. Article pins: provide more information with articles such as headline, author, link to article. Ideal for articles and blogs.
3. Recipe pins which include a recipe title, serving size, cook time, ratings and a list of ingredients.

In order to use rich pins you need to use open graph markups or schema.org markups. These need to be inserted between the <head> </head> section of your HTML code for each page you want to enable article rich pins. Use the Rich Pins Validator to ensure that Pinterest sees it.

You may want to ask your website developer or webmaster to assist you.
