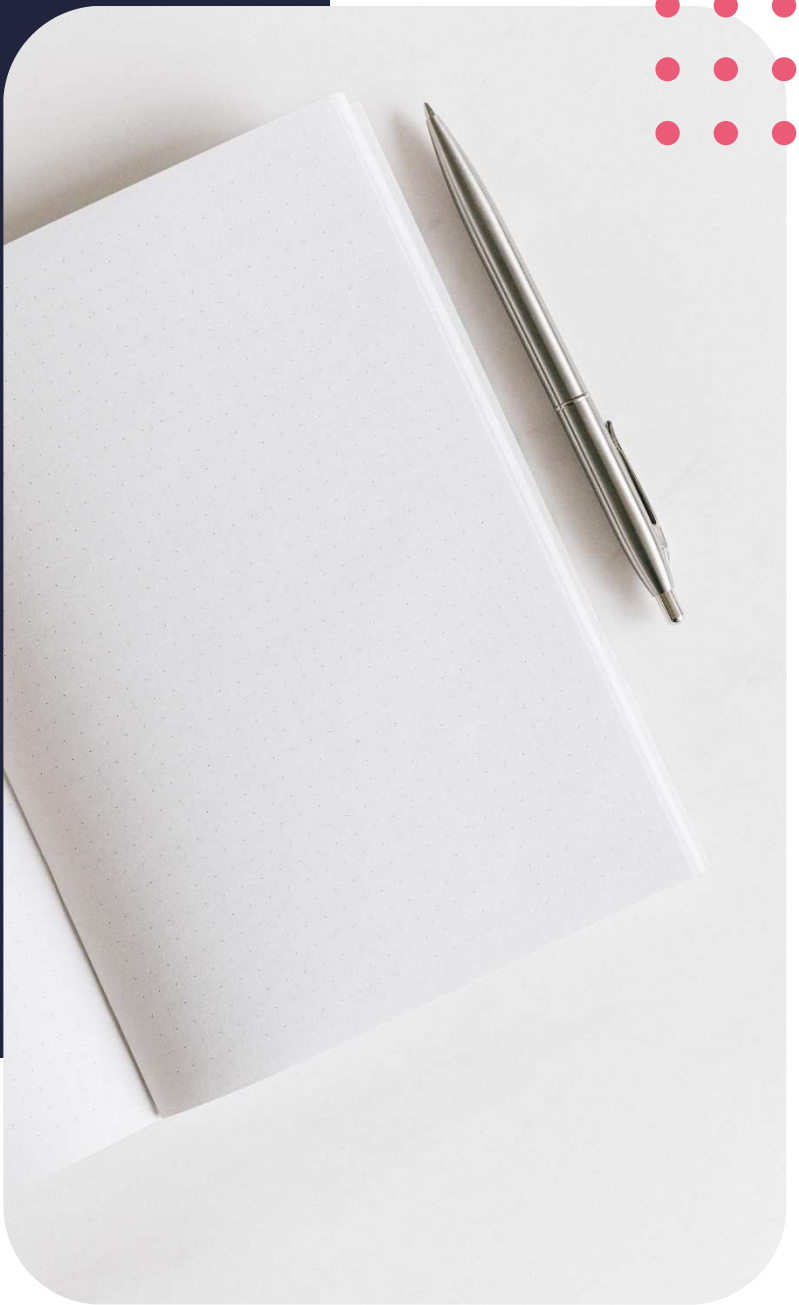
Social media and SEO



Social media and search

- What do we know about search?
- How much Search Engine Marketing (SEM) do we engage in?
- How do we integrate social media into SEM?
- The impact of having a website
  - Credibility
  - Monetisation and commerce
  - Reputation management
  - Content
  - Customer service
- A lot of this class will require a website
- Search is for when an audience wants to find you - action: from people to you
- Social content is for when you want to find an audience - action: from you to people

Search Content	**Social Content**
• Write content to inform and convince • Ensure you use target keywords • Focus on URLs, H tags and content within the body • Create a great meta description to drive click-through-rate • Strong and focused Call-to-Action	• Write content to entertain and evoke emotion • The majority of your content will be consumed on mobile devices • Be as visual as possible • As for copy, your headline will be important • Adapt your copy depending on the • platform

Search considerations

- How do people find our social media presence?
- Do we rely on search engines?
- Do we rely on other digital marketing?
- What is social media's place in search?
- How is social media valued by search engines?
- What do we need to examine?
- What do consumers look for when they are searching?
- Online reputation management

On social media platforms

- On platform search
  - Search engines are not the only thing we need to examine
  - How does on-platform search affect your brand?

Ranking social media

- Social media ranking is becoming more evident.
- SEO is being adapted to social media

SEO tips for YouTube

- Title of the video - use keywords at the beginning
- Description - first 2 to 3 lines matter
- Naming your video file before upload - use title and keyword
- Tags and categories
  - Most important keywords first
  - Add long tail keywords
- CC (closed captions) Transcription = Subtitle
- Comment and reply
- Add video thumbnail

SEO tips for Facebook

- Choose a brandable name
- Use keywords throughout your Facebook page
- Create a custom Facebook URL
- Optimise Facebook Business page status updates for SEO
- Include your phone number and address
- Backlink to your Facebook Business page (local value)

SEO tips for Twitter

- Similar keywords and hashtags you use on website
- Optimise profile for SEO: verification badge builds trust
- Introduce yourself - use hashtags and website URL
- Adjust your profile photo - customise the filename with keywords
- Mutual linking between website and twitter

SEO tips for Pinterest

- Optimise profile, boards and pins
- Focus on descriptions
- Avoid too many hashtags
- Do keyword research
- Analyse Pinterest keywords
- Pin consistently
- Focus on quality
- Pin vertical images (736 px by 2000 px)

Social signals

Social media has been associated with spammy links, questionable content and low quality content which is why it has previously been ignored by search engines.

There are millions of fake profiles on Facebook.

Google evaluation

- How many shares content created by a given brand/individual earns
- How useful, informative and valuable the content is
- How relevant the content is to a specific base of readers

Search engine optimisation (SEO)

What is SEO?

The process of increasing the number of visitors to a website through ranking higher in a search engine.

Why is Google so dominant?

- Provides relevant answers
- Good user experience (UX)
- Helping clients reach the highest value of traffic

- What stands out?
- Title
- URL
- Description
- All are connected - metadata

Relevant content

- Relevance and quality
- Create authority on specific subject matter
- Creates a community around your brand
- What content works for search?

What content works

- Lists, tips, round ups
- Authority
- Quality
- Social connection
- Geotargeting
- Information

Keyword management

- Cornerstone of SEO
- Keywords are imperative to your SEO efforts
- How do we assess the strength of our keywords outside social media?
- Consider where we use keywords for social media
- Where do keywords appear?
    - The title - 50 - 60 characters, position of keywords and brand name
    - The URL - relevant to the site, interesting and accurate
    - The description - inspire a sale, not as important for ranking but you still want to include keywords

Social media and SEO

- Fill out your social media profile
- Promote your content via social media and vice versa
- Encourage shares and thanks - improves quality of content
- Engage with influencers
- Social media channels are search engines too

Improve sharing

- For your user base to share your content they must first
  - Find your presence
  - See your content
  - Create a connection
  - Fel your content is worthy of sharing
- Give yourself every possible chance to start this process
- Social sharing buttons to SEO

SEO tips

- Pick a good keyword to focus on
- Research the competition
- Write the best content
- Put the keyword in your page title
- Put the keyword in your header
- Put the keyword in the name and alt-tag of your image
- Use the keyword in the URL and in the post
- Insert internal links
- Get external links - links from website other than your own
