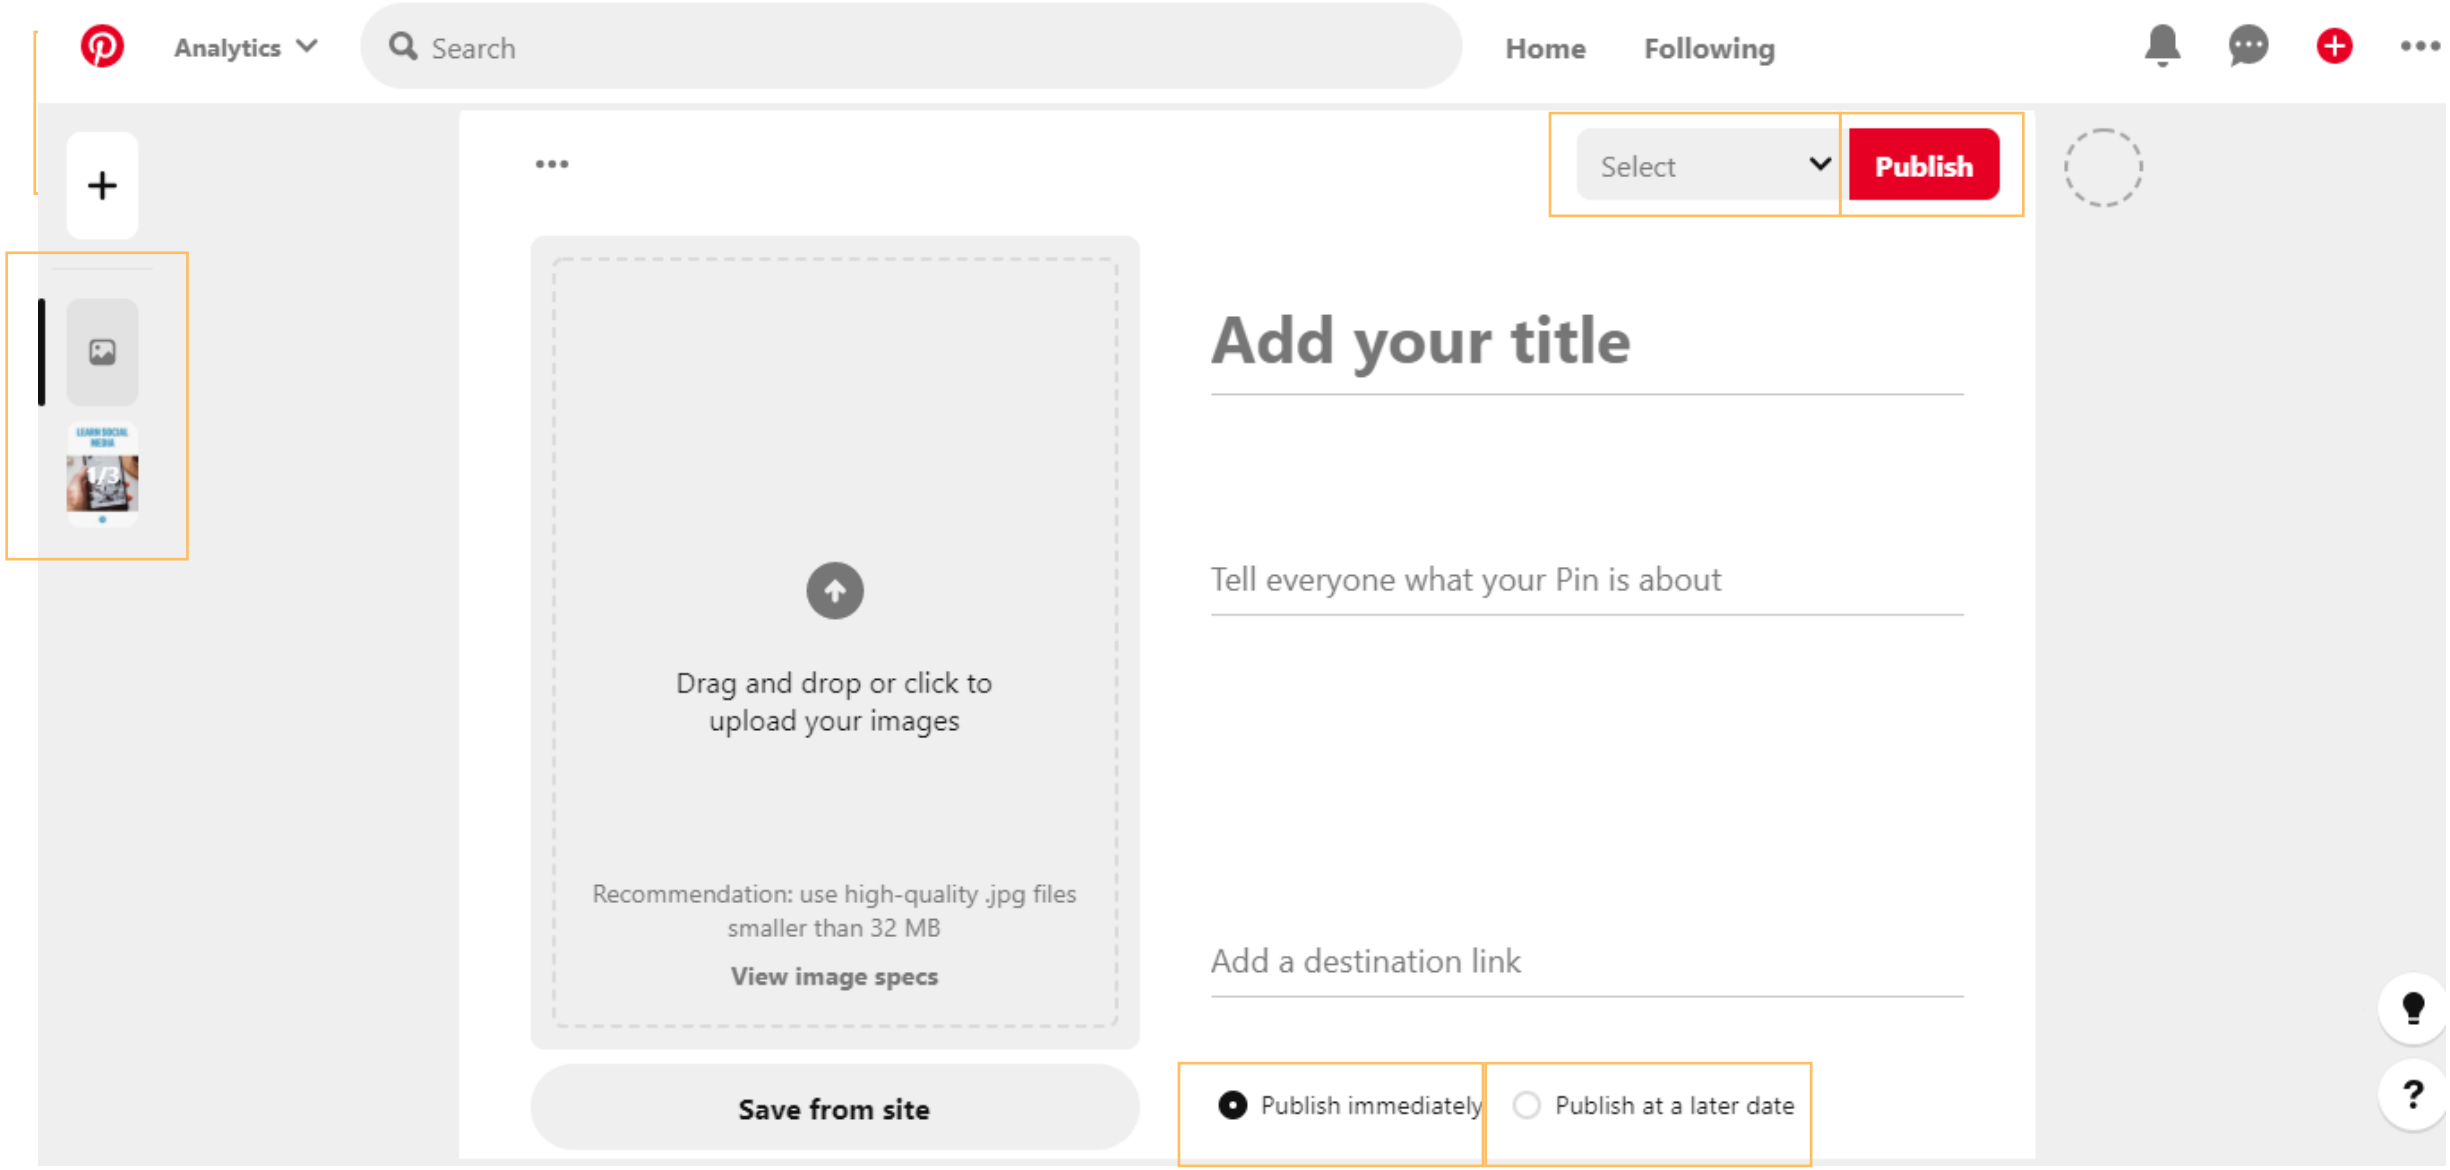
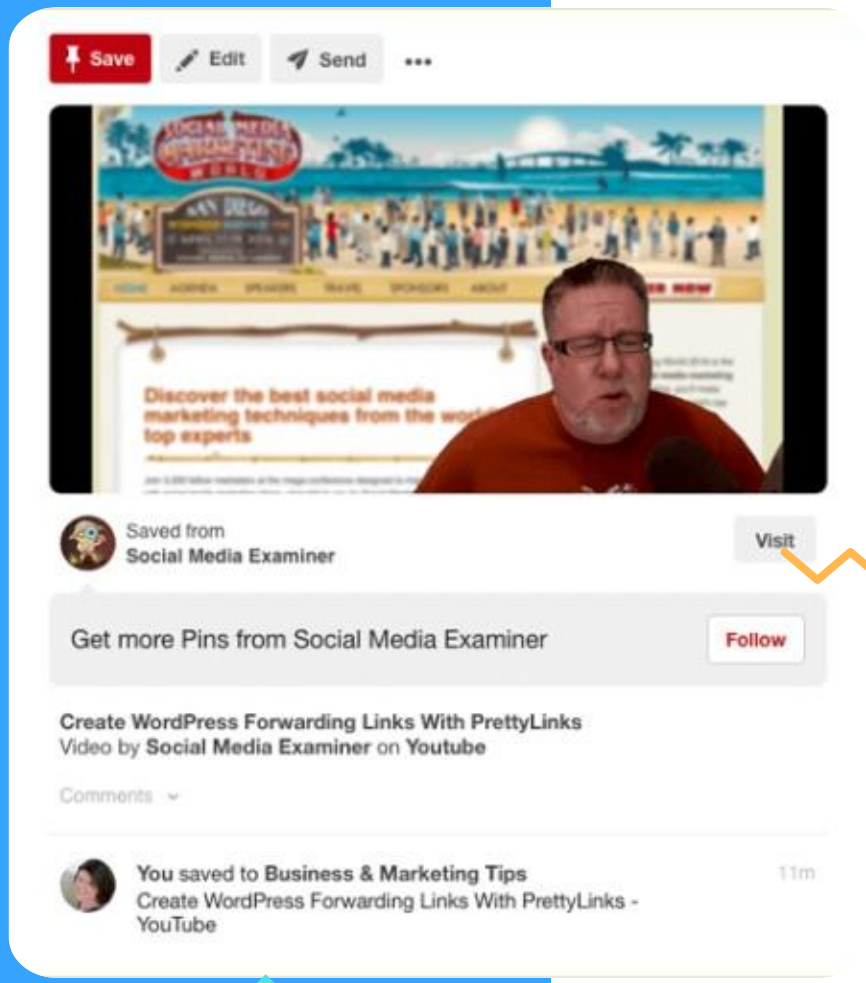
Top tip!

When naming your Pinterest board try to use keywords to describe your topic – think about what users might be searching for in order to find your product or service

Posting to pinterest





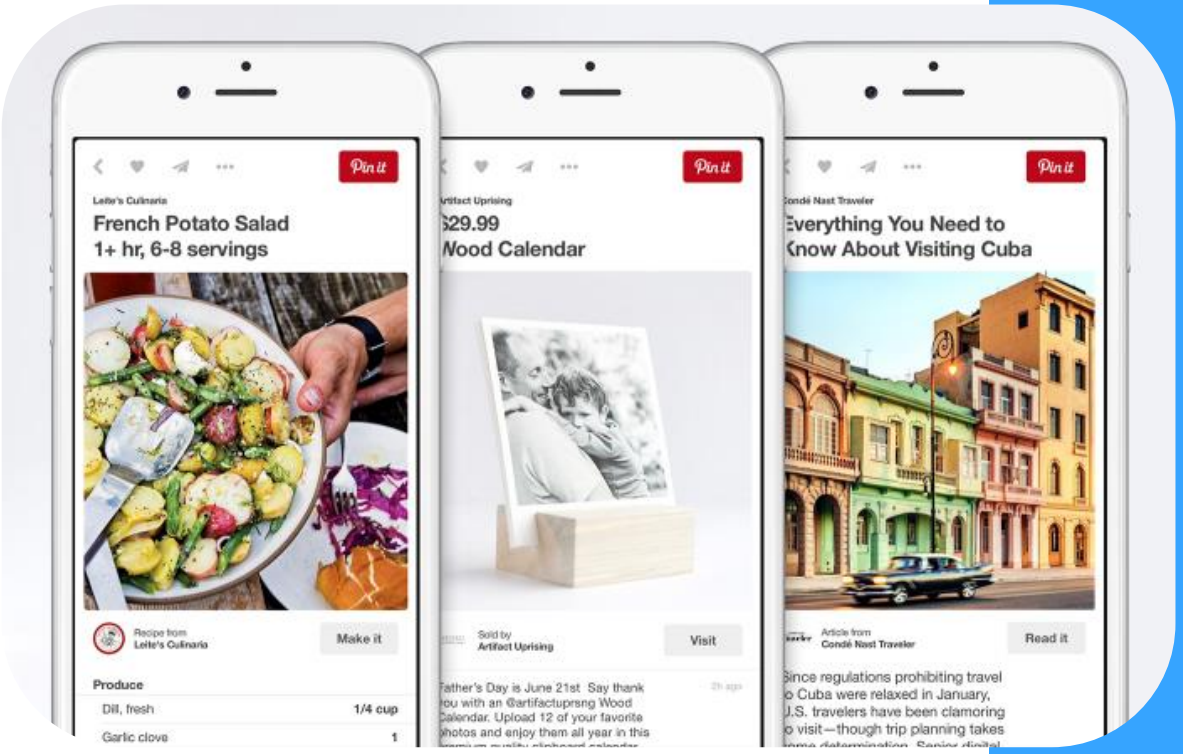
Video pins

1. Login to your business account and click + or Create Pin from the homepage
2. Click + and upload a video to Pin
3. Slide the selector left or right to the image in your video that you would like as your cover photo
4. Give the Pin a title, description, and add it to a board using the drop down menu under ‘Choose a board'
5. Enter a website to link the video or image to
6. Click Publish

Rich pins

Let’s you show extra information directly on the Pin

- Product pins
- Article pins
- Recipe pins



Article pins

Let’s you show the headline or title, description and author

- Articles
- Blogs

```
<meta property="og:title" content="Title of your Article"/>
<meta property="og:description" content="Description of your article" />
<meta property="og:type" content="article" />
```

Open graph markups

```
<meta property="og:site_name" content="Example Site” />
<div itemscope itemtype="https://schema.org/article">
    <meta itemprop="url" content="Https://www.example.com/2013/10/article.html" /
    <span itemprop="name" content="Article Title” /> by <span itemprop="author" c
    <span itemprop="description">A description or summary of the article.</span>
    </div>
```

Schema.org markups

Open graph vs schema

OPEN GRAPH

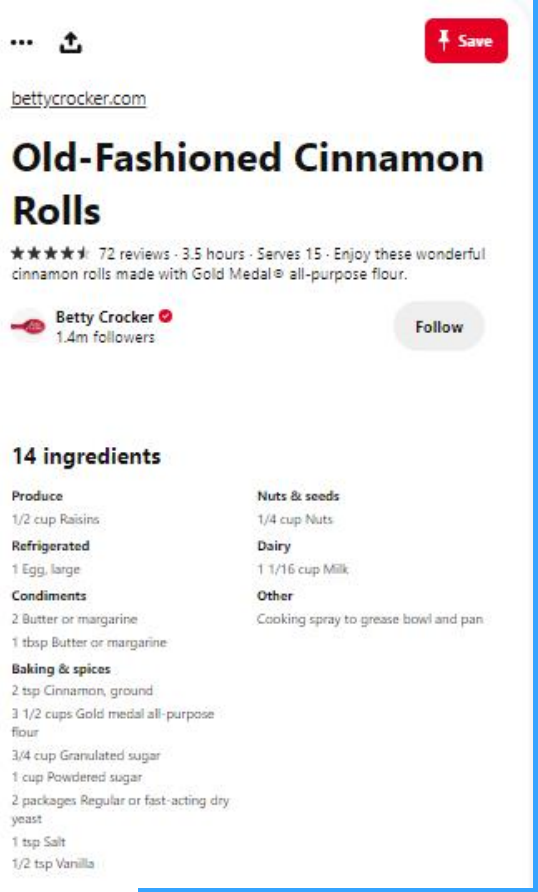
Snippet of code that controls how URLs are displayed when shared on social media.

SCHEMA

Code that you put on your website to help search engines return more informative results.

Recipe pins

Let’s you add a title, serving size, cook time, ratings, a list of ingredients and additional categories

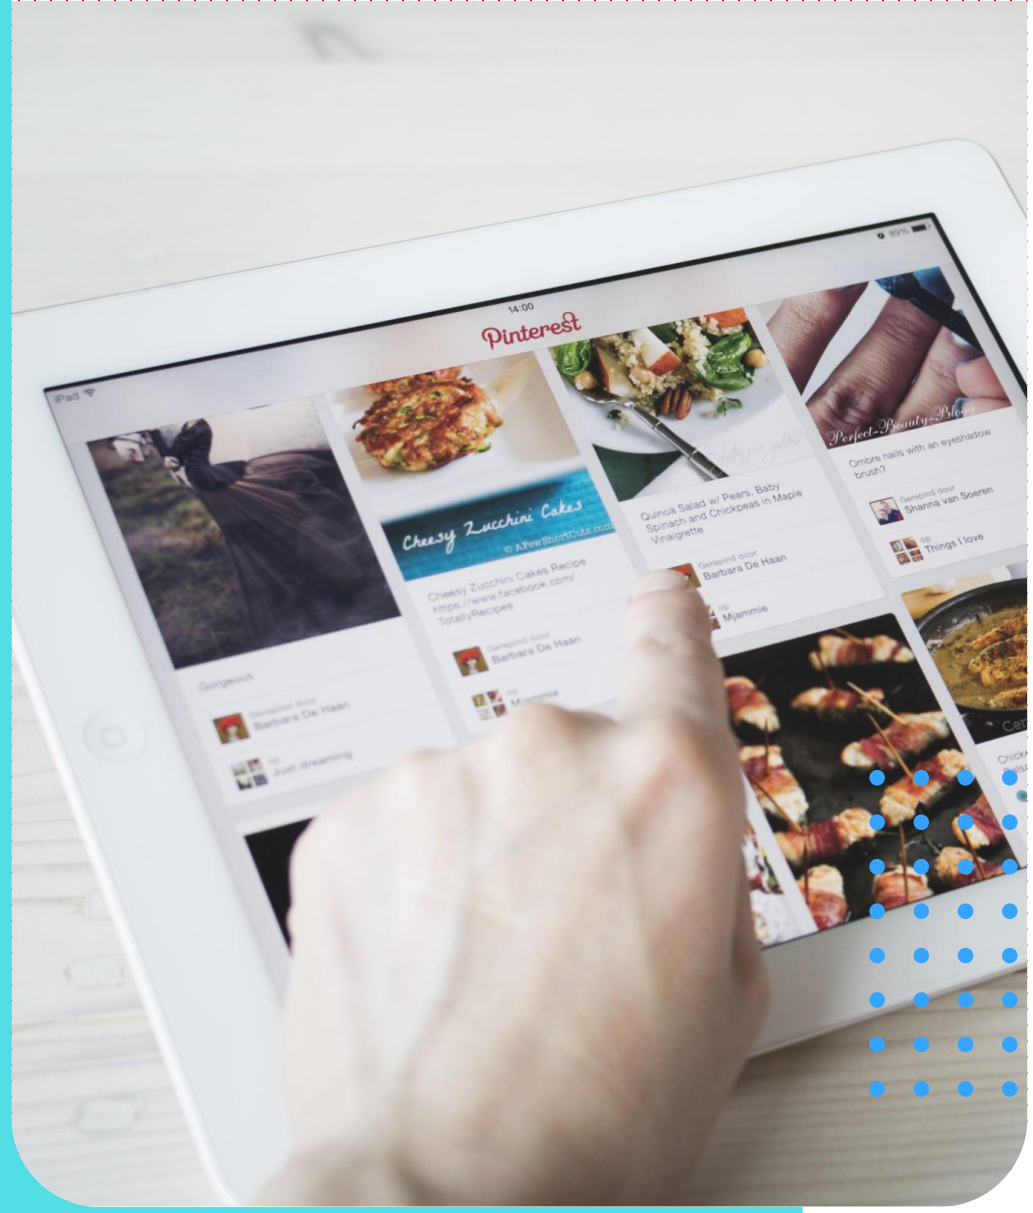


1. Add Schema.org or hrecipe markups between the <head> </head> section of your HTML code for each page you want to enable recipe Rich Pins on
2. Use Rich Pins Validator to check Rich Pin data
3. If everything looks good, click Apply now - make sure to pick HTML tags when applying

Recipe pins

Implement a schema markup

```
<div itemscope itemtype="https://schema.org/Recipe">
    <span itemprop="name">
    Orange-Pineapple-Carrot Smoothie</span>
   <span itemprop="description">
    Description of your recipe.</span>
  <span itemprop="aggregateRating">
    Aggregate rating will show here</span>
    <meta itemprop="url"
    content="https://myrecipesite.com/pineapple.html" />
    <span itemprop="recipeYield">Serves 1</span>
    Ingredients:
        <span itemprop="ingredients">ingredient 1</span>,
        <span itemprop="ingredients">ingredient 2</span>,
        <span itemprop="ingredients">ingredient 3</span>,
        <span itemprop="ingredients">
    add as many ingredient tags as you need</span>.
    Instructions:
    <span itemprop="recipeInstructions">
    Put the pineapple, ice, orange juice, carrot and
    banana in a blender. Blend until smooth.</span>
</div>
```



Trend jacking tips

“Pinterest is like window shopping 3.0”

Gary Vaynerchuk
