Managing advertising

- Managing KPIs
- Managing a budget
- Managing engagement
- Managing expectation

Managing ads

- What KPI's are you looking at with Advertising?
- Does it vary depending on your goal? Yes!

Advertising KPIs

- CPC (Cost per click) vs CPM (Cost per Mille)
- CPC refers to the actual price you pay for each click in your pay per click (PPC) marketing campaigns.
- The "cost per thousand advertising impressions" metric (CPM) is calculated by dividing the cost of an advertising placement by the number of impressions (expressed in thousands) that it generate
- Impressions vs Reach
- Reach: the number of people who see your content
- Impressions: the number of times your content is displayed.
- Engagement: the number of interactions people have with your content (i.e.: likes, comments, shares, retweets, etc.)
- Clicks vs CTR (number of clicks/number of impressions) in percentage i.e. 100 impressions, 1 click, CTR: 1%

Managing a budget

- What do we know about Social Media advertising?
- Can we compete with the bigger companies?
- Detailed targeting, tailored approach
- Value you offer to our consumers
- Start small, get familiar with the platform
- A few dollars can go a long way
- Quality vs. Quantity

Managing engagement

- Engagement is not just for organic content
- We still need to manage the comments on Adverts
- Why?
    - Reputation
    - Sales opportunity
    - Increase conversion
    - Find what people want

Managing expectations

- Planning stage
  - Consider SOSTAC
- Build expectations around previous campaigns
- CTR, impressions, reach, engagement, etc.

Managing reputation

- Varies platform to platform
- How do we manage reputation on Facebook compared to Twitter?
- Think of the message tags!
- Your online reputation management
  - Blog posts
  - Review sites
  - Forums
  - Press releases
  - Competitors sites
  - Social media sites

Reputation management tips

- Prevention
  - Quality
  - Verify your social page
  - Be approachable
  - Do not do to others what do you want them to do to you
- Detection
  - Use tools: Google alerts, Social mention,
  - Check your brand's mentions on search engine results
  - Read comment on your blog
  - Check rating
  - Ask to your customer
- Response
  - Make prompt but calm
  - Honest answer
  - Thanks
  - Create High Quality content

  - Build better relationship with your customer

10 Online Reputation Management (ORM) Commandments

- Become well respected
- Be radically transparent
- Monitor what they are saying about you
- React quickly and politely
- Address criticism

- Treat your Google page 1 as your business card
- Understand your detractors
- Attack your illegitimate attackers
- Learn from your mistakes
- Ask for help if necessary

Managing analytics

- Data generated from Social Media
- When we want to improve our efforts we use this data to our advantage
- To manage the data collection you need to identify:
- What platform
- What demographics
- What data will actually help

Managing data

- How do you display data on your tracking?
  - Organic Data
  - Advertising Data
  - Account Data
  - Audience Data
- When we have this data, we can improve

Managing analytics

- Data ≠information
- We need to analyse to turn data to information

Managing reports

- Creating reports for your business using data
- On platform data
- Website data
- Pre-existing report documents
- Linked to Google Analytics
- What matters to you

Social media management tips

- Content Quality over quantity
- Brand your Social Media Profile Pages
  - Logo and tagline
  - Imagery
  - Company Description
  - Tone and voice
- Analyse Data to Find the Perfect Quantity
- Check out competitors

Managing

- Now we understand management, you need to begin to examine your own efforts
- This needs to be detail orientated
- How are you actually performing?
- What do you need to change?
- Audit your platforms!
